3-10-1911

1. The first of the series of experiments was made on the 10th of March 1911. The object of the experiment was to determine the effect of the temperature of the water on the rate of the reaction. The temperature of the water was varied from 10°C to 30°C. The results of the experiment are given in the following table.

Temperature of water (°C)	Rate of reaction (g. of gas evolved per hour)
10	0.15
20	0.30
30	0.45

2. The second of the series of experiments was made on the 11th of March 1911. The object of the experiment was to determine the effect of the concentration of the solution on the rate of the reaction. The concentration of the solution was varied from 0.1M to 0.5M. The results of the experiment are given in the following table.

Concentration of solution (M)	Rate of reaction (g. of gas evolved per hour)
0.1	0.15
0.2	0.30
0.3	0.45
0.4	0.60
0.5	0.75

3. The third of the series of experiments was made on the 12th of March 1911. The object of the experiment was to determine the effect of the surface area of the solid on the rate of the reaction. The surface area of the solid was varied from 10 cm² to 100 cm². The results of the experiment are given in the following table.

Surface area of solid (cm ²)	Rate of reaction (g. of gas evolved per hour)
10	0.15
20	0.30
30	0.45
40	0.60
50	0.75
60	0.90
70	1.05
80	1.20
90	1.35
100	1.50

EXECUTIVE DEPARTMENT OF INDIANA.

R E P O R T

OF

W. H. H. TERRELL,

FINANCIAL SECRETARY.

TO THE GOVERNOR, MAY, 1864.

INDIANAPOLIS:

JOSEPH J. BINGHAM, STATE PRINTER.

1864.

TO THE PEOPLE OF INDIANA.

In presenting the accompanying report of my financial secretary it is proper that I should state, for public information, the reasons which induced me to establish a Financial Bureau, and assume the heavy responsibilities which were thus thrown upon me.

The Legislature of 1863 adjourned on the 9th day of March, without making any appropriations for defraying the ordinary and extraordinary expenses of the state government. The former appropriations for the Benevolent Institutions—the Hospital for the Insane, Institute for the Blind, and Asylum for the Deaf and Dumb had been nearly or quite exhausted. The Northern Prison had not only exhausted the appropriations hitherto made, but, by incurring a heavy debt in construction of buildings, had exhausted its credit also. More than one hundred thousand of our citizens had been sent to the field to assist in suppressing the rebellion, yet the only fund at my disposal from which the contingent military expenses, including the care and relief of the sick and wounded, could be paid, was a small remnant of the appropriation made in 1861. For the civil contingent expenses of the Executive Department there was no provision whatever. The Auditor and Treasurer of State, upon being consulted by me immediately after the close of the session, decided that not a single dollar, in the absence of Legislative appropriations, should be drawn from the public funds in the Treasury for these objects.

The alternatives thus presented to me, were, First—to allow the Benevolent Institutions to be closed, and permit the unfortunate inmates to be thrown back upon their respective counties, or upon the charities of the world for care and support; or, Second—to convene the Legislature in extra session, in the hope that the majority, who had full control, would pass the appropriation bills. To have closed the Asylums would have been a shame and disgrace, as well as a crime against humanity itself. To have called back the Le-

gislature, after the majority for fifty days, during which time a quorum was present in each house, out of the fifty-nine days of the regular session, had failed and refused to bring forward and pass the appropriation bills, I believed would have been perilous to the public peace and dangerous to the best interests of the State.

In this contingency I determined to procure, if possible, sufficient money to carry on all the institutions of the state and keep the machinery of the government in motion. I accordingly established a Bureau of Finance, and appointed Col. W. H. H. TERRELL Financial Secretary. My success in procuring funds exceeded my expectations, and I am gratified to state that provision has been made for all the means which will likely be required to meet every proper demand up to the next regular meeting of the Legislature.

I cannot close these remarks without referring to the very able, intelligent and faithful services of my Financial Secretary, Colonel TERRELL, whose report is herewith published. To him I am indebted for the system of book-keeping, forms of vouchers and general method of business in the Financial Department, all of which have been highly commended by those who are qualified to judge, for their simplicity, accuracy and adaptation to the purposes for which they were intended; and I desire, in this most public manner, to express my high appreciation of his eminent ability, and the valuable services he has rendered to the state, and to my administration.

OLIVER P. MORTON,

Governor of Indiana.

EXECUTIVE DEPARTMENT,

Indianapolis, May 10, 1864.

EXECUTIVE DEPARTMENT,
BUREAU OF FINANCE,
Indianapolis, May 1, 1864. }

HIS EXCELLENCY,

OLIVER P. MORTON,

Governor of Indiana.

SIR:—I have the honor to present herewith,
in compliance with your instructions, a full and complete report of
the financial operations of this Bureau, from the time of its estab-
lishment, on the 18th day of April, 1863, to the 30th day of April,
1864, inclusive.

FINANCIAL REPORT.

PLAN OF BUSINESS.

Upon receiving from you, in April, 1863, the appointment of Financial Secretary, I procured the necessary books, prepared forms for the various accounts, and commenced the transaction of business.

The system of book-keeping adopted corresponds very nearly with that in use in the offices of the Auditor and Treasurer of State, with the addition of several registers and statement books not used in those offices.

The funds received have been deposited in bank and only drawn out upon checks signed by yourself, payable to the order of claimants. Accounts have been kept with the following banking houses: The Indianapolis Branch Banking Company, A. & J. C. S. Harrison, and S. A. Fletcher & Co., Indianapolis; Winslow Lanier & Co., New York, and the United States Depository, Cincinnati. No funds have been received, disbursed, or used on any account, or for any purpose, except as shown by the general statement of receipts and disbursements herewith submitted, and none have been paid out except upon proper and sufficient vouchers. Monthly settlements have been made with the banks, and the checks paid by them carefully compared with the vouchers and books of the Bureau; and statements have been prepared showing the monthly receipts and disbursements and the balance remaining on hand. In addition, general statements have been made, showing the whole operations of the Bureau up to the close of each month.

VOUCHERS.

All payments for the Benevolent Institutions and Prisons have been made upon itemized accounts, specifically setting forth the articles purchased, or the services rendered, the price and amount, and the same have been certified and approved by the Steward, Superintendent or Warden, under whose direction the purchases were made or services performed. These accounts are passed and ordered to be paid by the proper Board of Trustees, or Directors, and a warrant is annexed to each for the amount, signed by the presiding officer of the board, and attested and registered by the Secretary. When receipted by the claimants, these vouchers are paid by checks as stated. All checks are required to be endorsed by the parties, and when paid are taken up at the end of the month from the banks, cancelled, and attached to the corresponding vouchers on file.

Payments to the *Militia* and *Minute-men*, who were called out in 1862 to repel rebel raids and protect our southern border from invasion, have been made only through the State paymaster. His accounts have been regularly audited and certified by the Military Auditing Committee appointed by the Legislature, and forwarded through this Bureau to the Treasury Department at Washington, for examination and reimbursement.

The *Arsenal* and *Armory* accounts, and claims for services of *Special Surgeons*, *Supplies sent to Richmond, Virginia, for Indiana prisoners of war*, *Military Telegraphing*, *Military Agencies*, *Recruiting Service*, etc., are fully itemized, certified by the proper officers, and have been audited and certified by the Military Auditing Committee, except in a few instances where expenses were unavoidably incurred at times when the committee was not in session.

The *special premium* accounts show the names of the recruits, when and in what counties recruited, for what regiment, company or battery, when and by whom mustered into the service, and are certified by the officer or person who procured the recruits, also by the mustering officer, and the superintendent of the recruiting service, or the military commandant, under whose orders the recruits were obtained, and receipted by the recruiting officer entitled to the premiums.

In the preparation of all vouchers great care has been taken to make them complete in every particular, and it is believed that no reasonable objection can be made to them on the ground of inaccuracy or uncertainty.

The following general statement shows the amounts received and disbursed to this date.

EXECUTIVE DEPARTMENT, INDIANA—BUREAU OF FINANCE.

General Statement, showing the Receipts and Disbursements from the 18th day of April, 1863, to the 30th day of April, 1864, inclusive.

RECEIPTS.	AMOUNT.	TOTAL.	DISBURSEMENTS.	AMOUNT.	TOTAL.
On account of the Indiana Arsenal: From the United States, for ammunition and ordnance stores.....		\$239,994 67	On account of Indiana Arsenal: For supplies, labor, &c., per vouchers on file.....		\$177,545 43

BENEVOLENT INSTITUTIONS.

Notwithstanding the entire failure of the Legislature to make the appropriations required for the support of these Institutions, they have been kept open, through your efforts, and the expenses regularly and promptly paid. The aggregate amount expended to the 30th April, 1864, is seventy-nine thousand seven hundred and four dollars and ninety-three cents (\$79,704 93), being expenses for fourteen months of the Institute for the Blind and Asylum for the Deaf and Dumb, and expenses for twelve months of the Hospital for the Insane, so far as warrants for the same have been presented for payment. A portion of the claims for which warrants have been drawn, on account of salaries of superintendents, etc., have been paid out of the State Treasury, and, in estimating the exact expenditures, should be taken into account. This is done in the comparative statements hereto attached.

At the time you undertook to defray the expenses of these Institutions, it was estimated by the officers in charge that about six thousand dollars (\$6,000,) would be required to pay the indebtedness then outstanding, and that seventy-three thousand dollars would be required to pay the expenses for the, then, ensuing year. The extraordinary advance, however, which was realized during the year in the prices of provisions, fuel, labor, etc., was not anticipated, yet it will be observed that the amount called for has exceeded the estimate only twenty dollars and twenty-seven cents (\$20.27). Within the past three years most of the articles consumed by the Institutions have rapidly enhanced in value, and now we find them from one hundred (100) to four hundred (400) *per cent.* higher than they were during the year immediately preceding the present war. A careful comparison of the expenses of the last year, with the expenses of the year before the war, when supplies of all kinds were plenty and cheap, will show that, notwithstanding the constant expansion of prices, the several Institutions have been carried on with commendable economy—the Hospital for the Insane costing only about one hundred dollars more than in 1860; and the expenses of the Institute for the Blind and Asylum for the Deaf and Dumb being actually *less* than they were in that year. These facts can be more clearly demonstrated by reference to the

following statements, which have been made up from the official records of the Trustees.

HOSPITAL FOR THE INSANE.

EXPENSES THE YEAR BEFORE THE WAR.

Warrants from May 1, 1860, to May 1, 1861,.....	\$36,662 87
Average number of patients three hundred.	
Average expense of each for the year,.....	\$122 20
Average expense of each per week,.....	2 35

EXPENSES LAST YEAR.

Warrants from May 1, 1863, to May 1, 1864,.....	\$36,765 33
Average number of patients three hundred.	
Average expense of each for the year,	\$122 55
Average expense of each per week,... ..	2 35½

Showing an additional expense of one hundred and one dollars and forty-six cents in favor of 1860-61, being an increase last year of thirty-five cents for the year, or half a cent per week, in the expense of each patient.

(The expenditures, as given above, do not include the amounts paid out for clothing, as the same were afterwards refunded by counties.)

INSTITUTE FOR THE BLIND.

EXPENSES THE YEAR BEFORE THE WAR.

Warrants from May 1, 1860, to May 1, 1861,.....	\$16,311 95
Average number of pupils sixty-three.	
Average cost of each for the year,.....	\$258 92
Average cost of each per week,.....	4 97

EXPENSES LAST YEAR.

Warrants from May 1, 1863, to May 1, 1864, (not including prior indebtedness,).....	\$20,304 44
Average number of pupils ninety-five.	
Average cost of each for the year,.....	\$213 73
Average cost of each per week,.....	4 11

Showing a reduction in favor of last year of 86 cents per week, or \$45 19 for the year, in the expense of each pupil.

ASYLUM FOR THE DEAF AND DUMB.

EXPENSES THE YEAR BEFORE THE WAR.

Warrants from May 1, 1860, to May 1, 1861,.....	\$31,445 64
Average number of pupils one hundred and seventy-three.	
Average expense of each for the year,	\$181 76
Average expense of each per week.....	3 49

EXPENSES LAST YEAR.

Warrants from May 1, 1863, to May 1, 1864,.....	\$25,050 85
Average number of pupils one hundred and fifty-two.	
Average expense of each for the year,.....	\$164 80
Average expense of each per week,.....	3 16

Showing a reduction in favor of last year of 33 cents per week, or \$16 96 for the year, in the expense of each pupil.

NORTHERN PRISON.

Soon after the present Board of Control of the Northern Prison assumed the management of that institution, you were applied to by the President and Warden to provide means for the payment of current expenses. The Legislature having failed to make any appropriation for the support of the prison, and its credit having been entirely broken down by the heavy debt which had hitherto been incurred in the construction of buildings, &c., it was found to be impossible to provide for the convicts and keep the concern open without money. The law requires that all convicts sent to the penitentiary from counties north of the National Road shall be confined in the prison at Michigan City. It could not, therefore, be closed. In this emergency you agreed to advance sufficient

funds to pay the expenses as they accrued. The Board was enjoined to exercise the strictest economy in the expenditures, and to realize as much as possible from convict labor.

The amount paid to the 30th of April, 1864, comprising a period of thirteen months, is twenty-one thousand five hundred and eighty-seven dollars and fifty-four cents (\$21,587 54), being about five thousand dollars (\$5,000) more than the Board estimated would be required during the time mentioned.

The remarks made under the head of "Benevolent Institutions," relative to the great and constant increase in the prices of all kinds of supplies, apply with equal force to the Northern Prison. Another matter should not be overlooked: the able-bodied convicts were under contract, made by a former Board when labor was cheap, at forty-five cents (45c.) per day, at which rate the State, of course, had to expend much more for the care and support of the convicts than was realized from their labor.

The general management of the Prison to this time appears to have been prudent and as economical as circumstances would allow. A recent letting of convicts at a largely increased price will materially augment the revenues of the Prison, and consequently reduce the outlay on the part of the State.

SOUTHERN PRISON.

The receipts from convict labor, at the Southern Prison, were sufficient to defray the expenses until December last, when a communication was received from the President of the Board of Directors, informing you that, owing to the rise in provisions, the prison was no longer able to sustain itself, and you were asked to advance the sum of four thousand dollars (\$4,000,) for the purchase of supplies. Accordingly the Board was authorized to make purchases to that amount, which was done, and the bills, certified and audited in due form, were paid. With this assistance, the Board expressed the belief that the prison would be able to sustain itself during the present year.

INDIANA ARSENAL.

The necessity which caused you to establish the Arsenal, on the 27th day of April, 1861, having in a great measure ceased to exist, the concern was, with the approbation of the Secretary of War, finally closed on the 18th day of April, 1864.

The statements herewith presented, marked A, B, C, D, E, F, and G, have been carefully prepared from official data, and completely exhibit the entire operations of the Arsenal, and the disposition and condition of the Arsenal fund, up to the 30th day of April, 1864. It will be seen that a gross profit of seventy-seven thousand four hundred and eighty-nine dollars and fifty cents (\$77,489 50) has been realized to the State, as follows: four thousand and two dollars and forty-four cents (\$4,002 44), value of tools on hand for fabricating ammunition; two thousand and seventy-four dollars and eighty-seven cents (\$2,074 87), value of ammunition retained by the State for the use of the Indiana Legion, leaving the sum of seventy-one thousand four hundred and twelve dollars and nineteen cents (\$71,412 19) as the *net cash profits* of the Arsenal, after the payment of all claims and demands.

A full and thorough examination of every transaction of a financial character connected with the institution has convinced me that the business has been honestly and economically done, and that the interests of the State have been faithfully protected by Colonel Sturm, Chief of Ordnance, under whose able supervision the Arsenal was conducted. In this opinion the Military Auditing Committee, in reports made to this department, after full investigation of the entire business, signed by Honorables Paris C. Dunning, John C. New, Samuel H. Buskirk, and Alfred Kilgore, fully concur.

[STATEMENT A.]

Operations of the Arsenal as connected with the United States.

D R.

DEBIT.	AMOUNT.	TOTAL.
The United States is charged:		
For ammunition issued at the Indiana Arsenal for account of the United States, from the 27th day of April, 1861, to the 18th day of April, 1864..	\$734,397 02	
For Ordnance materials turned over by Indiana Arsenal for account of the United States, on the 23th of March, 1864.....	47,255 32	
Total.....		\$781,652 34

C R.

CREDIT.	AMOUNT.	TOTAL.
The United States is credited:		
By Ordnance materials furnished.....	\$162,962 76	
By allowances made by the Chief of Ordnance, and paid by the United States Treasury Department	618,689 58	
Total.....		\$781,652 34

April 30, 1864.

The foregoing statement is corroborated by the following, received since this report was completed:

CERTIFICATE OF THE CHIEF OF ORDNANCE.

ORDNANCE OFFICE, WAR DEPARTMENT, }
 WASHINGTON, May 11, 1864. }

This is to certify that the State of Indiana has been allowed, through this office, the sum of seven hundred and eighty-one thousand six hundred and fifty-two dollars and thirty-four cents (\$781,652 34), for ammunition and other ordnance stores furnished by that State to the United States, between the 27th day of April, 1861, and the 18th of April, 1864; that from this amount there has been deducted (for ordnance materials furnished by the United States) the sum of one hundred and sixty-two thousand nine hundred and sixty-two dollars and seventy-six cents (\$162,962 76); and that the net amount paid to the State of Indiana for these stores is six hundred and eighteen thousand six hundred and eighty-nine dollars and fifty-eight cents (\$618,689 58).

Given under my official signature the day and year above written.

(Signed)

GEO. D. RAMSAY,
 Brigadier General, Chief of Ordnance.

April 30, 1864.

[NOTE.—Since the above statement was made, Governor Morton has paid into the State Treasury the sum of \$87,229 58, being the amount of the balance due the State, and holds proper vouchers for the same.]

The cash profits of the Arsenal form a part of the general fund in your hands to be used in defraying the general expenses which may hereafter be incurred on account of the State.

STATE PAYMASTER.

The accounts of the State Paymaster, forwarded to Washington for settlement, amount to the sum of one hundred and eighty-seven thousand four hundred and fourteen dollars and eighty-two cents (\$187,414 82), upon which the sum of seventy-nine thousand three hundred and fifty-five dollars and sixty-two cents (\$79,355 62), has been refunded by the United States and credited on the amount advanced to the Paymaster through this Bureau. The balance, to-wit, one hundred and eight thousand fifty-nine dollars and twenty cents (\$108,059 20), it is expected will shortly be refunded, of which seventy-five thousand dollars (\$75,000) is due the State Treasury for amount advanced to the Paymaster out of the Special Military or Legion Fund.

From the reports of the Paymaster, Major Stearns Fisher, the following statement of his account is made:

Amount received of O. P. Morton, Governor	\$171,361 88
Amount received from State Treasury	75,000 00
Total debit.	<u>\$245,361 88</u>
Paid to the militia, per vouchers.	\$187,414 82
Returned to O. P. Morton, Governor.	50,000 00
Total credit.	<u>\$237,414 82</u>
Balance in Paymaster's hands	\$8,947 06

EXPENSES OF SUPERINTENDENT OF PUBLIC INSTRUCTION.

In June last, at a meeting of the State Board of Education, the Hon. SAMUEL L. RUGG, Superintendent of Public Instruction, represented that the legislative appropriations heretofore made for his traveling and office expenses, were entirely exhausted, and that unless some arrangement could be made to provide funds for the payment of these expenses, he would be compelled to suspend the discharge of his official duties. Thereupon, you consented to furnish the money required, and up to this time the sum of nine hundred and forty-five dollars and sixty-four cents (\$945 64) has been paid on that account.

SPECIAL PREMIUMS FOR RECRUITS.

Under the call of the President of September 14, 1863, for volunteers, a large number of recruiting officers were appointed by you to raise the quota assigned to this State. The old regiments and batteries in the field also detailed one non-commissioned officer or private from each company to recruit for their respective companies. The expenses attending this service were necessarily quite heavy, and the recruiting officers, in many cases, were unable to defray them. As a matter of justice to them, as well as to stimulate recruiting, on the 16th day of November last, you issued orders allowing a special premium of six dollars for each recruit obtained after that date, and duly accepted and mustered into the military service of the United States, the money to be paid to the recruiting officers aforesaid, upon proper vouchers at this Bureau. This arrangement proved to be of the greatest advantage to the public service. Eleven thousand four hundred and sixty-seven (11,467) recruits were obtained, the aggregate amount of premiums being sixty-eight thousand eight hundred and two dollars (\$68,802 00), for which nine hundred and forty-six (946) accounts in duplicate were presented and paid, as follows: for eight thousand eight hundred

and thirty-two (8,832) recruits for new regiments the sum of fifty-two thousand nine hundred and ninety-two dollars (\$52,992 00); for two thousand and eighty-four recruits for old regiments and batteries, the sum of twelve thousand five hundred and four dollars (\$12,504 00), and for five hundred and fifty-one (551) negro recruits for the "colored battalion," the sum of three thousand three hundred and six dollars (\$3,306 00). A few claims in favor of recruiting officers, who were required to go to the field before their accounts could be made up, yet remain unpaid. As stated elsewhere, the amount of premiums paid is a proper claim against the United States, and will be refunded.

MILITARY CLAIMS.

The expenditures made under the general head of *Military Contingent Fund*, amounting in the aggregate to the sum of one hundred and thirty-four thousand two hundred and fifty-seven dollars and forty-one cents (\$134,257 41), of which the sum of nine thousand six hundred and forty-five dollars and seven cents (\$9,645 07) has been refunded, leaving a balance of one hundred and twenty-four thousand six hundred and twelve dollars and thirty-four cents (\$124,612 34), were made on account of the existing rebellion, and are legitimately chargeable to the United States. A portion of the vouchers have been forwarded to Washington and are in process of settlement, and the remainder will be sent as soon as practicable. No doubt is entertained that the General Government will refund to the State the amount thus expended as soon as the accounting officers of the Treasury can examine the vouchers.

The expenditure on account of the *Indiana Armory* were for equipments furnished for United States troops, and for materials, tools, and labor used in repairing and taking care of arms; and the amount thus paid out is a just claim against the Government. These vouchers will shortly be forwarded for settlement.

A large balance due the State from the United States for advances made out of the *State Treasury* on account of the war, estimated in your last annual message at three hundred and fifty-

nine thousand six hundred and thirty-four dollars and seventy-five cents (\$359,634 75), for which vouchers have been filed with the third Auditor of the Treasury, remains unadjusted. All the information required to facilitate the settlement of these claims has been furnished from this department with as little delay as possible, and a speedy adjustment is anticipated. The law of Congress provides that the settlement of these claims shall be made with the Governor (U. S. Laws, 1861). It is proper, therefore, that I should state that I was informed, while at Washington a short time since, by the third Auditor of the Treasury, that no settlement has been made with you, and that no moneys whatever have been paid to you by the United States on account of said claims.

INTEREST ON THE STATE DEBT.

The Auditor, Treasurer, and Agent of State having failed to pay the interest on the two and a-half and five per cent. stocks, known as the funded debt of the State, which became due on the first day of July, 1863, an arrangement was made by you with Messrs. Winslow, Lanier & Co., of New York, to advance and pay the same, they relying upon the faith of the State, and future appropriations by the Legislature for reimbursement. As soon as correct lists of the stockholders could be obtained they commenced payment. A similar arrangement was made with the same firm for the payment of the interest due on the first day of January last.

From reports received at this Bureau from your agent in New York, John K. Gapin, Esq., under whose immediate supervision the interest was paid, the following statement is made:

INTEREST ADVANCED BY WINSLOW, LANIER & CO.

WHEN DUE.	WHEN PAID.	STOCKS.	Amounts paid.
July 1, 1863.....	December, 1863.....	5 per cents.....	\$90.325 67
July 1, 1863.....	December, 1863.....	2½ per cents.....	15,058 98
July 1, 1863.....	January, 1864.....	5 per cents.....	20,620 00
July 1, 1863.....	January, 1864.....	2½ per cents.....	7,667 04
July 1, 1863.....	February, 1864.....	5 per cents.....	4,775 00
July 1, 1863.....	February, 1864.....	2½ per cents.....	1,674 31
July 1, 1863.....	March, 1864.....	5 per cents.....	162 50
July 1, 1863.....	March, 1864.....	2½ per cents.....	121 56
July 1, 1863.....	April, 1864.....	5 per cents.....	385 00
July 1, 1863.....	April, 1864.....	2½ per cents.....	104 69
January 1, 1864.....	January, 1864.....	5 per cents.....	110,695 23
January 1, 1864.....	January, 1864.....	2½ per cents.....	22,720 63
January 1, 1864.....	February, 1864.....	5 per cents.....	3,977 92
January 1, 1864.....	February, 1864.....	2½ per cents.....	1,718 28
January 1, 1864.....	March, 1864.....	5 per cents.....	162 50
January 1, 1864.....	March, 1864.....	2½ per cents.....	21 56
January 1, 1864.....	April, 1864.....	5 per cents.....	385 00
January 1, 1864.....	April, 1864.....	2½ per cents.....	104 69
Total.....			\$280,680 56

It will be gratifying to those who appreciate the credit and good name of the State, to learn that you have arranged with the same parties to pay the interest due in July next.

EXPENDITURES FOR THE STATE PROPER.

By reference to the "General Statement of Receipts and Disbursements," it will be seen that of the entire amount expended, only the sum of one hundred and eleven thousand fifteen dollars and forty cents (\$111,015 40), being for disbursements on account of the Benevolent Institutions, State Prisons, Civil Contingencies, Superintendent of Public Instruction, and interest on loans, will, ultimately, have to be borne by the State, the Arsenal expenses having been paid from the Arsenal fund, and the Military Contingencies, pay of Militia, and Armory expenses being charged against the United States.

All which is respectfully submitted.

W. H. H. TERRELL,
Financial Secretary.

INDIANA STATE LIBRARY

THIRTEENTH REPORT

OF THE

SUPERINTENDENT

OF

PUBLIC INSTRUCTION,

FOR THE

STATE OF INDIANA,

BEING THE SECOND BI-ENNIAL REPORT—AND FOR THE YEARS
1863 AND 1864.

TO THE GENERAL ASSEMBLY.

BY SAMUEL L. RUGG,

STATE SUPERINTENDENT OF PUBLIC INSTRUCTION.

INDIANAPOLIS:
JOSEPH J. BINGHAM, STATE PRINTER.

1865.

STATE BOARD OF EDUCATION.

OLIVER P. MORTON, *Governor.*

JAMES S. ATHON, *Secretary of State.*

JOSEPH RISTINE, *Auditor of State.*

MATTHEW L. BRETT, *Treasurer of State.*

DELANA R. WILLIAMSON, *Attorney General.*

SAMUEL L. RUGG, *Sup't of Public Instruction,
and President of the Board.*

REPORT.

STATE OF INDIANA, }
OFFICE OF SUPERINTENDENT OF PUBLIC INSTRUCTION, }
INDIANAPOLIS, *January 9th, 1865.*

*To the General Assembly of the State of Indiana,
in Regular Session,*

Gentlemen:—In conformity to the requirements of Section 128 of the School Law, I have the honor to present to you the following Report of the Superintendent of Public Instruction; it being the thirteenth in regular order, and the second bi-ennial report from that officer.

The official reports which have been received at this office from the school officers in the several counties of the State, since the last biennial report to your body, show that the General Assembly, and the friends of common schools, throughout the State, have cause for encouragement in relation to the schools, on account of the manifest improvement in the school funds, school revenue, and the general elevation of the standard of the schools. At no time has our system of public instruction yielded the amount and measure of school instruction, and in many cases not the quality of such instruction which its friends had hoped for from it; yet much progress has been made under its operation, and it appears to me that for the future, much cause of encouragement now exists. From said reports and other means of information, we are enabled to compare our present educational condition with what it was in past years; and from such a comparison, our common schools are shown to be, in most respects, in a better condition than they ever were before. And the prospects of their being still further improved, is better now than it has been at any previous period of their history under our present system. It is thought that a comparison of the results in this behalf for the past year, with those reported in 1863, will assist in obtaining a practical understanding of much of the

details of our school operations, and assist, also, in appropriate legislation on the subject.

Whole number of children between the ages of five and twenty-one years.....	557,092
Increase since 1863.....	28,509
Number of townships.....	974
Increase since 1863.....	8
Number of incorporated towns.....	105
Increase since 1863.....	16
Number of cities, same as in 1863.....	22
Number of school districts in the State.....	7,981
Increase since 1863.....	60
Number of schools within the year.....	7,907
Increase since 1863.....	969
Number of pupils attending primary schools.....	370,564
Increase since 1863.....	97,487
Number of pupils in higher department.....	19,804
Increase since 1863.....	12,436
Average daily attendance in primary department.....	174,184
(This item not given in 1863.)	
Average daily attendance in higher department.....	11,302
Number of male teachers employed.....	5,274
Increase since 1863.....	781
Number of female teachers employed.....	3,847
Increase since 1863.....	1,406
Number of male teachers licensed within the year.....	3,875
Number of female teachers licensed within the year.....	3,329
(Not given for 1863.)	
Average compensation of male teachers, per day, in primary schools.....	\$1 38
Increase since 1863.....	33
Average compensation of female teachers, per day, in primary schools.....	\$1 07
Increase since 1863.....	44
Average compensation of male teachers, per day, in high school.....	\$2 78
Increase since 1863.....	90
Average compensation of female teachers, per day, in high school.....	\$1 50

Decrease since 1863.....	66
Value of school houses built within the year.....	\$347,033
Increase since 1863.....	128,071
Total value of school house property.....	3,472,612
Number of stone school houses.....	64
Number of brick school houses.....	510
Number of frame school houses.....	5,699
Number of log school houses.....	1,350
Total number reported.....	7,623
Amount of special school tax collected within the year.....	\$415,887
Increase since 1863.....	83,489
Number of townships for which average attendance is not reported by Trustee.....	96
Number of towns for which average attendance is not reported by Trustee.....	22
Number of cities for which average attendance is not reported by Trustee.....	5
Number of townships for which amount paid for tuition is not reported.....	35
Number of towns for which amount paid for tuition is not reported.....	15
Number of cities for which amount paid for tuition is not reported.....	3
Number of townships for which special tax collected and expended is not reported.....	135
Number of towns for which special tax collected and expended is not reported.....	29
Number of cities for which special tax collected and expended is not reported.....	4

The foregoing comparison shows clearly that progress has been made in the business of the schools, and that we have realized an actual gain in all the leading elements of the system, within the time to which the comparison relates. If the ratio of progress or gain for the last two years is compared with that of any similar term in the previous history of the system, it will be found to be quite as encouraging. Much as has been accomplished in furnishing tuition in the common schools of the State within the last two years, it has been far short in quantity, and in many instances inferior in quality to what the great body of the people of the State desire and have had reason to expect, and have really expected under the operation of the present system of public instruction. The schools have been continued in session over the State, on an average, eighty-seven days, which, if reduced to months, is four; and only about half the length of time which the people desire, and which would be generally satisfactory to them.

When the present Constitution of the State was submitted to the people for ratification, that provision of it which makes it the duty of the General Assembly to provide free tuition in the common schools, and to open them to all, was received with especial favor. Previous to that time, the free school system of the State was made dependent for most of the necessary revenues for its support, upon the uncertain popular vote of a district, township, town or city, or upon the more uncertain action of trustees, or city council of the local municipal corporations, all of which tended to make such support very precarious and unsteady; and at the time of the submission of the New Constitution to the people for approval, they were very glad to exchange the system then existing, for the one, the foundation of which was laid in new fundamental law. They understood that tuition in the common schools was to be without charge, and equally open to all; and it was readily concluded that such tuition would naturally, and of course, be of a quality, and be continued a length of time that should be reasonable and generally satisfactory.

The present system of common schools of the State has now been in operation more than twelve years, and in no year of that time have the schools been continued so long in session, nor the quality of their teaching and instruction been so good, nor their teachings made to reach so many children of the State, as for the year ending with August, 1864. Yet complaints are heard from nearly every point in the State at which a school is kept, that the

term is too short to accomplish the amount of good desired, and that in many instances the teachers employed are so poorly qualified for the business of teaching, that they advance their schools but little, if any, in the short time the schools can be kept open. These complaints are so common among the people, and so general over the State, that they need only to be mentioned to be recognized by almost every member of the General Assembly as existing in his own immediate school district, city, town, or township, and throughout the circle of his acquaintance.

WANTS OF THE SCHOOLS.

From the facts above stated, and from information derived from many other legitimate sources, and which is probably abundant in the mind of any one who has given attention to the subject, the present great wants of the schools may be stated to be, "longer school term and better qualified teachers."

Within the past year I have availed myself of many opportunities to observe and test the popular sentiment in relation to our system of public instruction, and the common schools, and to ascertain the complaints of the people against them, where any such existed, and to learn the plans for their correction which have revolved in the public mind. Many complaints have of course reached me in relation to them, but none have been so general and urgent as those which relate to the shortness of the school term, and the want of better qualified teachers. For the supply of the first of these great wants there have been three plans suggested, discussed, and considered to some extent. Either one of two of them can be made at once available by the General Assembly for lengthening the schools, so as to make them, in that respect, entirely satisfactory. The other plan contemplates an amendment of the educational provisions of the Constitution, measures for which were acted upon by the Legislature at its regular session for 1861 and 1863, and finally failed, and need only to be mentioned here to be understood.

These plans may be briefly stated as follows:

First. Increase the tuition revenue to a sum sufficient to keep the schools in session a satisfactory length of time.

Second. Reduce the common schools by law to such limits, and in such a manner, that the tuition revenue now provided for by law shall keep them open a satisfactory length of time.

Third. Amend the Constitution so as to return the taxing power for this purpose to the people, and change the provision which requires such taxes to be uniform over the whole State.

The first of these plans I understand to be the most completely in accordance with the popular sentiment on this subject. If it is adopted, it can be at once carried into effect, and be made to supply this great want of the schools. Under its operation, they will be readily elevated to a condition of prosperity, general success, and utility, which the people of the State have long hoped for, and had the right to expect, under our present system, but have never yet realized. This plan is not rendered obnoxious by the several years delay, and the great uncertainty of ultimate success that adheres to the one which is made dependent upon an amendment of the fundamental law. Neither is it objectionable on the score of its letting down the present standard of the schools, and narrowing their scope of usefulness, as is the case with the second plan.

The common schools, when properly graded and conducted, now cover the whole educational field below the colleges and universities. In many instances, students have been advanced in the higher departments of them, to a point of preparation which has been sufficient for their admission to a regular collegiate course in the colleges or universities, without any intermediate academic course of preparation. For the ordinary vocations of life, and for the current demands of business, the measure of knowledge and learning which they furnish are quite sufficient. Such is the present high character for usefulness of many of our common schools, which have been organized as graded schools. A necessity that would require a depression of their high character, or the narrowing of their limits for usefulness, would be deplored by their friends and patrons as a misfortune to the State.

Under the first Constitution of the State, we had the common schools, the county seminaries, the colleges and universities. Our present Constitution abolished the county seminaries, and turned over to the common school fund their entire funds, revenues and property, and left the educational field which they had occupied open for occupancy by the common schools. To now adopt the second plan suggested as an appropriate remedy, appears to be a step in the wrong direction—a going back to the system abolished by the new Constitution—a retrograde step, not in accordance with the popular sentiment, nor with the spirit of the age in which we are called upon to act in this behalf. If these conclusions are cor-

rect, neither the second nor the third plans suggested can reasonably be adopted.

ESTIMATES FOR EIGHT MONTHS SCHOOL.

In considering the first plan suggested for lengthening the schools, it may, perhaps, be desirable to consider in connection with it, the estimates upon which it is based, and which forms its elements. The official reports of the school examiners on file in this office, show the average length of school term of all the schools in the state to be, for the year ending the 31st of August, 1864, eighty-seven days. This, reduced to months, makes a small fraction more than four months. The semi-annual apportionments of school revenue for tuition, one for May, and the other for November, 1864, amounted in the aggregate to the sum of \$892,446 81. This sum may be safely taken as the cost of the four months school for the past year. To double this length of term by providing for eight months schooling instead of four, will probably, in our present and prospective condition, cost double the sum above stated, to wit: \$1,784,894. To provide for this amount of revenue, our dependence must, I think, be upon the following sources of revenue.

<i>First.</i>	Upon our present tuition revenue.....	\$892,446
<i>Second.</i>	Upon the increase of revenue for tuition at the present rate of taxation, produced by the new appraisement of real estate and the new valuation of other taxable property.....	62,000
<i>Third.</i>	Upon an amendment of the liquor law, so that the sums of money due to the schools, according to its provisions, can be collected summarily and with certainty.....	150,000
<i>Fourth.</i>	Upon directing the income of the Sinking Fund to the schools.....	161,200
<i>Fifth.</i>	Upon an increase of the school tax on property ten cents on each \$100 valuation.....	517,806
Total.....		\$1,789,452

Sixth. Probably upon a little different discrimination in the apportionment of the tuition revenue to the several townships, towns and cities.

In commendation of this plan it may be said, that it is completely within the reach of the Legislature; that it can be made available now; that it provides with certainty for the case in question; and that it works no letting down of the standard, or narrowing of the usefulness of the schools.

It is probably well enough here to consider these several sources of revenue more in detail, they being but briefly mentioned above. The first and second sources of revenue above mentioned, are now provided for by law, and I apprehend no disposition to change them.

The third source of revenue is dependent upon an amendment of the law regulating the sale of spirituous liquors. It was expected by many when that law was enacted, that it would yield to the schools an annual revenue of \$175,000 or \$200,000. The first year after the law took effect, it produced \$69,395 of school revenue; the second year \$49,766; since which time it has fallen lower. The comparatively small amount derived from this source, and its annual decrease in amount, is manifestly due more to an evasion of the law on the subject, than to any decrease in the traffic. It is understood that whenever a person engages in the business of selling liquor without license, that he is indebted to the schools in the sum of fifty dollars, the price of the license. Let this be collected as summarily, and with the certainty that the price of a liquor license is collected under the national tax law, and the schools would at once feel its effects.

The fourth source of revenue is based upon a change in the direction of the income of the State Bank Sinking Fund. That income now mostly goes to augment the fund, and it is proposed to change its direction to the account of school revenue for tuition. The bonds of the State, for the payment of which this fund was originally created, have been paid off, or nearly so, and the income is no longer needed for that purpose. Therefore, in the language of the 114th section of the Bank Charter, it now becomes a permanent fund, to be appropriated to the cause of common school education, in such manner as the General Assembly may direct. There appears to be nothing now in the way of the General Assembly giving to the income of this fund, the direction suggested by the law creating it. In the above estimate I have put down the amount to be depended upon from this source at about what its income amounted to for the year ending with December, 1863. There has been \$350,948 65 of this fund distributed to the counties,

the income from which now goes to the schools. The income from the other portion of the fund can, with great propriety, I think, be given the same direction.

The fifth source of revenue is dependent upon doubling the present school tax levied on property for tuition. By levying twenty cents on each one hundred dollars of the valuation of taxable property, instead of ten cents, which is the present levy for that purpose, would add about \$517,000. We have reached a point in the progress of our school system, at which there appears to be almost or entirely a necessity for such a levy of tax. With it the system can be supported in a satisfactory manner, and without such a levy it cannot be so supported.

No system of instruction, whether for common schools or for the higher institutions of learning, can continue prosperous and satisfactory, unless it is endowed with revenues sufficient for the object of its creation. Our system of public instruction—now more directly under the fostering care of State authority than that of any of the sister States, is no exception to this remark. With sufficient revenues it will be the pride of the State; without them it is a disappointment, an ultimate failure.

These measures for increasing this kind of revenue, are commended to your favor upon considerations of true economy. If the children of the State are to be educated, a great amount of expense must be incurred in doing it. The education of children is expensive at best. It cannot be accomplished without a great and almost constant out-lay of money; and by no private plans can it be so cheaply or so well done as by an efficient system of public instruction. The reports for August, 1864, enumerate 557,072 children between the ages of five and twenty-one years. The foregoing estimate for eight months school is \$1,789,452, which is \$3 21 per child. Can any private plans or effort provide as much schooling for three times that sum? The reports further show that there were 8,894 teachers employed in the common schools the past year, and the foregoing estimate would furnish an average compensation to each of them of \$201 for eight months labor at teaching. These facts clearly show that, even under the proposed increase of revenue, the employment of teaching in Indiana is not one at which the compensation is high in proportion to the time spent, or the labor performed.

BETTER QUALIFIED TEACHERS.

The want of teachers who are well qualified and learned in all the business and art of teaching in, and the government and management of the common schools, is one which is very extensively and injuriously felt in the schools of the State. The great lack in the supply of such teachers, when compared with the demand there is for them, indicates a necessity for the adoption, on the part of the State, of suitable measures for the supply of this want. This necessity is increased by the fact that within two or three years past, a large number of male teachers have abandoned the business of teaching to engage in other business. Many of them ranked high in their profession, and their places cannot be readily filled with others of equal experience and qualifications. In many instances, and almost without exception, the places thus made vacant in the schools, have had to be filled by persons who were not practical teachers; very generally by ladies, who, with reasonable opportunities for improvement, furnished by the State, will more than make good to the schools the temporary loss sustained in effecting the change.

The fact of the existence of this great want of better qualified teachers will not, I apprehend, be controverted by any one. It is too general over the State, and too manifest to all who have children to educate, for it to be questioned. When the existence of the want is recognized, the mind naturally turns to the consideration of plans and means for supplying it. For suggestions upon this subject, we may look with profit to other States.

Wherever the common schools have reached the condition of the greatest excellence, they have been under the fostering care of State authority, and their condition of excellence has been arrived at by means of the agencies employed by the State for the improvement of the teachers. If we consider a few of these agencies in the order of their importance, as they are used in other States, we will find them to be: *First*. Normal schools. *Second*. Teachers' Institutes. *Third*. The formation of teachers' classes in the higher private institutions of learning. *Fourth*. State Teachers' Associations. None of these agencies have ever been patronized by, or received any encouragement from the State.

In view of the limited facilities in Indiana for improving the qualifications of teachers, and the low rate of compensation paid them in most cases, we can not expect young men and young

ladies to incur the difficulty and expense of thoroughly qualifying themselves. Such persons must of necessity be extensively employed in the common schools, because there are no others who can be employed; and the result is poor schools, and a consequent waste of a large amount of real utility and good, which would result to the children of the State, if the schools were made good by first providing well qualified teachers for them. It is a very common remark, a kind of *truism*, that "as is the teacher, so is the school." With *first rate* teachers, the schools will be first rate; with *fourth rate* teachers, the schools can not rank higher than the teachers. In very near proportion as we elevate the teacher in his calling, we improve and elevate the schools; the improving effects of which are witnessed in our sons and daughters who make up the body of such schools.

If the foregoing reasoning is sound, a necessity exists for establishing, and putting into operation, a good Normal school; and for an appropriation for holding Teachers' Institutes; and for holding the State Teachers' Association.

Such schools have no where been failures, but eminent success has, as far as I am informed, always attended them. They are so important to the common schools, and so intimately connected with their success and elevation, that they become great favorites with school officers and teachers, and very popular with the people. Such a school could, I think, be put into operation without the State incurring much expense in providing the grounds and buildings necessary for that purpose. For its endowment and support, so that tuition in it can be without charge, and equally open to all who desire to become teachers in the common schools of the State, I suggest an annual appropriation of \$10,000, from any part of the tuition revenue, except that which is derived from the permanent school fund.

TEACHERS' INSTITUTES.

Teachers' Institutes are highly important agencies for the improvement of teachers, in all the qualifications which make them successful in the common schools. Their teachings should be, and I think generally are, the same in kind, but much less in quantity, when compared with that furnished by the Normal schools.

One of the great causes of the inefficiency in our common schools is the kind of uncertain, indefinite, or haphazard way in which

most of the teachers proceed with, and conduct the business of the schools, for want of a suitable standard in such matters; and the Normal school furnishes such a standard, and the Teachers' Institutes and State Teachers' Association assist in applying it to the schools, and in making it available for their improvement and elevation. I therefore suggest an appropriation of \$100, for each Institute which may be held for five days, under the general direction of the State Superintendent of Public Instruction; and \$100 to each annual meeting of the State Teachers' Association, payable as the appropriation to the Normal school is to be paid, and not exceeding \$2,400 in any one year.

STATISTICAL TABLES.

The statistical tables, and abstracts in detail, as required by the 130th section of the school law, have been prepared from the materials furnished by the proper officers in the several counties, will be found in the appendix to this report, to which attention is respectfully invited. Some of the reports of subordinate officers are very defective, and to that extent the tabular statements are, of course, defective. So far as estimates are based on these reports, they are probably below, rather than above the true point of accuracy; if they lead to error, it is on the safe side. The want of fullness and accuracy in the school reports made to this office is a great source of disappointment in our school statistics. In the proper place I will suggest what appears to be the appropriate correction.

SCHOOL FUND.

The 130th section of the school law requires the Superintendent of Public Instruction to present in his biennial report, plans for the management and improvement of the school funds and revenues. Such plans can be more intelligibly presented after a brief statement of the present amount and condition of said fund and revenues. The second section of the eighth article of the Constitution, provides that the common school fund shall consist of:

- 1st. The congressional township fund, and the lands belonging thereto.
- 2d. The surplus revenue fund.
- 3d. The saline fund, and the lands belonging thereto.
- 4th. The bank tax fund.

5th. The fund arising from the 114th section of the charter of the State Bank of Indiana.

6th. The fund to be derived from the sale of county seminaries, and the moneys and property heretofore held for such seminaries.

7th. From the fines assessed for breaches of the penal laws of the State.

8th. From all forfeitures which may accrue.

9th. All lands and other estates which shall escheat to the State for want of heirs or kindred, entitled to the inheritance.

10th. All lands that have been, or may hereafter be granted to the State, where no special purpose is expressed in the grant, and the proceeds of the sale thereof, including the proceeds of the sales of the swamp land, granted to the State of Indiana by the Act of Congress of 28th September, 1850, after deducting the expense of selecting and draining the same.

11th. Taxes on the property of corporations that may be assessed for common school purposes.

The law requires that the amounts of the congressional township fund, and lands belonging thereto, shall be kept entirely separate from the other part of the school fund, and that the revenue derived from that fund should be kept separate and distinct from the other school revenue for tuition.

Whenever any money or income is derived from any of the other funds or sources of fund above mentioned, and becomes added to the permanent school fund in any of the counties, and invested as such, they thereupon lose their distinctiveness of character and name as above given, and the account of them all is kept under the one general head of common school fund, and the income derived from said fund, is carried to the general account of school revenue for tuition, to which account is carried also the amount derived from the tuition tax, liquor licenses, and unclaimed fees.

There has long been lying in the State Treasury, unproductive of school revenue, portions of Congressional Township fund, Surplus Revenue fund, Saline fund, Bank Tax fund, fund derived from estates without heirs, and Swamp Land fund. I know of no good reason why the money derived from these several sources may not now be invested as permanent common school fund, and carried to that account, and the income from it directed to the account of school revenue for tuition. The Constitution, and the statute enacted in furtherance of it, make these items a part of the com-

mon school fund; but they have never received the direction necessary to make them available as such.

SINKING FUND.

The fifth item of fund above mentioned, or that arising from the one hundred and fourteenth section of the charter of the State Bank of Indiana, is the fund known as the State Bank Sinking Fund, and constitutes a large part of the school fund, and is, for the most part, unproductive of school revenue. There has been something more than three hundred and fifty thousand dollars of this fund distributed to the counties, and there added to the permanent school fund, and is now productive of school revenue at the rate of seven per cent. per annum. The residue of this fund, for all the details of its investment, collection, and general management, is under the control of the Commissioners of the Sinking Fund. The original debt of the State, for the payment of which this fund was created, has been nearly all paid off, there being now but about \$10,000 outstanding, on which the payment of interest has long since been stopped on account of the readiness of the Commissioners to pay the principal sum. The time, therefore, appears to have come in the course of the administration of this trust, and the contingencies have occurred, when, according to the one hundred and fourteenth section of the bank charter, the General Assembly may cause said fund to be made a permanent one, and appropriate it to the cause of common school education, in such manner as it shall see fit to direct.

A large amount of the school fund now held in trust by the counties, was, at the date of the last report from the County Commissioners, March, 1864, lying unloaned in the County Treasuries, for want of borrowers. The amount thus lying, according to said reports, was \$178,526, and I am informed that it has since been considerably increased. If the fund now held by the counties cannot be readily loaned, will it not be unwise to distribute to them as much more for the same purpose?

FORFEITURES.

From the eighth source of augmentation of said fund, as above mentioned, which reads, "and from all forfeitures which may accrue," there has probably been but little added to the permanent fund. *First*, because neither the clause above quoted, nor the sta-

tute enacted to give it effect, define what kind of forfeitures are meant, or intended to be carried by it to the school fund. *Second*, because there is no statute in force requiring officers to pay over or add to the school fund, the money collected upon forfeited recognizances, or upon any other kind of forfeitures. It is easy to see that the money collected upon forfeitures will not be likely to be all added to the school fund, unless there is some provision of law giving it that direction.

I have construed the provision of the Constitution above quoted to include and mean all forfeitures of recognizances which may be taken by a court, or public officer, in the name of the State, of any person who has incurred any liability to the State for which a recognizance is provided by law, and particularly such as are taken of, and entered into by persons who are charged with offences against the penal laws of the State, for their appearance in court to answer such charges. In some of the counties of the State, forfeitures of this kind have been, without objection, paid over by the persons collecting them to the county Treasurer, and carried upon the proper books to the account of permanent school fund.

In at least one of the counties of the State, the clerk of the court, who had collected money upon such a forfeiture, refused to pay it over to the county Treasurer to be added to the school fund, for the alleged reason that there was no law in force requiring such payment to be made by him, and that the provision of the Constitution above referred to, does not include nor mean forfeitures of the kind upon which he had collected the money in question. Upon a careful examination of the law on the subject, preparatory to ordering a suit for the recovery of the money in favor of the school fund, I found that such a recovery was, at least, doubtful. I, therefore, did not sue for it.

In at least one other county of the State, this provision has been construed to include and mean all forfeitures of the kind above mentioned; and all forfeitures in the nature of penalty for non-payment of taxes—from which thousands of dollars have been added to the school fund: and all moneys in the nature of penalty for the forfeiture of the contract for the sale of school lands, as provided by the fifty-ninth and sixtieth sections of the school law; and all moneys in the nature of per centum on the sum bid for school lands, in case of failure to make the first payment upon such bids. From this diversity of practice in the several counties under the present

law, it is manifest that its provisions are not sufficiently clear to produce uniformity and certainty in its administration.

TAXES ON PROPERTY OF CORPORATIONS.

The eleventh provision for the augmentation of the school fund, as above mentioned and numbered, which reads as follows: "Taxes on the property of corporations that may be assessed for common school purposes," has never contributed anything to the permanent school fund. If, by this provision of the Constitution, is meant the one mill tax assessed for tuition, or the special school tax assessed for the purpose of building school houses, furnishing, repairing, &c., then neither of them have taken the right direction, because no part of either kind of tax has ever been added to the permanent school fund. They have been uniformly carried to the respective accounts of school revenue.

Is it not possible that by this provision it was intended that the General Assembly, in enacting a general law for the incorporation of companies, should assess a reasonable tax in some form on their property, for common school purposes, which should go to the permanent school fund as a compensation for the powers and franchises thus granted to them as corporations? It was evidently the intention that, by this provision, corporations should contribute in some way to the school fund.

AMOUNT OF SCHOOL FUND.

According to the latest reports received at this office, the school fund consists of the following items and amounts, to-wit:

Congressional Township School Fund (productive)	\$2,098,367 75
In un-old school lands, of same fund (unproductive)	157,946 00
In the State Treasury of same fund (unproductive)	347 50
Total Congressional Township Fund	\$2,256,661 25
Common School Fund (productive)	1,393,877 57
State Bank Sinking Fund (unproductive) ..	3,993,354 81
Swamp Land Fund in State Treasury (unproductive)	71,466 56
Saline Fund, in State Treasury (unproductive)	33,536 09
Bank Tax Fund in State Treasury (unproductive)	22,947 00
Surplus Revenue Fund in State Treasury (unproductive)	643 06
Estates without heirs in State Treasury (unproductive)	5,899 61
Grand total of School Fund	\$7,778,355 94

The two sums above represented as productive, are held in trust by the several counties, for the purpose of being loaned, and amount, in the aggregate, to the sum of \$3,492,245 32, which sum is productive of school revenue at the rate of seven per cent. per annum, amounting last year to \$244,457 17. This, with the further sum of \$1,700, which was derived from the renting of unsold school land, is all the school revenue now derivable from the school fund. This revenue goes entire, without being diminished by any contingent or incidental expenses of management, collection, or disbursement, into the semi-annual apportionment to the schools. If any part of this productive fund lies unloaned in the county treasury, or is unsafely invested, or is lost, so as to yield no revenue or interest, the counties are held liable for the interest on such sums, at the rate fixed by law. I have aimed to settle and balance the interest account with the several counties at the time of making the semi-annual apportionment in October; and when the reports show a deficit of interest for the year then ending, upon the amount of fund held in trust by the county, to collect such deficit from the county. The amount of such deficits collected in October, 1863, was \$3,781 48; and for October, 1864, \$5,217 48. For the details of such collections, you are referred to the tables of the apportionments contained in Statement No. IV, in the Appendix.

The remaining portion of said fund, amounting to the sum of \$4,286,110 62, is at present unproductive of school revenue. Much of this sum yields an annual income which is at present directed to other objects than the schools. That part of the fund which is in unsold land, amounting to \$157,946, now yields but little school revenue, and cannot be made readily productive. The balance, amounting to \$4,128,164 62, can be made at once productive of such revenue by changing the direction of the income from its present object to that of the schools.

There is, according to the Auditor's report, \$145,579 50 of school revenue in the State Treasury, which, under the present law, is being paid up at the rate of \$50,000 a year. On this debt of the State to the school revenue the law provides for the payment of interest; but I am not aware of any law making the State liable to pay interest on any part of the school fund which remains in the Treasury.

The Constitution provides further, on this subject, (section 3 of the eighth article,) that "The principal of the common school fund shall remain a perpetual fund, which may be increased, but shall

never be diminished; and the income thereof shall be inviolably appropriated to the support of common schools, and to no other purpose whatever.

“SECTION 4. The General Assembly shall invest, in some safe and profitable manner, all such portions of the common school fund as have not heretofore been entrusted to the several counties; and shall make provision by law for the distribution, among the several counties, of the interest thereof.

“SECTION 5. If any county shall fail to demand its share of the interest thereof, for common school purposes, the same shall be re-invested for the benefit of such county.

“SECTION 6. The several counties shall be held liable for the preservation of so much of said fund as may be entrusted to them, and for the payment of the annual interest thereon.

“SECTION 7. All trust funds, held by the State, shall remain inviolate, and be faithfully and exclusively applied to the purposes for which the trust was created.”

I quote these sections here because the plans I have to suggest for the better management and improvement of the school funds and revenues are based more or less on them.

PLANS FOR THE BETTER MANAGEMENT OF THE FUNDS.

In view of the foregoing statement of the amount and condition of the school fund and revenues, and for their better management and improvement, I respectfully present the following plans:

First. Direct the payment, to the proper county, of the sum of \$347 50 of Congressional Township School Fund, which is in the State Treasury, to be invested in said county, as the same kind of fund is there invested.

Second. Direct the permanent investment of the other amounts of school fund, which are lying in the State Treasury, amounting, in the aggregate, to \$134,432 32, in the stocks or bonds of the State. See 4th section of 8th article of the Constitution.

Third. Repeal the present law for the distribution of the Sinking Fund, and empower the Commissioners of the Sinking Fund to invest all of said fund in the stocks or bonds of the State, as fast as it can be done, with due regard to economy in the purchase of such stocks or bonds, and revive the law authorizing them to

make loans of said fund. See 4th section of 8th article of the Constitution.

Fourth. Change the direction of the income of the Sinking Fund, so that it shall go into the semi-annual apportionments to the schools. See 3d and 7th sections of the 8th article of the Constitution.

Fifth. Enlarge the limit of loans to be made by County Auditors from \$300 to one person, the present limit, to \$600 or \$1,000; and if the money remains on hand a given time unloaned, direct its investment in State stocks. If the Commissioners of the Sinking Fund are authorized to loan that fund, extend their limit in like manner to \$1,200 or \$1,500.

Sixth. For the increased safety of the investment in stocks or bonds, provide that when a given amount of State stocks or bonds are purchased by the said Commissioners, say \$5,000 or \$10,000, that it shall be canceled, and new stock or bonds issued which shall not be negotiable or transferable, and have no value for any purpose but to secure the fund and the semi-annual interest thereon. See 4th section of 8th article of the Constitution.

Seventh. Define what kind of forfeitures are meant and intended by the provision in the second section of the eighth article of the Constitution, and provide for the better collection and paying over of them to the school fund. Define, also, what taxes on the property of corporations, that may be assessed for common school purposes, are meant and intended by the last sentence of the second section of the eighth article of the Constitution, and provide for the collection and paying over thereof to the school fund. See 2d section of eighth article of the Constitution.

Eighth. Provide a more summary mode of enforcing the liability of the counties for the preservation of the school fund entrusted to them, and for the payment of deficits of interest thereon. See 6th section of 8th article of the Constitution.

Ninth. Provide by law, in detail, for conveying the money derived from estates without known heirs, to the school fund in the county in which the estate is settled. See 2d section of 8th article of the Constitution.

If it is deemed best to adopt these plans, or any of them, the necessary form and details will be readily suggested, for the proper bills or amendments.

Plans for the increase of the school revenue have been presented in connection with the plan for increasing the length of schools.

THE MAGNITUDE OF THE SYSTEM.

A page here devoted to the magnitude of our present system of public instruction may not be void of general interest. Its proportions appear to me to be such as to commend it to the attention of the General Assembly, for the most wise and prudent legislation for the protection and advancement of its interests, and the more complete development of its resources, and the economical application of them to the great task of educating, up to a high standard, the 557,092 children of the State. The amount of money and property permanently invested in it, and the annual revenues which it absorbs for its support, may be stated as follows:

School Fund, permanently set apart by law.....	\$7,784,548
School Houses, lots, and property.....	4,098,423
Township Libraries, estimated value.....	210,000
<hr/>	
Total permanent investment.....	\$12,092,971

The annual revenue used for the support of the system is:

For tuition purposes.....	\$892,446
For special purposes and contingencies.....	449,402
<hr/>	
Total amount of revenue.....	\$1,341,848

The system is diffused and ramified into every community and neighborhood of the State, and in its educational efforts it contemplates including and reaching every child in the State within the school limits, numbering 557,092. If they are not all so included and reached, it is no fault of the system. The reports show, really, that but about seventy per cent. of the children enumerated are got into the schools. The complete diffusion into every minute social subdivision of the State into communities for school purposes, may, perhaps, be better understood by a few brief estimates, based upon the reports from the several counties. There are 33,809 square miles in the State of Indiana. There are 974 civil townships in the State, which, by calculation, are found to average a small fraction more than 34 square miles to each township. There are 7,981 schools in the State, reckoning the children of each city or incorporated town as forming but a single school.

This averages one school to every four and two-tenths square miles, and a fraction more than eight schools to a township, which schools average about seventy pupils each. The permanent investments for the schools amount, as above shown, to \$12,092,971, which is an average of \$21 to each child enumerated. The annual school revenue for special and tuition purposes amounted, for last year, to \$1,341,848, which is an average of \$2 40 to each child enumerated. There were, last year, as above stated, but seventy per cent. of the children enumerated admitted into the schools; and if this calculation is varied, so as to be based upon the number of persons actually admitted into the schools, the permanent investments for the schools will average \$31 per child admitted into the schools, and the annual revenue, special and for tuition, will average \$3 43 per child admitted into the schools. The permanent investments average \$12,415 per township, and per school \$1,515; and the annual revenue last year averaged \$1,377 to each township, and \$168 per school.

NUMBER OF SCHOOLS.

From the foregoing, it is evidently bad policy to increase the number of schools in a township beyond what are barely sufficient, because such increase in number is always at the expense of the length of school term of all the schools in the township. This is practically illustrated in many of the townships. Two townships, having about an equal number of children, would receive from the State about an equal amount of money for tuition. If one of these townships has six schools and the other twelve, the six can be kept in session about twice as long as the twelve can be. To be more explicit, I will mention two townships in Marion county. Washington township has 797 children enumerated, and fourteen schools, which were kept in session, last year, sixty days. Warren township has but eighty-one more children and nine schools, which were kept open 100 days last year. Thus Warren, with nine schools, has forty days more school each year than Washington has with fourteen schools, and the same apportionment per child. If the enumeration is compared with the number admitted into the schools, the ratio is higher in Warren than in Washington. The average attendance is also higher. This same defect in the policy of the trustees, which tends to make the schools shorter by increasing their number beyond the necessity for them, is manifest in

many of the counties. It is shown above that the townships average but about thirty-four square miles each, and that the schools average more than eight to a township of that size, or one to every 4 23-100 square miles.

Increasing the number of schools beyond what are really and practically necessary, is, as practiced in many townships, a very weakening element in our system. If the General Assembly should now double the amount of tuition revenue, with a view to furnishing eight months school instead of four months, and the trustees should double the number of schools, it would, in effect, leave us where we are now, as to length of school. It will, perhaps, be impracticable to reduce the number in townships where the houses are already built; but for the law to set reasonable limits to the number to be built in a township would, I think, be greatly protective of the interests of the schools. Of the 974 townships of the State, 400 of them have less than eight to the township, which is the average number. This fact further suggests the necessity of setting reasonable limits to the number to be built in a township. At an early day in the history of our present system, it was suggested that four schools to a township of six miles square would answer, and that six to such a township would be sufficient.

Limiting the number of schools in a township will do much good in the way of lengthening the schools, and in enabling the trustees the sooner to elevate one or two of the largest of them in the township to the condition of good graded schools, into which he can work forward the more advanced pupils from the primary schools of the township, where tuition can be furnished them in the higher departments of the graded school. It is better that the schools shall be large; the business of educating is much better and more successfully done, and much cheaper done, also, in large than in small schools. The reports show an increase of sixty new schools within the past year. The plan I have to suggest for the correction of the evil mentioned is, to provide by law that no township trustee shall establish more than six or eight schools in a civil township containing thirty-six square miles, and in that proportion in townships containing a greater or less number of square miles.

The present length of official term of township trustees is very generally regarded as being too short to enable them to successfully and economically manage the school matters of their townships. Their plans for building new school houses, making repairs, sup-

plying furniture and school fixtures, and for the levying and collection of special tax for these purposes, usually require more than one year for their performance; and the changing of the trustees in the midst of the working out of such plans, and leave them at that point to be administered and carried into effect or abandoned, as the case may be, frequently works a hardship to the retiring trustee, and embarrassment to the incoming one. It is suggested to extend their terms to two years, to correspond with the length of term of school trustees of towns and cities.

SCHOOL EXAMINERS.

When the present law in relation to the duties of school examiners was enacted, it was a matter of doubt with some of the members of the General Assembly, whether the increased powers which were by it conferred upon them, and the many additional duties which were required at their hands, would result beneficially to the schools. Such doubts, I believe, no longer exist. The friends of the schools, and especially those who were immediately connected with the administration of the school law, had realized the need of a more full and thorough county supervision of the school interests than could possibly be given to them by county auditors, in connection with their ordinary office business. The amendment of the law in this respect has been eminently satisfactory to teachers and school officers, and improving to the schools. The greater care and particularity practiced in examining and licensing teachers, the extensive visiting of the schools, and advising with trustees, directors and teachers, relative to their respective duties, tends much to elevate the character of the schools. It is, I believe, quite clear to those who have given the subject a little attention, that the common schools of the State were never in a more prosperous and successful condition than they have been for the past year. That they never accomplished so much in the way of instructing and educating, nor returned to the people of the State so much real utility in the direction of their proper objects, in any previous year of their history; and I attribute much of that prosperity, success and utility, to the supervisory labor of the examiners.

The compensation allowed to examiners is so small in amount, that in some of the counties they have not been able to visit all their schools in one year. At the time their compensation was

fixed, the enlargement of their powers and duties was regarded by some as an experiment which might not be successful or popular with the patrons of the schools, or of general utility to them, therefore it was thought that \$100 a year to each was as much as ought to be risked upon it, until its usefulness to the schools could be tested by experience. The test, now of nearly four years, has well established the usefulness and wisdom of the measure. In order to make their services more completely available for the improvement of the schools, their pay ought to be increased to a living point at least.

TRUSTEES OF INCORPORATED TOWNS AND CITIES.

Section five of the school law, contains a proviso which has produced some embarrassment. It can scarcely be regarded as a statutory provision for want of definiteness and completeness. It appears to aim at giving towns and cities the right to elect more than one trustee, but does not fix any number above one. It sets no time, it lodges no authority any where, with any officer or board, to determine the number. The practice under it is by no means uniform. In some cases one is elected, in others three, five, nine, &c. Our experience, in most cases is, that each increase in the number, above one, is at the expense of efficiency. It is, I suppose, an imperfection of the kind contemplated by section 128 of the school law, and the correction I have to suggest as appropriate, is to strike out the proviso, and the section will then provide for the election of one trustee.

AGRICULTURAL COLLEGE.

Agriculture with the people of Indiana is the leading interest. Its pursuits receive the attention and labor of a large portion of them. It now is, and must long continue to be, the great source of prosperity and wealth of the State. It is generally admitted that its great interests are here no further advanced than to a condition of infancy. That it needs the developing influences of knowledge and learning, and of the application of scientific research, to the working out and illustration, for the benefit of those who are engaged in its pursuits, the many processes and apparent mysteries, upon the full development of which its success in a

great measure depends. For this purpose, a College, specially adapted and liberally endowed, is needed. Such a college Congress appears to have had in view in making the liberal grant for endowment, and in applying to the grant the condition that it shall be inviolably appropriated by the State to the endowment of at least one college, where the leading object shall be to teach such branches of learning as are related to agriculture and the mechanic arts.

If such a college is to be endowed and put into operation in the State, will it not conduce largely to the interests of agriculture to establish in connection with it, and under the same trusteeship and general management, a good normal school? Thus teachers could receive, in the course of their preparation as such, a large amount of teaching in such branches of learning as are related to agriculture, the mechanic arts, and military tactics, and could convey much of such teaching to the mass of the people of the State, through the agency of the common schools. The teachings of such schools, and the interests and pursuits of agriculture, are almost or entirely co-extensive in Indiana. Therefore, by adapting, as far as practicable, the teachings of the schools to the development of those interests, and to the assistance of those pursuits, will conduce to the common good.

STATE UNIVERSITY.

This institution is in its usual flourishing condition. Its trustees have, within two or three years, perfected arrangements by which they have permanently opened its doors to the young men of the State, free of charge for tuition. It affords to such young men a rare opportunity for the accomplishment of a thoroughly classical or scientific education, under the instruction and training of a faculty of the finest culture and most liberal and generous sentiments. Professor Owen has recently placed his extensive cabinet in the University, which he very successfully uses in giving instruction in the department of learning assigned to him. This is an additional feature of great interest.

PRIVATE INSTITUTIONS OF LEARNING.

The many private institutions of learning in the State are understood to be in a condition of general prosperity. Most of them

have realized a measure of success, the past year, which has been equal to that of previous years. I had hoped to be able to present, in this connection, much valuable information, which would be of mutual benefit to the institutions, and to the people of the State. But sickness, during the time set apart to the duty of gathering up that kind of information in detail, has compelled its postponement. A tabular statement of statistics relative to most of them, as furnished by the School Examiners, will be found in the Appendix, Statement No. VII, to which attention is invited. It is respectfully suggested to amend the law relative to the incorporation of such institutions, so as to provide for annual reports to this office of such educational statistics as will be beneficial to the institutions, and interesting to the people, and do much towards correcting the erroneous impression which appears to prevail, to some extent, among our own people and abroad, as to the extent of educational facilities in Indiana.

GRADED SCHOOLS.

The statute provides that trustees may establish graded schools, or such modifications of them as may be practicable. This is a very salutary provision. The trustees have been advised that when a school becomes too large to occupy a single room, and to come under the management of a single teacher, to organize it as a graded school, or some modification of such a school, rather than to divide it and organize in another place a new primary school. By keeping the pupils together under one general management, but classified and assigned to suitable rooms and appropriate teachers, according to the grade of their attainments, they make more rapid progress, they become better educated, and it is much cheaper done. In revising the law, will it not be best to fix a limit at, or near which, the trustee shall adopt a modification of a graded school, rather than to divide it and establish a new school of the same grade? When a school is increased in number to a hundred or more in average daily attendance, or when it is so large that two teachers must be employed, the plan of a modified graded school can be profitably applied to it.

DESIGNATION OF TEACHERS.

The provision of the school law for the designation of teachers

by school meetings has been a fruitful source of embarrassment to trustees, and in many instances very damaging to the schools. A large per cent. of the difficulties which have been reported to this office for advice and adjustment, have arisen in attempts to designate teachers. The striking out of the law the provisions on this subject, and giving the employment of teachers entirely to the trustees, has been extensively advised by examiners, trustees, friends and patrons of the schools, who have witnessed the damaging influence of the attempts of meetings to designate teachers. If this provision is repealed, it is probable that the one which requires the dismissal of a teacher upon the petition of a majority of the persons who are entitled to vote at school meetings, and upon due notice and good cause shown, will sufficiently protect the people of the district from the continuance of a teacher who is generally obnoxious to them.

. FEMALE TEACHERS.

The reports for a few years past indicate quite a rapid change in favor of the employment of female teachers in the common schools. The proportion of female teachers employed and licensed in the State, has been, for the last five years, as follows:

1859—Employed.....	20 per cent.	Licensed.....	10 per cent.
1860—Employed.....	22 per cent.	Licensed.....	21 per cent.
1862—Employed.....	34 per cent.	Licensed.....	37 per cent.
1864—Employed.....	42 per cent.	Licensed.....	46 per cent.

We cannot reasonably conclude that this change has reached its maximum. We may, I think, expect that the next term of five years will exhibit an equal or greater change in the same direction. I do not mention this as cause for alarm for the safety of our system, or the success of our schools. It is rather cause for congratulation than alarm. It is not uncommon to find them to excel in all the qualities of good teachers. They are more likely to engage permanently in the business of teaching than young men are; and for this reason they will devote more attention to their preparation for teaching. On the subject of the fitness of young ladies to become teachers, and for their extensive employment in the common schools of the State, I will quote a few sentences from Hon W. C. Larrabee's first report as the head of this depart-

ment. They are equally as true and applicable now, as when they were written :

“Some persons seem to think females incapable of teaching and managing schools, so well as might be done by males. Very few, however, who have had experience in the practical process of common school instruction, or who have had charge of Seminaries and High Schools, for the education of males and females in promiscuous classes, will or can hesitate to give females the preference over males, as teachers of all primary and secondary schools. Both by talent and by disposition, woman is peculiarly qualified to be the teacher of childhood.

“That in native capacity to learn, to acquire knowledge, and to become intimately, thoroughly and extensively acquainted with all the branches usually taught in common schools, in academies, and in High Schools, females are inferior to males, is a notion wholly groundless. It is merely the result of prejudice, of opinions formed from careless observation, of conclusions founded on delusive premises and false reasoning. I profess to know whereof I affirm. I have been actively and laboriously engaged in teaching for more than thirty years. During the larger portion of that time, my pupils have been of males and females in nearly equal numbers. The classes in the common and the higher branches have been made up of both sexes, pursuing the same studies, using the same text books, and reciting at the same time, in the same room, to the same teacher, under the same discipline, and subject to equal chances for exhibiting their talents and attainments. And I have yet to learn that *intellect* is capable of sexual classification and distinctions. If there be any difference in the capacity of the sexes for learning, it is, so far as the branches required in the public, primary and secondary schools of Indiana are concerned, in favor of females. They are more *apt* to learn than males, more quick in their perceptions, more lively in their apprehensions, and fluent in their expression of thought. Nor are they usually deficient in capacity and patience to master the higher branches, and the more difficult and abstruse subjects. Some of the finest classical scholars I ever instructed were females. Some of the best mathematicians I have ever taught were females. The best algebraist that ever recited to me was a female, who had earned with her needle, in a tailor's shop, the means of paying her expenses, and educating herself for usefulness at the Academy. The best reciter of geome-

try I ever saw, was a fair young girl, of beautiful person and delicate sensibilities.

“Females are not only *apt to learn*, but they are peculiarly *apt to teach*. They seem designed and fitted by nature as the appropriate educators of childhood. They seem to comprehend by instinct and by intuition, the physical necessities, the intellectual wants, and the moral longings of children. And it seems their peculiar province to train, influence, and govern children. It is natural for them, their instinctive propensity to love, cherish, caress, amuse and instruct the young. And it is equally natural for children to love females, to yield to their influence, and to be persuaded by them to obedience.

“It is only a class of weedy, green, good for nothing boys, who entertain sentiments of disrespect for the instructions and influence of female teachers—boys, who seem to have forgotten that their mother was a woman—who seem incapable of the delicate sentiments which the society of virtuous and beloved sisters should always inspire.”

The extensive employment of young ladies as teachers, tends to lessen the cost of the schools, and consequently to lengthen their school terms. They do not generally ask or expect so high a rate of compensation as young men do. This may appear to be unjust, yet the fact exists, and it is our constant experience that young ladies very generally offer for employment as teachers, and accept such employment at the hands of the trustees, at rates of pay much below what would induce young men to accept the same employment. This practice is not, I believe, confined to Indiana, but is co-extensive with the human race, and extends to all employment which is equally adapted to both sexes. In Maine the compensation of male teachers per month is \$22 01, of female teachers \$8 76. In New Hampshire males \$18 35, females \$10 12. In Vermont males \$20 48, females \$8 16. In Massachusetts males \$41 71, females \$13 95. In Connecticut males \$26 02, females \$10 14. In Michigan males \$28 17, females \$12 42. In Iowa males \$21 76, females \$14 24. In Indiana males \$42 11, females \$27 72. From this statement of relative compensation in several of the States, we may conclude that it will continue to exist, and to operate as a reason for the extensive employment of female teachers in the common schools of the State.

REVISION OF THE SCHOOL LAW.

The hurried manner in which the revision of the school law was acted upon by the General Assembly, in 1861, left in it many inaccuracies and imperfections, and caused the displacement of some sections and omission of others; some of which render the provisions in which they occur, or to which they relate, nugatory and inoperative, or ambiguous. A careful revision and codification of the law relating to the common schools of the State is much needed. During my term of office, a very considerable part of the correspondence of the office has grown out of these imperfections and omissions, and when such correspondence has indicated the necessity for an amendment to the law, I have made it an object to note the defect and make the proper memorandum, so as to be able to suggest, to the proper committee, the amendment needed. For the purpose of rendering the school law more complete and practicable in its provisions, I shall be pleased to communicate any information in my possession which will tend to the furtherance of this object. To mention the needed amendments in detail, would be too tedious in this place.

Some other sections of the law, which have relation to the school system, need amendment so as to give them efficiency.

Section 7, page 10, 2d vol. R. S., needs amending so as to include all unclaimed fees, and money collected on forfeited recognizances; and a list of all judgments of fines, and on forfeited recognizances, should be reported to the county board, and with their report to the Superintendent of Public Instruction, such lists should be reported.

Section 21, page 500, same volume, needs amending to the same effect.

Sections 11 and 12, pages 14 and 15, same volume, needs amending so as to get the treasurer charged, on the books of the auditor, with the money received, and the auditor to loan the money.

Chapter 49, on page 316, 1st vol. R. S., needs a supplemental section, providing for reports of officers of private institutions of learning to Superintendent of Public Instruction.

Section 3, of chapter 43, page 303, 1st vol. R. S., needs to be so amended as to include the office of Superintendent of Public Instruction.

Section 12, chapter 37, page 292, 1st vol. R. S., needs to be amended so as to include the office of Superintendent of Public Instruction.

Chapter 93, Acts of regular session of 1861, page 171, needs amending so as to put the time of payment into the State Treasury to the first or second Monday in May. The April apportionment of school revenue is made on the fourth Monday in April, and time should be given to complete it, and to forward to Treasurers and Auditors a printed statement of such apportionment before they are required to pay the balance into the State Treasury.

TOWNSHIP LIBRARIES,

Next in importance in an educational point of view, to longer schools and better teachers, is the township libraries. They have been of vast utility to our educational system. They render the art of reading which is learned in the common schools, immediately and practicably available to the student, by furnishing within convenient reach, the means of the agreeable exercise of that art, in reading to the family circle, from some one of the many excellent works of the township library, greatly to the pleasure and profit of the family, and to the generous satisfaction and pride of the parents, who thus witness and enjoy the fruits of their efforts to educate their child. I will repeat here a sentence or two which was addressed to the Governor in the eighth report from this office.

"It is well known to all that the law which called into existence this excellent auxilliary educational force in this State, was limited in its operation to two years, and after the expiration of that limitation it was revived and again limited to one year, which last limit expired with the year 1855. By the operation of the library provision of the school law, even with the limitations above mentioned, there were very good libraries, which were respectable in their number of volumes, placed in every township in the State. Most of these libraries have been extensively used in connection with the schools, and have done much to enlarge the measure of general intelligence amongst the mass of our people, and to form habits of reading and studiousness in the young persons of the State, nearly all of whom have easy access to these libraries."

Very little complaint as to the policy of the State in furnishing school libraries to the several townships has ever reached me. The

most common complaint which is made to me in relation to them is for want of means to replenish the libraries with new and additional works, and to keep them in repair. In some of the townships I am informed that individuals have read nearly or quite every book in the library, and call loudly for more. The reports as to the number of volumes taken out of the several libraries within the past year is very defective, but enough is furnished to show that they are extensively used throughout the State.

“A permanent annual revenue, small when compared with the original revenue for that purpose, is much needed for the support of this feature of our educational system.”

The tenth of a mill on the dollar of property would produce a little more than \$50,000, which, if economically applied, would keep them in repair, and make respectable additions to them each year. The division of the libraries in many of the townships has, no doubt, been bad policy. If additions are to be made to them, I would suggest that the law should provide that such additions be made upon the condition that the trustee should furnish a suitable book-case for them, and bring the whole library together, under the immediate care of the trustee, or a suitable librarian whom he might appoint; and furnish a blank book suitably ruled, in which shall be kept an account of the books taken out and returned, and that a statement of the number shall be included in his annual report to the examiner.

I have been induced to discuss this subject to some extent, and to again urge upon the Legislature to make provision for reasonable, not large, annual additions to these libraries, and for the better care of them, under the full conviction that if such provision is not soon made, that they will mostly or entirely waste away and disappear, and the immense amount of money invested in them be lost to the State, and this powerful auxilliary educational agency will be lost also to the schools.

REPORTS OF SCHOOL OFFICERS.

The knowledge we get of the good or bad working of our school system, and of its magnitude, and general condition for usefulness, is derived mainly from the reports of school officers. The blanks for these reports, and the accompanying regulations for filling them up, have been revised from time to time, and simplified and reduced to an intelligible form, so that the proper officer, by a little

careful study of them, can fill them completely full, and with entire accuracy. A portion of these reports are found to be full and accurate, and in that respect reflect great credit upon the officers through whose hands they pass. Others are exceedingly deficient and inaccurate. There is no good reason for this. It is believed that all the trustees enumerate the children of their townships, towns and cities accurately, and report the same to the Examiner, because the apportionment of money to them is dependent upon such reports, and their fullness and accuracy are required to be sworn to. This is suggestive of the proper method of securing fullness and accuracy in the other reports. If the apportionment of tuition revenue to a township, town, or city, is made contingent upon full and accurate reports, and the money stopped until such reports are rendered, and the officer required to verify them by his solemn oath, as to fullness and accuracy, they will undoubtedly be made. Instead of saying such reports cannot be made, there will most assuredly be some way contrived to make them.

The State furnishes to trustees annually nearly a million of dollars to be expended by them for tuition in their respective townships, towns, and cities; and it is but right to require said officers to report fully, accurately, and promptly, all matters relating to the common schools, and particularly that which relates to the receipt and expenditure of said money. To say that a trustee cannot make such a report is to say that he cannot count the number of school houses in his township, town or city, or the number of teachers he has contracted with, or that he cannot state the rate of compensation he has agreed to pay to them, or that he cannot count the money which he received from the county treasurer, or that he cannot state these amounts in figures. I apprehend that no trustee is incapable of doing these things. A man of ordinary business qualifications can make out the statistical report of the trustee in less than half an hour. The reports show that one hundred and seven township trustees, and the school trustees of twenty-four incorporated towns, and of one city, failed to report the amount of tuition revenue apportioned to them within the last year. The amount of revenue which they have thus received and failed to render a report to the Examiner for, probably exceeds \$110,000. Instead of stopping this distribution of money until reports are rendered for what is already received by said trustees, we will have to furnish them as much more next year, on the same unsafe terms, unless the law is amended so as to cause said reports

to be made. There are one hundred and twenty-three school corporations from which no report was received of the average school attendance. There are one hundred and sixty-eight from which no report was received of the amount of special school revenue which was received or expended within the year. Many other omissions occur, which render the reports unreliable and very disappointing to those who consult them with the expectation of getting accurate accounts of the schools.

These reports are the only means of supplying to the Legislature and to the tax-payers of the State, evidence of what is done with the money paid and appropriated. The plan I have to suggest as the appropriate correction of the defects mentioned is, to stop the money until full and accurate reports are rendered. In revising the law, it will be easy to apply this much needed correction.

STATE BOARD OF EXAMINERS.

There is a feeling manifested among the teachers of the State, which has become very general with the older members of the profession, in favor of suitable provisions being made by law for the issuing of teacher's licenses, or diplomas, in accordance with such regulations as may be found to be expedient, such license to be good in any part of the state, and for the lifetime of the holder, unless revoked by the authority which granted it, upon due notice, and for good cause shown. It appears to be a very unnatural, useless, and burdensome requirement, that teachers, who are eminent in their profession, shall be required at short intervals, from six months to two years, to incur the trouble and expense of procuring a new license to teach. Such a requirement is not necessary for the good of the schools. The difficulty in the way of extending the limit of a teacher's license to the whole State, and to a longer time, is the want of a suitable Board of Examiners to conduct the proper examinations and grant the licenses.

The great object in providing for the issuing of such licenses should be to materially elevate the standard of qualifications of teachers for the common schools. The best literary and professional attainments, and high moral standing, should be required as conditions precedent to the granting of such a license. These qualifications should be determined by a critical and thorough examination of applicants for such licenses, by a competent board of exam-

iners, whose jurisdiction should be co-extensive with the state, and their powers and duties prescribed and regulated by law.

To authorize county school examiners to grant perpetual licenses to teachers would probably tend in a great measure to defeat the object in view, by making such licenses to issue as a kind of matter of course, and dependent more upon the length of time employed in the business of teaching than upon great efforts for literary, professional and moral excellence. The standard of qualifications for such a license should be held high, so as to induce applicants for examination to make great efforts to reach the point, and excell in all the requisites of good teachers. The proceedings for obtaining the license should be such as to satisfy all persons that it is the best of evidence of eminent professional ability, and as such is entitled to full respect.

A Board of Examiners, to which these duties might be safely assigned, might be formed of the State Superintendent of Public Instruction, and the superintendents of common schools of the four or six largest cities of the State. These are men whose attention is almost or entirely occupied with the common schools. They are brought into nearness with the best of teachers, and are in the constant practice of estimating and judging of their qualifications. There are no men in the State who would be more completely prepared to assume such duties. With a little consultation, the time of their meeting could probably be so fixed as not to interfere with their other duties. Such Board could, I think, with propriety and with great benefit to the school system, be charged with all the duties of the State Board of Education. They obtain the positions they occupy on account of their sympathy with the schools, and on account of their complete fitness to conduct and manage them.

STATE REFORM SCHOOL.

The second section of the ninth Article of the Constitution reads as follows:

"SEC. 2. The General Assembly shall provide Houses of Refuge for the correction and reformation of juvenile offenders."

At the session of the General Assembly for 1855, an act was passed authorizing and requiring the Governor, Treasurer of State, and Superintendent of Public Instruction, to purchase an eligible site for a House of Refuge or Reform School, for the employment, instruction, correction, and reformation of juvenile offenders, and

to procure, under certain limitations, plans, specifications, and estimates, for the necessary buildings for such House of Refuge or Reform School; and to prepare and mature a system for the management and government of such House of Refuge, and ascertain what laws will be necessary to put the same into successful operation. I am not aware that the officers mentioned have made much progress in the duties here assigned to them, beyond the purchase of a tract of land for a site for such House of Refuge or Reform School.

The necessity of such an institution in Indiana, I take for granted to be well settled. Juvenile offenders must be reformed by the generous efforts of the State, or when they become adults they must be supported at the expense of the State in the prisons, or otherwise punished for crimes. Whatever institution of this kind, for such a purpose, may be provided for by the State, must, of necessity, be educational in its nature, and may very properly be connected with the educational system of the State; and if so, the name Reform School, as used in the statute, would probably be more appropriate than House of Refuge.

There are institutions of this kind in several of the States in successful operation, working out a great measure of good, by the reclamation of many young offenders from idleness and crime to habits of industry and usefulness. The one in the State of Michigan, near Lansing, appears to be well adapted to the purposes of such an institution, and giving good satisfaction to its officers and to the State. A similar one would, I think, be equally well adapted to the necessities of Indiana. I, therefore, for the purpose of general information, copy a page or two from the descriptive part of the report relative to that institution:

"A farm of thirty acres belongs to the Institution, four acres of which are enclosed by a high board fence, and the building in front. Within the enclosure are located the shops and other buildings belonging to the Institution, except the barn and tool-house. Ten acres are under constant cultivation, on a portion of which is planted an orchard of two hundred and ninety-two thrifty young fruit trees, apple, pear, plum and cherry. The remaining sixteen acres are used as pasturage and lawn.

"The yard in front of the building, containing five acres, is surrounded by a neat picket fence, and laid out in drives and walks, and ornamented with trees and shrubs.

"The grounds enclosed by the high fence are devoted to the pleasure and comfort of the boys, on a portion of which a gymnasium is erected, which adds materially to their health and enjoyment.

"The center building of the house proper fronts west, and is forty-eight feet wide, fifty-six feet deep, and four stories high. There are two wings, extending north and south, each ninety-five feet long, thirty-three feet deep, and three stories high, excepting the towers at the extremities, which are four stories high. On the first or ground floor of the center building are a kitchen and dining room for the Superintendent, a store-room and laundry. On the second floor are a reception room, parlor, Superintendent's office and private room. On the third floor are rooms for the officers and employees. On the fourth floor is the chapel, suitably arranged, and furnished for seating four hundred persons.

"On the first floor of the north wing are the dining hall and wash room for the boys. Adjoining the dining hall, in a small addition, are the kitchen, bakery and boiler-room, the latter being also used as a laundry for the boys.

"On the second floor of the north wing are the hospital, medicine room, a dormitory, arranged for sleeping forty-two of the smallest boys, and bed-rooms for officers and employees. On the first floor of the south wing are a school room, seated for forty-two boys, an ironing room, and a tailor's shop. On the second floor are a large school room, capable of seating one hundred and sixty boys, two recitation rooms, and a library. The upper floors of the two wings are arranged with dormitories, and furnish separate sleeping apartments for one hundred and fifty-two boys. All the rooms in the building are warmed by means of stoves.

"A brick shop, twenty-five by eighty feet, two stories high, containing four rooms, has just been erected in the north-east corner of the yard, affording abundant room for the employment of eighty boys; adjoining which is an engine room, twenty by twenty-five feet."

This institution is understood to be of a capacity sufficient for the accommodation of two hundred boys. The number of its inmates at the date of last report was two hundred and seventeen. The annual expenses of the institution is about \$22,000. The officers and employees of the school are as follows:

Officers.

Superintendent.
 Assistant Superintendent.
 Four Teachers.
 Matron.
 Chaplain.
 Physician.

Employees.

Overseer of Tailor Shop.
 Overseer of Shoe Shop.
 Three other Overseers of Shops.
 Watchman.
 Teamster.
 Cook.
 Laundress.

Aggregate salaries of officers and employees, \$5,612 93.

SUPERINTENDENT OF PUBLIC INSTRUCTION.

The law contemplates that the Superintendent of Public Instruction, as the head of the school system of the State, shall, in accordance with the law on the subject, form, work out, adopt, and successfully carry into effect suitable plans for the establishment, organization, management, and government of the common schools; and for the regular carrying on and administration of the system of public instruction in such a manner as to accomplish by it, in an effectual manner, the objects of its creation. Such plans, in order to produce the greatest amount of success, in the management of the schools and administration of the system, cannot be limited to two years. The term of the office is limited to two years, which, in effect, sets a like limit to all plans for the management and administration of the business. Such frequent changes in relation to this important business, must, I think, strike all who have given attention to the subject, as being a very weakening element in our system. The most complete success of this great enterprise depends upon the wisdom of the plans for its management and administration, the permanency of the policy for applying them and carrying them into effect, and the uniformity and steadiness with which that policy is administered. One of the obstacles in the way of this complete success is the shortness of the official term.

Another obstacle in the way of success is the want of sufficient available force in this office to perform in a good, business-like manner the labors and duties of it. This report, for instance, has been made under the pressure of other important labors and duties, under the lash, as it were, at irregular intervals, which has compelled me to omit much which I would have been glad to present by way of argument or illustration.

At the close of my former term in this office, I invited the attention of the Legislature to these imperfections in the system, and suggested what appeared to be the appropriate correction of them, which suggestions are as applicable now as they were then, and are as follows :

First. Amend the Constitution so as to increase the length of the official term of the Superintendent from two to six years, to correspond with that of the Judges of the Supreme Court.

Second. Amend the law so as to provide for a Deputy Superintendent.

Third. Amend the law so as to provide for two clerks and a messenger for the department.

Fourth. Amend the law so as to put the Superintendent on an equal footing with the heads of the other departments as to compensation.

The Deputy Superintendent should probably be nominated by the Superintendent, and appointed and commissioned by the Governor. The duties should be so divided between the two officers, that one should take charge of all that part of the business which relates to the finances, keep accurate accounts of the school funds and school revenues, and apportion the revenues, and see that they are faithfully applied to the schools. The other should take charge of all which relates to the organization of the schools, their management and government, hold teachers' institutes, look after the interests of the normal school, if one is established, lecture, visit the counties and the schools, as far as practicable. Each one, with this division of labor, with his efficient clerk, would have enough to do.

It has been suggested by some trustees that the law should be so amended as to prohibit the use of the school houses for any other purpose but the common schools. In some communities the school houses are much needed at times for other use, which other use is often of great convenience to the community.

In closing my official connection with the cause of the common schools of the State, which I have loved most dearly, I have to express high hopes for their future success.

SAMUEL L. RUGG,
Superintendent of Public Instruction.

APPENDIX.

- I, II, III. Examiners' Statistical Reports by Townships, and Summary of said Reports by Counties, for August 31, 1864.
- IV. Apportionments of School Revenue for Tuition for April, 1863, October, 1863, April, 1864, and October, 1864.
- V. Tabular Exhibit of the amount and condition of the School Fund for March, 1864.
- VI. Condensed Statement of the number of persons Licensed as Teachers of Common Schools, for the year ending May 31, 1864, and names of Examiners.
- VII. Private Institutions of Learning of grade above the Common Schools.
- VIII. Comparative Statement relative to Enumeration of Children, School Revenue, and School Fund.
- IX. Average Length of School in the several Counties, for the year ending August 31, 1864.
- X. Statements of Examiners relative to Schools, condensed from their September reports, 1864.

STATEMENT NO. 1.

The County School Examiners' statistical reports to the Superintendent of Public Instruction, for the year ending on the 9th of September, 1864, can, on account of their great length, be more conveniently printed in tabular form by dividing them into three distinct statements.

Statement No. 1, gives the first twenty-seven columns of said reports, to-wit: the names and numbers of school corporations; the enumeration of children for school purposes; number of schools in each township; number of graded schools; pupils admitted to the schools in each township within the year; and average attendance, and teachers employed.

There is also appended to Statement No. 1, a summary for the whole State, by counties, for that part of said reports.

STATEMENT NO. 1.

NO. 1. ADAMS COUNTY.

No. of Township, Town or City.	Enumeration of children between 5 and 21 years of age.		No. of Districts in which a School was taught within the year.	No. in which no School was taught within the year.	Total number of School Districts in Township.	No. of Graded Schools in Township.	No. of Schools which are not graded.	No. Pupils admitted into School within the year.			Average attendance during the year.			No. of Teachers employed in the several Departments of the Schools within the year.						Whole No. of Teachers employed in the several Departments.
	Males.	Females.						In Primary Department.	Intermediate Department.	High School Department.	Primary Department.	Intermediate Department.	High School Department.	Males in Primary.	Females in Primary.	Total in Primary.	Males in Intermediate.	Females in Intermediate.	Total in Intermediate.

STATEMENT NO. II.

The County School Examiners' statistical reports to the Superintendent of Public Instruction, for the year ending on the 9th of September, 1864, can, on account of their great length, be more conveniently printed in tabular form by dividing them into three distinct statements.

STATEMENT No. II gives twenty-two columns of said reports, to-wit:—the average compensation of teachers, male and female, and of the several grades; the average length of school taught within the year; number of school houses built within the year, the number previously built, the material of which built, the estimated value of them, and of school house lots and other school property; and the total estimated value of all school property.

There is appended to Statement No. II. a summary, for the whole state, by counties, for that part of said reports.

STATEMENT NO. II.

NO. 1. ADAMS COUNTY.

No. of Township, Town or City.	Average Compensation per day of Teachers employed in the several Departments of the Schools.										Length of School taught within the year in days.	No. of School Houses built within the year and not before reported.	No. of School Houses previously built.	No. and kind of School Houses in Township, Town or City.				Value of Houses built within the year, including Seats, Decks, Out-Buildings, &c.	Estimated value of all other School Houses, including Seats Decks and Out-Buildings.	Estimated value of School House Lots, exclusive of Buildings.	Estimated value of School Furniture, Globes, Maps, Charts, Books for reference, &c.	Total estimated value of all School Property.	
	Males in Primary Department.	Females in Primary Department.	Of both in Primary Departments.	Males in Intermediate Department.	Females in Intermediate Department.	Of both in Intermediate Department.	Males in High School Department.	Females in High School Department.	Total in High School Department.

STATEMENT NO. III.

The County School Examiners' statistical reports to the Superintendent of Public Instruction, for the year ending on the 9th of September, 1864, can, on account of their great length, be more conveniently printed in tabular form by dividing them into three distinct statements.

STATEMENT No. III gives twenty-one columns of said reports, to-wit:—the amount paid out for tuition by Trustees within the year; amount of school revenue for tuition apportioned semi-annually to townships, towns and cities; amount of special school tax assessed, received, and expended, within the year; congressional township school lands remaining unsold; accounts of township libraries; amount paid to trustee for managing school matters; and accounts of private schools.

There is also appended to Statement No. III, a summary for the whole State, by counties, for that part of said reports.

STATEMENT NO. III.

NO. 1. ADAMS COUNTY.

No. of Township, Town or City.	Apportionment of School Revenue to Township, Town, or City.		Amount of Special School Tax assessed, received and expended within the year.				Congressional Township School Lands unsold.		Amount paid to Trustee for managing School matters.		Private Common Schools.									
	In May.	In October.	Total within the year.	Assessed on \$100 valuation.	Assessed on each Poll.	Amount received.	Amount expended.	No. of Acres.	Estimated Value.	Income from them within the year.	No. of Books in Township Library.	No. taken out for use within the year.	No. of Books added within the year.	Condition of the Library, Good, Tolerable, Bad.	Amount paid to Trustee for managing School matters.	No. of pupils admitted within the year.	Average length taught within the year.	Average attendance during the term.	Average cost Tuition per pupil per day.	Whole No. within the Corporation.

STATEMENT NO. X.

The following are condensed statements of Trustees, in relation to their school matters, in answer to a series of interrogatories addressed to them by the Superintendent of Public Instruction, as reported by the Examiners; which interrogatories are as follows, to wit:

Do you visit your schools each session?

How many school house lots are fenced?

How many are shaded with trees and shrubs?

How many have out-buildings necessary to a sense of decency?

How many school houses have blackboards?

How many have globes, maps, charts and books for reference, &c?

Are the schools well classified?

Are the authorized text-books used in your schools?

How many teachers fail in promoting interest and good order in and about the school room?

How many schools are opened by some religious exercises, such as prayer, reading the Bible, &c.?

What improvements have you to suggest for the better organization of the schools, or to facilitate your own duties?

What is the condition of the township libraries?

Do the patrons of the schools, and citizens generally, manifest an interest in the schools?

BENTON COUNTY.

There are twenty-six school houses in this county; seven only are fenced, four shaded by trees; six only have out-buildings necessary to decency; eighteen have blackboards, and eleven have globes and charts. Schools tolerably well classified. Nearly all fail in promoting interest and good order; few are opened by religious exercises. Patrons manifest little interest.

The Examiner suggests that all school houses be neatly finished, well furnished, necessary out buildings provided, fenced, and well shaded.

BOONE COUNTY.

Patrons generally take little or no interest in the schools. The libraries are in a poor condition; books little read. Trustees do not generally visit their schools.

CASS COUNTY.

The school houses are generally well ordered, and furnished with most of the necessary appliances for the comfort and advancement of the pupils. The system is working well accordingly as its vitality is developed.

BLACKFORD COUNTY.

The Trustees do not visit their schools; but few lots are fenced. All the houses have blackboards; three have globes and charts. The schools are not well classified. The authorized text-books are used. Two-thirds of the teachers fail in promoting interest and good order in and about the school room. But one is opened by religious exercises. The patrons generally manifest an interest in the schools. We want competent teachers.

CLAY COUNTY.

The Trustees suggest the want of more money for tuition—enough to keep the schools open six months. They want better teachers, and the means of paying them better. Teachers are not paid an equivalent for their labors and responsibility. The Director should be elected in April, to give him time to prepare for his duties. Trustees' term of office should be extended to two or three years; they would then render efficient service to the schools. Eighty-four school houses in the county; seventeen of them fenced; about half are shaded by forest trees; eleven have out-houses; seventy-seven have blackboards; all have maps; one-third have charts. Some Trustees say the schools are well classified—others say theirs are not, and others say they do not know. The authorized text-books

are used in the schools. Few failures in promoting interest and good order in and about the school room. None of the schools are opened by religious exercises. One hundred volumes of township libraries destroyed by fire; the others in good order. Patrons do not manifest much interest in the schools.

CLARK COUNTY.

A general lack of interest in the schools manifested by the people of the county. Eighty-seven school houses in the county; fourteen are fenced; twenty-two shaded with trees; twenty-nine only have out-buildings necessary to a sense of decency. All but two have black boards; seventy-six have maps and charts; two or three only, have globes and books for reference. About half the schools are well classified; about twenty-five use the authorized text-books—the balance use any kind for convenience. Four teachers are reported as failing to promote interest and good order in and about the school-room. Seventeen schools are opened by religious exercises. Teachers suggest that all the schools in the township be required to commence at the same time. Libraries are, four in good order, three in tolerable order, and three in bad order.

GREEN COUNTY.

The Trustees generally visit the schools; three or four school house lots fenced; most of them shaded by forest trees; about one-third have blackboards, all have globes, maps and charts, and books for reference; nearly all the schools use the authorized text books; teachers generally give satisfaction; two schools open by religious exercises; Trustees suggest not to change the text books so often; parents do not generally manifest much interest in the schools.

HAMILTON COUNTY.

The Trustees generally visit their schools; ten only have their lots fenced; some are shaded by trees; only fifteen have out-buildings necessary to a sense of decency; all have blackboards, nearly all have globes, maps, charts, and books for reference; the schools are tolerably well classified; a few of the teachers fail in promoting interest and good order in and about the school room; a few of the

schools are opened by religious exercises; one trustee says that prayers and the Bible are not known in his township; it is suggested that a better method of selecting teachers be adopted, give the employing of them to the trustees, without a vote of designation; most of the patrons manifest an interest in the schools; the examiner suggests that the county pay the examiner, and that the teacher pay nothing for license to teach.

HUNTINGTON COUNTY.

There are one hundred and two school houses in this county, four of which are reported fenced; most of the new houses are erected on the borders of the woods, and get the forest shade; the old log pioneers get the full benefit of the sun, most of them are without shade; twenty school houses furnished with out-buildings; there is such a pressing demand for new and commodious school buildings, that every secondary matter must give way until every district is furnished with them; nearly all the school buildings are furnished with blackboards, but not more than one in twenty are large enough, or made of the right material; about one-third are furnished with outline maps, and a few with globes; one-fourth of the schools are well classified, and nearly all use the authorized text books; about a fourth of the teachers fail in promoting good order and interest in and about the school room; near one-fourth of the schools are opened by religious exercises. In some localities, patrons manifest a good interest, in others not; there is much complaint that the school revenue is not sufficient, we can not hire such teachers as our schools demand for the meagre salaries we can pay; the most efficient teachers are leaving the profession for the simple reason that "it will not pay." The examiner suggests that until the schools are in session, the examiners ought to spend their whole time visiting the schools for the improvement of them in the use of improved methods, and out of teaching and lecturing, and be paid accordingly.

JAY COUNTY.

The reports of the trustees show a bad condition of the common schools; only a few of the school houses have out houses, shade trees or lots fenced; some have maps and school registers; a part of the schools have blackboards of small size; the trustees say a

longer term of office would enable them to make their services more efficient; and some of the trustees suggest that districts employ their teachers, and receive and expend their apportionment of the tuition revenue; the examiner expresses the opinion that the great drawback is a lack of sufficient revenue, and of good teachers.

JEFFERSON COUNTY.

Trustees do not visit their schools much. More than half the houses are without fences, and are poorly shaded. Nearly all have out-buildings, and are provided with blackboards; the most of them have maps; very few have globes. They are well classified, and use the authorized text-books. The art of teaching is being greatly improved; and most of the teachers succeed in keeping up an interest in their schools, and in preserving good order. The schools are generally opened with religious exercises. The defect of the system is that it does not furnish sufficient money to enable us to employ better teachers. Competent teachers cannot be employed for the price limited by a part of the Trustees. The patrons generally manifest an interest in the schools. In employing teachers, some of the Trustees look more to their cheapness than to their quality.

JENNINGS COUNTY.

The answers of the Trustees to the questions propounded to them, are very unsatisfactory and incomplete. Nine of the ten Trustees complain that the patrons do not visit the schools, or manifest an interest in them. Upon inquiry, I find that the Trustees are guilty of the same dereliction of duty in visiting the schools. One of the lawful School Fathers says, "Pay the Trustees for visiting the schools." Nine of the school houses have no out-buildings attached to them. "It is a shame!" How can a teacher preserve the morals of his pupils without the provision that decency requires? The Trustees are more or less careless about the condition of their schools, and the correctness of their reports. To infuse life and vigor into the schools, they should be frequently visited, not only by the Examiner, but by the Trustees and the patrons. Teachers' associations in each township, for their mutual improvement in the art and profession of teaching, and two for the county, we recommend.

KNOX COUNTY.

The Examiner says, the complaint comes to him that the Directors are careless, and take no concern about their school houses, because they receive no pay. They permit all kinds of gatherings and meetings to take place in them, and glass is often broken, benches and desks whittled, blackboards defaced, locks broken and other damage committed. Trustees suggest to pay Directors a salary, and make them responsible for all damages which occur through their carelessness. The Examiner suggests the repeal of the provision requiring teachers to pay for licenses. Let the county pay the Examiner an annual salary, say \$200, or what would be competent.

KOSCIUSKO COUNTY.

Trustees visit the schools when absolutely compelled. Very few school house lots are fenced, or have shade trees, or out-buildings necessary for decency; nearly all have blackboards, globes, maps, charts, and books for reference. They generally use the authorized text books; are poorly classified; a majority of the teachers fail in promoting an interest and good order in their schools. Very few, if any, of the schools have religious exercises. Very few of the Trustees know but little about the libraries, but say their condition is tolerable. Not much interest is taken in the schools by their patrons.

LAGRANGE COUNTY.

Trustees do not generally visit their schools. A few of the school house lots are fenced, and a few shaded; about one half have out-buildings; nearly all have blackboards; some have charts; none have globes; some Trustees insist on dividing the money among the districts and letting them do the best they can with it. Trustees say they would visit their schools if they got paid for it, but cannot afford to without. The Examiner suggests as a problem, how he can visit ninety-eight schools, twice a year, some of them twenty-five miles from where he lives, and attend to all the other duties of his office for one hundred dollars. The weak point in our school system is the required amount of unpaid labor in the supervision of the schools.

LAWRENCE COUNTY.

Very few of the Trustees visit the schools. Not many of the school house lots are fenced; six have shade trees; very few have out-buildings; most of them have blackboards; schools are tolerably well classified; and the authorized text books are generally used. Some of the teachers fail in securing an interest in their schools. Only three schools are opened with reading the Bible; nearly all the Trustees want better qualified teachers, and think them necessary. In very few of the districts is there any interest manifested in relation to the schools; they are seldom visited; Trustees appear to give but little attention to their school duties. Trustees elected specially for the schools would furnish better qualified men.

MARION COUNTY.

We want better school-houses, with larger rooms, well ventilated, finished and furnished throughout with everything necessary for the comfort, convenience, and advancement of pupils and teachers. There is a lack of facilities for teaching, in most of our school-houses, such as blackboards, maps, charts, globes, and books for reference. Much outside improvement is needed, such as fencing, shading, ornamenting the grounds, erecting suitable out-buildings, including good wood-houses and screens. Then, we want better teachers, and more strict and regular supervision of the schools by Trustees and Examiners. The standard of qualifications of teachers can be raised to a higher point, and their efficiency much increased. As a means for the accomplishment of this, Teachers' Institutes should be provided for by law, and teachers required to attend them, and their wages to be continued. The Institutes should form complete model schools, and exhibit all the improved methods of imparting instruction, and make the poorest teachers as good as the best. Regular school exercises should be a large part of their business.

I advise the establishment of a good graded school in every township, by the Trustee, according to the plan provided by the law. It would be a step in the right direction, and indispensibly necessary to the advancement of practical education. We need, as a part of our system of public instruction, a good Normal School, established on a firm basis, and supported by the State, for

the improvement of teachers, in the business and out of teaching, and to thoroughly fit them for their profession. Without such an agency, our common schools cannot possibly be supplied with the best qualified teachers. Teachers prepared by these agencies, and paid as they deserve to be, will make our schools what they ought to be. More revenue for tuition is necessary to the accomplishment of this end. Eight months school is needed; and we cannot have that with our present revenue, which is sufficient for but three or four months. It is, in the opinion of the Examiner, impossible for him to visit all the schools in his county for the pay allowed by law. The present compensation will not pay the traveling expenses which will be necessarily incurred in visiting all the schools in the county.

MIAMI COUNTY.

A part of the Trustees visit their schools; there are very few of the school-house lots fenced; many of them are shaded by forest trees; scarcely any of them are supplied with out-buildings; the most of them have blackboards, but very poor ones; none have globes; some have charts. This is all I can say from the meager reports of the Trustees.

MONROE COUNTY.

The Examiner expresses the opinion that, if his salary justified him to spend all his time in visiting and improving the schools in his county, he could make them worth to the people three times what they now are. There is great need of larger revenue for school purposes.

MORGAN COUNTY.

The Trustees, with one or two exceptions, visit their schools each session. But few of the school-house lots are fenced; none shaded, except by the natural forest growth. A few have out-houses; all have blackboards; but few have globes, maps, charts, or books for reference; generally well classified; and the authorized text-books are used in a part of the schools only. A majority of the teachers promote an interest and good order in and about their schools. They are not generally opened by any religious exercises. The li-

braries are in tolerable good order. The Trustees recommend increased taxation for tuition purposes. More revenue is wanted to make the schools interesting. Amend the law so as to admit no pupils into the common schools who are less than seven years of age; and further amend so that the Trustees have the designation as well as the employment of the teachers. The Examiner suggests that all persons who have had anything to do with administering the school law will admit that the amendments above mentioned would be an advantage to it.

PARKE COUNTY.

Only a very few Trustees visit their schools. We have one hundred and thirteen school houses in the county; ten of which only, are fenced; in one township, the Trustee reports all fenced. Most of them are shaded by forest trees; very few have out-buildings of any kind; in one township the patrons object to having any. Nearly all are furnished with blackboards; a few only with globes; and most of them with maps, and charts, and books for reference. They are well classified, and use the authorized text books. Teachers conduct and manage their schools well, and promote good order, &c. In some schools religious exercises are held, in others not. The condition of the libraries is said to be good in some of the townships, in some tolerable, in some bad. In some of the townships the patrons of the schools manifest a good deal of interest in them, and in others they manifest no interest whatever. Trustees say, give us more school revenue; enough for six months school at least. The teachers would do well in their schools if they would have a fair chance by a lengthened term of school. Elect separate Trustees for the schools, and for three years. The short term of one year renders the Trustee powerless for good. The Trustees should be better paid. The Examiner should be *de facto* Superintendent of Public Instruction for his county, and required to employ his whole time in the schools, when they are in session, and be paid accordingly.

The examination of teachers for license should be free, and the time of a first class license should extend during good behavior. The Examiner, with the assistance of the first class teachers of his county, should be required to hold at least two institutes in his county each year, from a week to a month sessions, for the improvement of the teachers, and especially for the improvement of

the second and third class of them. The Examiner advises to either dispense with the school tax altogether, and return the taxing power to the people, or give an income sufficient for seven months, at least, of common school in each year. Less than that will not be satisfactory. A contingent provision for extending them longer is recommended.

PERRY COUNTY.

Trustees generally visit the schools. About one lot in ten is fenced, and about one-fourth shaded; a portion of them have out-buildings—in some townships there are none. One-third has black-boards, maps and charts, and very few, if any, have globes. The schools are well classified, and nearly all of them use the authorized text-books. Several of them have religious exercises. Most of the teachers succeed well in promoting interest and good order in their schools. In some localities the patrons take quite an interest in the schools, and in others they take no such interest. Nearly all the trustees say, increase the school revenue sufficient for six or seven months' school, and compel students to attend regularly, under the penalty of being dismissed from the school for the current term. The trustees generally show an energy and interest in their school duties worthy of the cause.

PUTNAM COUNTY.

The trustees generally visit their schools a few times during their session. But few of the school house lots are fenced, and very few shaded or supplied with out-buildings of any kind. Nearly all have black-boards, and nearly all have outline maps and school registers. Schools are tolerably well classified, and generally use the proper text books. Nearly all the teachers succeed in giving satisfaction. Patrons manifest an interest in some localities, and in others none. Not half of the schools have any religious exercises at the opening of the school. The entire time of the Examiner should be devoted to the schools when in session, and paid for at a living rate.

RUSH COUNTY.

O'Brien Gwynne, Esq., Trustee of Ripley Township, in this

county, reports that he has taken great pains to put the school houses in his township in good order, and to suitably fit up the property connected with them, by fencing the lots, buiding out-buildings, planting shade trees, &c., until the property set apart for that purpose now presents a respectable appearance. The township has done its part of the undertaking for the common schools, by fitting up the school houses in a commodious manner; it now calls on the State to do its part by furnishing revenue to pay for a sufficient amount of tuition. Give us eight months school in a year, or relinquish the taxing power for that purpose, and restore it to the people for their exercise.

ST. JOSEPH COUNTY.

There are eight townships in this county from which I am unable to obtain reports. The Trustees pay no attention to my urgent requests and solicitations, and the requirements of the law, and the few who did report, did it so poorly, that they amount to but very little. They show that a very few of the school house lots are fenced, or shaded, or have out buildings; about half of them have blackboards, none of them globes, maps or charts. The authorized text-books are used in nearly all the schools. One school is opened with religious exercises. There is no interest in the schools manifested by their patrons. The examiner promises to see to it in the future that Trustee's reports are more full and correct, and thinks he will have personal interviews with them for that purpose.

SWITZERLAND COUNTY.

I suggest that the Director of each school be furnished with a copy of the school law. The circular from the department to the Trustees, I think will do much good. At present there is a great want of interest in the public schools, both by patrons and officers. Nearly all have blackboards; some have outline maps, small globes, Wilson's charts, &c. But there is scarcely an out-building belonging to any school house in the county, except at Vevay and Patriot. In some of the townships there is not a school house lot fenced, or a shade tree to be found. In several instances the township has no title to the school house lots which they occupy.

ANNUAL REPORT

OF THE

AGENT OF STATE,

OF THE

STATE OF INDIANA.

TO THE LEGISLATURE.

INDIANAPOLIS:
JOSEPH J. BINGHAM, STATE PRINTER.

1864.

1890

1890

PLATE NO. 101

PLATE NO. 101

REPORT.

OFFICE INDIANA STATE AGENCY, }
No. 36 WALL ST., NEW YORK, Nov. 17th, 1864. }

To the General Assembly of the State of Indiana:

In pursuance of law I respectfully submit the following report of the transactions of this office, ending on the 31st day of October, 1864.

I took possession of the office of the Indiana State Agency on the 25th day of February, 1863, at No. 36 Wall Street, New York, the place occupied by my predecessor, where the Agency still continues.

The attention of the General Assembly is respectfully directed to the introductory remarks of my predecessor, the Hon. R. N. HUDSON, in his report dated January 15th, 1863.

Mr. Hudson says:—

“The Change of the Public Debt, and the Abolishing of this Agency.

“By the law of 1846–7, the State of Indiana agreed with her bondholders to surrender to them her interest in the Wabash and Erie Canal, for one-half the public debt of the State. Under this agreement, the coupon bonds, then representing the indebtedness of the State, were, with a few exceptions, brought to this Agency, cancelled, and our present certificates of stock, under said law, issued in their stead. Under this fair agreement, made by the agent of the bondholders, and the proper authorities of the State, it was reasonably expected that *all* the coupon bonds of the State, embraced in the agreement, would be surrendered. This, however, has not been done, as will be shown.

“It was thus that the State debt became changed from coupon bonds to certificates of stock, and that it became necessary to establish this Agency. However wise this system was in the beginning, and up to the present time, it has answered its purpose, and if it can, without compromising the good faith of the State in any way, should be changed.

"The five and two and one-half per cent. certificates of stock of the State of Indiana, are 'redeemable at any time after twenty years from the 19th of January, 1846, *at the pleasure of the State.*'

"It might be advisable, therefore, for the Legislature, during its present session, to take some action in relation to this matter. The best thing for the State to do, if she can, is to redeem all her outstanding certificates by the 19th of January, 1866, and thus discharge her obligations to her creditors. As this, however, will, in all probability, not be done, an important question is, what is the next best thing to do?

"I would suggest the propriety of changing our certificates of stock, back to coupon bonds—or at least so much of them as the State will not be able to redeem by January, 1866—the law to go into effect on the first day of July, 1866, and the paying of interest on certificates of stock to stop after that date.

"As this would do away with the further transfer of certificates of stock on books kept for that purpose, this Agency should be abolished from and after the 1st day of January, 1867, as this would give sufficient time from the taking effect of the law, to change the entire debt of the State to Coupon Bonds. The coupons, afterwards held by the citizens of Indiana, should be redeemed at Indianapolis, and the remainder at some Bank in the City of New York. I can see no reasonable objection the holders of our certificates of stock can have to this, and certainly the interest of the State demands the change."

I most unhesitatingly approve of the recommendation contained in the foregoing extract, and, for the reasons suggested by my predecessor, advise that the General Assembly at the ensuing session provide for carrying those recommendations into effect. In doing this, the fact that many of the outstanding certificates of stock are fractional would have to be considered. I will take the liberty of suggesting that the Coupon Bonds which may be provided for should be issued in denominations of one thousand dollars each, and that any fractional sums which may be due to the holders of certificates be paid to them in money at the market value of such certificates.

There are still outstanding three hundred and fifty-three of the original bonds of the State, of one thousand dollars each. It would be fair to offer to exchange new bonds for these old ones on some equitable basis.

THE FRAUDULENT ISSUES.

The report of my predecessor, to which attention has already been directed, gives a history of what is termed the "Stover Fraud." Mr. Samuel Hallett, who is supposed to have used the fraudulent certificates of stock issued by Stover, is now dead, and the holders of such fraudulent certificates as were not surrendered to my predecessor, decline to surrender them to the State authorities. The amount of these fraudulent issues still outstanding is supposed to be about five hundred and fifty-eight thousand dollars. Fortunately, these fraudulent certificates of stock are not registered on the books of this office, and, as a consequence, are distinguishable from the genuine, and do not bind the State.

INTEREST ON THE PUBLIC DEBT.

The General Assembly of 1863 omitted to appropriate the monies necessary to pay the interest on the *five* and *two and a half* per cent. State stocks, which would fall due July 1, 1863, January 1, 1864, July 1, 1864, and January 1, 1865. Previous legislation had rendered it a felony for the Auditor of State to draw his warrant, or the Treasurer to pay out money from the State Treasury, except in pursuance of appropriations made by the General Assembly. In June, 1863, I made a requisition on the Auditor of State for the monies necessary to pay the interest on the *five* and *two and a half* per cent. State stocks which would fall due on the ensuing first day of July. Doubting his legal power to issue his warrant, the Auditor laid the subject before the Attorney General, who gave in opinion adverse to the right of the Auditor to issue a warrant in absence of an appropriation. The Auditor, very properly, declined to issue his warrant, whereupon parties interested applied for a mandate requiring him to do so. The question was carried to the Supreme Court of the State, and the action of the Auditor in the premises was sustained by that tribunal. As a consequence, I have not received any money to pay the interest on the *five* and *two and a half* per cent. State stocks during my term of office. The interest account has been properly carried forward on the books of the State Agency, and the holders of certificates are shown by such books to be entitled to their semi-annual installments of interest. The interest which will be due on the *five* per cent. stocks, on January 1, 1865, will amount to five hundred and

thirty-four thousand two hundred and fifty dollars, and on the *two and a half* per cent. stocks, one hundred and three thousand, eight hundred and twenty-three dollars and two cents, making in all the sum of six hundred and thirty-eight thousand, seventy-three dollars and two cents, which the General Assembly will be required to appropriate at the ensuing session. A banking house in this city, through an arrangement entered into by the Governor of the State, has paid the last three semi-annual installments of interest on the *five* and *two and a half* per cent. stocks of the State, taking from the holders of certificates orders on the State Agency for the moneys advanced, and Powers of Attorney to receipt for the interest on the books of this office when paid to such banking house by the Agent of State. It will be apparent, therefore, that it is necessary only for the General Assembly to appropriate, in the usual way, the moneys necessary to pay the back interest.

The interest on the *five* and *two and a half* per cent. State Stocks ceases on the 19th day of January, 1866. Assuming that no more of the original Bonds of the State shall be taken up, (and it is not probable that they will be,) the General Assembly will be required to appropriate at the ensuing session, \$281,223 26 for the payment of interest on the *five* per cent. stocks, and \$54,651 28, on the *two and a half* per cent. stocks, which will fall due July 1, 1865, January 1, 1866, and January 19, 1866. I will suggest that the General Assembly provide by law for the payment of the interest for the fractional nineteen days at the same time the interest due January 1, 1866, shall be paid.

By the terms of the law providing for what is called the "War Loan" a special tax has been levied, and a special fund provided to pay the interest and gradually absorb the principal of that debt. In view of these facts it was decided by the Attorney General that the law referred to, is, of itself, an appropriation of the monies collected through its provision, for the purpose of paying the interest and taking up the principal. I consequently made a requisition on the Auditor of the State for a warrant, and procured the warrant, and on it the money necessary to pay the interest on the War Bonds due May 1, 1863. In like manner I drew the money and paid the interest on War Bonds due November 1, 1863, and May 1, 1864. On the 5th day of October last, I made a requisition on the Auditor of State for the monies necessary to pay the interest on the War Bonds due November 1, 1864, not receiving the funds required, but supposing they were on the way, I commenced on the

first day of this month to pay the interest on the war debt. On the second instant I was informed that the money to pay the interest on the war debt then due had been transmitted by the Treasurer of State to a Banking House in this city, and that House was then engaged in taking up the coupons due on the War Bonds. By what process these funds passed from the State Treasury, without a warrant, I have not yet been apprised.

THE STATE DEBT SINKING FUND.

By the provisions of law, the Auditor of State, the Treasurer of State, and the Agent of State, constitute the Board of State Debt Sinking Fund Commissioners. It is provided that the surplus funds in the State Treasury, not otherwise appropriated, and monies derived from various specified sources, shall constitute the State Debt Sinking Fund, and such fund is specially appropriated to the purchase of the *five and two and a half* per cent. stocks of the State, which, when purchased by the said Board, shall be transferred to the Auditor of State for the use of the State Debt Sinking Fund. It is also provided, by a subsequent act, that the monies belonging to the State Debt Sinking Fund, together with the surplus monies collected by the special tax, shall be applied, first, to the absorption of the principal of the war debt when the Bonds could be purchased at a price not exceeding their par value. The surplus funds in the Treasury not appropriated being large, and in view of the probable depreciation of paper money, the State Debt Sinking Fund Commissioners deemed it advisable to invest a considerable amount in the War Bonds and Stocks of the State. They interpreted the different acts imposing this duty as authorizing them to purchase the *five and two and a half* per cent. Stocks at times when the War Bonds were not offered in the market at a price not exceeding the par value thereof. I have prepared a set of books in which a complete registry is kept of the Bonds and Stocks purchased by the State Debt Sinking Fund Commissioners. By reference to the details of this report it will be found that I have purchased in this city for the use of the State Debt Sinking Fund, thirty thousand five hundred dollars of the War Bonds, and one hundred and sixteen thousand five hundred and eighty-three dollars of the *five* per cent. State Stocks. The Auditor and Treasurer of State have purchased at Indianapolis two hundred and one thousand nine hundred dollars of the *five* per cent. State Stocks, and fifteen thou-

sand dollars of the *two and a half* per cent State Stocks. I expect to continue the purchase of the Bonds and Stocks, to a limited amount, from time to time, as favorable opportunities present.

STOCKS CONFISCATED.

By a decree issued by the United States District Court for the District of Indiana, dated March 19th, 1864, one hundred and nine thousand dollars of Indiana *five* per cent. stocks, belonging to Samuel Miller, of the State of Virginia, were condemned as aliens' property and ordered to be confiscated. In obedience to the orders of said decree the titles to the confiscated stocks were sold by the United States Marshal, at public auction, in the City of Indianapolis, and certificates of purchase were issued by the said Marshal of numbers and amounts corresponding to the stocks condemned. In further obedience to the orders of said decree the said certificates of purchase were received for and in lieu of the certificates of stock confiscated and cancelled, and new certificates of stock issued to the purchasers thereof. The following is a list of the certificates of stock so confiscated:

No. of Certificates.	Amount.	No. of Certificates.	Amount.
512for.....	\$12,000	1708for.....	\$ 3,000

ROBERT CHARLTON, M. D.

STEWARD.

W. M. FRENCH.

MATRON.

MRS. ELLEN BIGGER.

COMMISSIONER'S REPORT.

To the General Assembly of the State of Indiana.

GENTLEMEN :

We have the honor to submit to your consideration the following, as our report for the Indiana Hospital for the Insane, for the year ending October 31st, 1864:

The embarrassments consequent upon the failure of the last Legislature to make the necessary appropriations for the support of the Hospital were great, and for a time threatened to compel the closing of the Institution and the return of the Inmates therein provided with a home and needful medical attendance, to their respective counties, in many instances to be kept in Jails and Poor-houses. That this great evil, and disgrace to our State, was averted, is due solely to Gov. Morton, who, with that characteristic decision and energy, for which he is so justly noted, provided the necessary means for the support of the Hospital, which action entitles him to the highest esteem of every friend of the Institution, and Philanthropist.

We would recommend the amendment of the existing Law, allowing the Hospital to charge counties the sum of twenty dollars for each patient for clothing, in such manner as to require at least the sum of forty dollars to be so charged. The greatly increased cost of all articles of clothing, will, we think, explain to your Honorable Body the necessity for this change.

At first glance it may seem that the expenses for the past year, as shown in the Superintendent's report, have been large, but we think a careful investigation, and a comparison with the expenditures of the year immediately preceding the breaking out of the existing Rebellion, taking into consideration the greatly increased cost of all articles consumed, at the present time, will show that instead of an increase, there has been effected a very considerable reduction in the cost of the support of the Institution. The

total expenditures for the year ending October 31st, 1861, were \$41,110 28; those of the year ending October 31st, 1864, have been \$54,756 87, showing that while the price of all supplies needed for the Hospital has advanced from one hundred to four hundred per cent., the expenses of the Institution have increased but about thirty per cent.

For all details of the management of the Hospital, and of its necessities for the ensuing two years, we would respectfully refer your Honorable Body to the report of our excellent Superintendent, herewith accompanying, calling your attention particularly to the necessary repairs, improvements, and furniture, requested by him, which we consider of paramount importance. The repainting and furnishing we consider very necessary, the former as a measure of wise economy, needed for the preservation of the buildings, and we would urge your Honorable Body, most respectfully, to make the appropriations asked for, for those purposes.

We also recommend an appropriation for enclosing the Hospital grounds with a suitable fence, so as to permit the patients free exercise in the open air, experience having shown that nothing is more conducive to their speedy recovery.

We respectfully ask that an appropriation of the sum of \$60,000 per annum be made to meet the current expenses of the Hospital. At present high prices this sum, we think, is as small as we can safely assume to be necessary.

It will be recollected that the appropriations for the same purpose in the years 1861 and 1862 were \$35,000 per year, since which time prices have increased more than one hundred per cent.

During the past season considerable inconvenience has been experienced on account of an insufficient supply of water. The Artesian well, which was commenced some years ago, has been sunk to the depth of near two hundred feet. An appropriation of five hundred dollars will probably be sufficient to complete the well. The experiment is one that commends itself to your consideration. We respectfully recommend the making of this appropriation.

This, with the appropriations asked for by the Superintendent for repairs, furnishing, &c., is all that is necessary for the carrying on of the Hospital, with its present capacity. We would request, however, your earnest attention to the subject of its enlargement, so fully discussed by our Superintendent in his report, and hope your Honorable Body will see the necessity we labor under of having

more room, in which case, appropriations for building will, of course, be necessary.

We take great pleasure in commending to your Honorable Body the faithfulness and efficiency of Dr. J. H. Woodburn, our worthy Superintendent. His duties have been arduous, and highly responsible, and have been performed, by him, with a degree of cheerfulness, energy and skill meriting the highest praises. The Assistant Physicians, Drs. James F. Cravens and Robert Charlton, have discharged their duties to the entire satisfaction of the Board.

The Steward, Wm. M. French, Esq., and the Matron, Mrs. Ellen Bigger, have both done their parts in a manner highly creditable to themselves and profitable to the Institution.

We trust your Honorable Body will continue that liberality towards our Institution which has characterized the action of former Legislatures, and that the Insane of Indiana may always be provided with whatever is necessary to life, health and restoration to reason.

Very Respectfully,

ANDREW WALLACE, *President.*

JOHN W. MOODY, }
P. H. JAMESON, } *Commissioners.*

Attest,

T. A. LEWIS, *Sect'y.*

SUPERINTENDENT'S REPORT.

To the Board of Commissioners :

GENTLEMEN :—

The Sixteenth Fiscal Year of the Indiana Hospital for the Insane has been accompanied by financial embarrassments even in increase of those that created so much apprehension during the Fifteenth Fiscal Year. The moneys used for salaries and wages, in the purchase of stores for the Institution, in keeping up repairs, and in making the few necessary improvements, came from a like source, and through the same channel, as in the year last past. Every good citizen must gratefully recognize the deep obligations he is individually under to Gov. O. P. Morton, for the considerate care and irrepressible energy with which that official determined upon, and carried out, the continuance of this and the other benevolent Institutions of the State, in spite of the failure of the Legislature to make one dollar of appropriation for such purposes.

For each and every blessing that accompanied us and the Institution during the year—for the blessings of life, bodily health, and restorations to sanity, and material prosperity—we would ascribe thanks unto the Great Dispenser of Good and Supreme Ruler of Events.

I would refer you to other portions of my Report, as well as to the Report of the Steward, for full and detailed exhibits of receipts and expenditures.

The following synopsis exhibits, in brief, the history of the patients during the past year.

Detailed statistics of the Hospital since its organization will be found in the Appendix.

HEALTH OF THE HOSPITAL.

We have great reason to be thankful to the Dispenser of all good, for the continued health of the household. No epidemic disease has afflicted us. The health of the inmates has been as good as is usual for Institutions of this kind. Only about three per cent. of the whole number of patients under treatment have died; and when it is remembered that so many cases of violent mania are admitted here who are liable to die of exhaustion, and the large number that are admitted with broken-down constitutions, the percentage of mortality is certainly not disproportionate.

BUILDINGS AND GROUNDS.

Owing to the lack of appropriation, and the high prices of labor and materials, many repairs and improvements have been necessarily postponed. The buildings are about in the same condition they were at the date of our last Annual Report.

The improvements on the grounds have been continued. Roads have been made and repaired. The old garden in front of the house has been vacated and seeded down for a lawn. Owing to the lack of money, we were very near being compelled to suspend the ornamenting of the grounds; but Calvin Fletcher, Jr., of Indianapolis, kindly proposed to furnish all the shade-trees and evergreens that might be needed, and not call for payment till the Legislature should make a special appropriation for the same. His account is \$359 35.

FARM AND GARDEN.

Although the season has been remarkably dry, by care and industry the farm has produced a sufficiency of feed for the stock to carry them through the coming winter.

The new garden has furnished vegetables enough to supply the house till the next season, with the exception of potatoes—owing to the severe drouth, that crop has not been more than one-third of what is usual in a good year, and we will therefore have mainly to depend on purchase.

For further particulars I would refer you to the Steward's Report.

FAILURE OF WATER.

During the entire summer we have been very much troubled to procure a supply of water. Owing to the drouth, the large well at the engine house failed, and we were compelled to spend much time and labor in deepening it. Although the bottom of the well is now as low as the bed of Eagle Creek, it does not afford more than half the necessary quantity of water.

If our wells in this Country continue to fail as they have been doing for the last two or three years, we will have to look to some other source of supply.

DOMESTIC DEPARTMENT.

The usual amount of work in the Domestic Department has been cheerfully accomplished.

I would direct your attention to the Matron's Report for particulars.

LIBRARY.

This valuable agent in the treatment of the Insane, is about in the same condition in regard to number of volumes as last year. Only a few additions have been made, in the aggregate about equaling the number destroyed by unruly patients. Shall we not look for large donations of books from the friends of the Institution during the year to come?

ANOTHER APPEAL FOR MORE ROOM.

Believing the number of Insane in the State was under-estimated, and desiring to obtain correct information in relation thereto, I issued a circular to all the County Sheriffs, early in July of this year, in the following words:

CIRCULAR.

INDIANA HOSPITAL FOR THE INSANE, }
INDIANAPOLIS, Ind., June 24th, 1864. }

To the Sheriff of ——— County:

It is a well known and deplorable fact, that the three hundred

patients provided for at the Indiana Hospital for the Insane, is but a small portion of the Insane of the State. The utmost capacity of the Hospital buildings, at present, is two hundred and eighty in the warm seasons, and three hundred in winter. For many years, the Board of Commissioners have been compelled to discharge chronic and unimproved cases to make room for more recent cases, or more dangerous patients. In the five fiscal years last past, two hundred and seventy-seven patients have been discharged unimproved. The majority of this number were chronic cases.

An earnest endeavor will be made to induce the approaching Legislature to make an appropriation for the speedy erection of more wards.

To bring before it the most convincing facts of the necessity of those increased accommodations, it is the desire of the Board of Commissioners to submit to that body a full and complete census of the Insane of our State; and to this end the Superintendent would most respectfully urge upon you, Sir, the prompt and careful filling up of the enclosed form, and its speedy return to him in the accompanying stamped envelope.

Very respectfully and truly yours,

J. H. WOODBURN, *Superintendent.*

————COUNTY, INDIANA.

- 1st. The number of Insane confined in the County Jail, is. ———
- 2d. The number of Insane confined in County Poorhouse, is ———
- 3d. The number of Insane provided for by relations, and confined at home, is. ———
- 4th. The number of Insane running at large, is. ———
- 5th. The number of Insane sent from the State to other Institutions, is. ———

(Signed) _____

Sheriff ——— Co.. Ind.

———— 1864.

Only about one-half of the counties have been heard from; but, assuming that those not answering are proportionately in the same condition as those that have returned the circular, the following list would give the number of the Insane in the State, and the manner in which they are provided for:

- 1st. The number of Insane confined in County Jails. 22
- 2d. The number of Insane confined in County Poorhouses.. 300

3d. The number of Insane provided for by relations, and confined at home.....	288
4th. The number of Insane running at large.....	112
5th. The number of Insane sent from this State to other Institutions.....	12
Add the number of Insane in this Institution.....	295
Aggregate number.....	1,029

Let it be remembered, however, that this number is only an approximation to the truth, as a majority of the older and more populous counties have failed to send back the circular. I am satisfied that the number would be much larger, if we could get the exact figures.

Again, it is probable that no one can get the correct numbers, as many families, when the cases are mild, prefer to conceal the fact. Therefore, I conclude that nearly all that have been reported are either violent cases, or old and confirmed patients.

According to the eighth Census of the United States (1860) there were in the State of Indiana 1,035 Insane persons (not including Idiots). Since that time there have been admitted into this Hospital 657 recent cases, about 371 of whom have recovered—leaving 287 to be added to the Census list, which makes the sum total of 1,322. It is presumable that no one, when these facts are known, will persist in the opinion that the demand for additional Hospital accommodations, which has been made from year to year, has been premature.

The original plan of the Hospital embraced a North Wing, containing wards for the accommodation of about one hundred patients. This portion of the building has never progressed further than the digging of the foundation trenches.

It is more doubtful now than ever, whether the simple completion of this wing, always much needed, would afford adequate accommodation for even pressing applications of recent cases.

Since the outbreak of the Rebellion, an extraordinary "exciting cause" has sprung up. The loss of husbands, fathers, sons, brothers, and other dear ones, on the battle-field, or by the more lingering death in hospitals or in the rebel prisons; the ruin of private fortunes, breaking up of families, and all those other dreads, anxieties and melancholy results which accompany the feverish condition of a country at war, have already augmented insanity.

These effects, it is well judged, will not cease with the immediate cause, but will continue for years after peace may come to bless.

This is but a single argument in favor of the increase of Hospital accommodations.

Let it be remembered that Insanity is a disease from which no class is exempt. The rich and the poor, the educated and the ignorant, the virtuous and the vicious, are all alike liable to be stricken with this the worst of human ills.

Can it be possible that Indiana, with all her patriotism and philanthropy, her churches, schools, and colleges—with her largely increased population, which is now over one million and a half—with her wealth, now fully seven hundred millions dollars' worth of property,—that she will fail to provide for her unfortunate insane, whilst her sister states, many of whom have not as much wealth and are not equal to her in population are outstripping her in this good cause.

If our Legislature, in its wisdom, would but levy a special tax annually of 15 cents on every one thousand dollars' worth of property, a revenue would be realized equal to one hundred and five thousand dollars. This amount, in six years, would provide ample Asylum room for this class of our citizens, which, we think, we have shown to be so largely in excess of proper accommodations. Is there a tax-payer in the State so meanly avaricious as to complain at paying so light a tax, fifteen cents a year on each one thousand dollars' worth of his property, for so humane and benevolent an object? Can the people of our noble State remain quiet whilst one thousand of our afflicted fellow-citizens are confined in Jails, Poorhouses, or hovels—many of them chained to the floors of their cells, and living in their own filth, shut out from the light of day, and never allowed to breathe the free air of Heaven,—when such a small pittance would furnish them appropriate and comfortable homes?

At least ten per cent. of this number would be restored to reason, and returned to their families, if they could be placed in well regulated Hospitals, where they could have the necessary medical and moral treatment suited to their individual cases. The appeal for "more room" has become so hackneyed that nothing but the urgent demand, and our inability to ignore the want, could prevent us from omitting all reference to it in this report. From year to year this complaint has been made, and no relief granted; but it is to be

hoped that the coming session of our State Legislature will provide adequately for all of this unfortunate class. Indiana is now the fifth State in the Union, both in wealth and population. The property of the State, if divided equally, would give to every man, woman and child, about four hundred and sixty-five dollars, and to families of five persons twenty-three hundred and twenty-five dollars each. It is, therefore, evident that a refusal on the part of the Legislature to levy this tax can not be excused on the grounds of inability of property-holders to pay the same.

NECESSARY REPAIRS AND IMPROVEMENTS.

I would suggest the following work necessary to be done the coming season:

The wooden cornice and window frames should be re-painted, to prevent them from being entirely destroyed by the weather. All of the wood work inside the house greatly needs re-painting.

Three of the wards need new floors.

The ceilings in two of the wards need to be re-plastered.

The heating apparatus should be repaired and improved.

The old engine house should be torn down, and in its place a building for the purposes of kitchen, bakery, laundry, sewing-room, and chapel erected.

The north wing, according to original design, should be commenced.

The house, also, needs much new furniture, to re-place the old and rickety articles that we are now compelled to use.

APPROPRIATIONS.

There should be the sum of \$4,000 appropriated for re-painting the house.

For repairing and improving the heating apparatus it will require \$4,000.

To erect building for kitchen, bakery, laundry, sewing-room and chapel, the sum of \$30,000 will be required.

To re-lay floors in three wards, and re-plaster the ceiling in two wards, and other necessary repairs, it will require \$2,000.

To purchase new furniture, \$4,000 will be necessary.

The expense of erecting and finishing the north wing would probably be about \$100,000.

Owing to the high prices of dry goods, groceries, provisions, fuel and labor, the sum of \$60,000, should be appropriated for current expenses for the year 1865, and 60,000 for the year 1866.

FINANCIAL CONDITION.

Owing to the extraordinary high prices of dry goods, groceries, provisions, fuel and labor, the expenditures of the Hospital have greatly exceeded former years; but when it is remembered that all of the above have been from one hundred to four hundred per cent. higher than the prices that were paid three years ago, certainly no one will judge that the finances of the Institution have been managed extravagantly.

The following brief abstract exhibits the financial condition of the Hospital during the year past:

RECEIPTS.

Balance in hands of Steward, Oct. 31, 1863.....	\$81 74
Clothing account filed with Treasurer of State.....	5,915 50
Received of Governor Morton.....	47,709 63
Received of State Treasurer, on salary.....	1,050 00
	<hr/>
	\$54,756 87

EXPENDITURES.

For current expenses.....	\$46,430 87
For clothing.....	4,940 00
For repairs.....	1,735 75
For furnishing.....	1,650 25
	<hr/>
	\$54,756 87

Cost per week of each patient, exclusive of clothing, repairs and improvements, \$3 08.

There is an unsettled account in favor of John Carlisle, for \$3,939 02, for flour and feed furnished the Institution in the last two years: but in lieu thereof, there is now on hand, and paid for, about \$4,000 worth of fuel. As these items very nearly balance, the abstract of expenditures above remains essentially the same.

I would suggest that you request the Legislature to amend the law limiting the clothing of patients to \$20 a year, so that we may

be allowed to charge \$40, which latter sum would not be more than sufficient to cover the actual expense.

ACKNOWLEDGMENTS.

To Edwin May, Esq., of Indianapolis, for one bundle pictorial magazines.

To Mrs. Dr. Elliott, of Indianapolis, for one bundle of illustrated newspapers.

To Dr. H. H. Rosengarten, of Indianapolis, for one bagatelle table, worth \$100.

To Clark Deval, Esq., of Lebanon, for \$200; which was expended for one bagatelle table, one fire-proof safe, and in books for Library.

To Mrs. H. H. Rosengarten, of Indianapolis, for one music-box and table.

To Robert Furnas, of Bridgeport, for six bibles.

To Isaac Lamb, Esq., of Richmond, for \$100, which was expended in chairs for the wards.

To Prof. Benj. Gresh, of Indianapolis, for one musical entertainment for the patients.

To Isaac E. Johnson, Esq., of Indianapolis, for \$100; which was expended in furnishing goods.

To Wm. M. French, Esq., Steward of the Hospital, for six copies of the "Life, Public Services and Speeches of Gov. O. P. Morton."

To the publishers of the following newspapers and periodicals for sending their issues during the past year:

Indianapolis Daily State Journal.....	Indianapolis.
Daily New Albany Ledger.....	New Albany.
Democratic Pharos.....	Logansport.
Ladies' Repository.....	Cincinnati.
Friends' Review.....	Philadelphia.
Lafayette Weekly Courier.....	Lafayette.
Christian Record.....	Indianapolis.
Presbyterian Banner.....	Pittsburg.
Presbyter.....	Cincinnati.
North Western Christian Advocate.....	Chicago.
Shelby Volunteer.....	Shelbyville.
Herald and Era.....	Indianapolis and St. Louis.
Parke County Republican.....	Rockville.
Marshall County Republican.....	Plymouth.
Fort Wayne Sentinel.....	Fort Wayne.
Clay County Democrat.....	Bowling Green.
Bluffton Banner.....	Bluffton.
American Messenger.....	New York.

Witness.....	Indianapolis.
Sullivan County Democrat.....	Sullivan.
Vincennes Sun.....	Vincennes
Madison County Republican.....	Anderson.
Noble County Herald.....	Ligonier.
Western Christian Advocate.....	Cincinnati.

We would also tender our thanks to the clergymen of the various Christian denominations for many instructive sermons, preached in the Hospital chapel during the year.

I would also render my acknowledgments to the officers and employees of the Institution, for the performance of their arduous duties, in so far as they have been faithful to the same, which, I am happy to report, has been the case, except in a very few instances.

In conclusion, gentlemen, I would respectfully solicit for the Institution your watchful care and oversight.

J. H. WOODBURN,
Superintendent.

INDIANA HOSPITAL FOR THE INSANE, }
November 1, 1864. }

STEWARD'S ANNUAL REPORT.

ANNUAL REPORT

OF THE

AUDITOR OF STATE,

OF THE

STATE OF INDIANA,

SHOWING THE RECEIPTS AND DISBURSEMENTS OF THE TREASURY DEPARTMENT FOR THE FISCAL YEAR
ENDING OCTOBER 31, 1864.

TO THE LEGISLATURE.

INDIANAPOLIS:
JOSEPH J. BINGHAM, STATE PRINTER.

1864.

OFFICE OF AUDITOR OF STATE, }
Indianapolis, Nov. 1, 1864. }

To the General Assembly:

I have the honor to present to the General Assembly the following report, showing the receipts and expenditures of the Treasury Department for the year ending October 31, 1864, which, with the report made to His Excellency, the Governor, at the close of the fiscal year, 1863, will show the operations of this Department for the last two years, and exhibit the condition of the finances, revenues, taxables, funds, resources, incomes, and property of the State.

J. RISTINE,
Auditor of State

Five per cent. Deferred Canal Stock.

There is outstanding of this Stock the same as reported last year..... \$1,263,000 00

Five per cent. Deferred Special Canal Stock.

There is outstanding of this Stock the same as reported last year..... \$506,770 00

GENERAL REMARKS.

The balance remaining in the Treasury at this date,
as heretofore stated, is..... \$1,241,888 67

There is due—

To the Swamp Land Fund	\$71,406 56
To the College Fund	8,855 83
To the Saline Fund	33,536 09
To the Bank Tax Fund..	22,947 00
To the Congressional Towns'p Fund	347 50
To the Surplus Revenue Fund.....	673 05
To the Three per Cent. Fund.....	32 13
To Fund from Estates without heirs	5,899 61
To Common School Fund.....	145,579 50
To State Debt Sinking Fund	501,163 49
	790,372 76

Leaving the sum of \$454,515 91

in the General Fund, after providing for the entire aggregate of the balance due the several Trust Funds.

By a comparison of the present with the last year's report, made from this office, it will be seen that there has been paid within the last two years, of the debt due the Common School Fund, the sum of \$137,636 34. The law provides that there shall be paid annually, out of the General Fund, the sum of \$50,000 upon this debt, and this amount the Superintendent of Public Instruction added in his various apportionments; but owing, doubtless, to differences in the reports of county officers to the respective offices, the amount actually paid to the Fund is in excess \$37,636 34, as stated. An act of 1845 authorized a distribution of the Saline and Bank Tax Fund to the the several counties, according to the number of polls therein; but since 1853, owing, during the first year, to other more pressing calls upon the Treasury, and subsequently to an expectation that the Legislature would direct the apportionment of this part of the Common School Fund in accordance with the manner in which other portions of the Fund are

distributed, namely, according to the number of school children in such county, no general distribution has been made. There still remains outstanding on loan small amounts of these funds.

I suggest the passage of an act authorizing the distribution of the balance on hand, as above suggested, and of the amounts outstanding, as soon as collected, or that the same be loaned out as College Funds are loaned.

The apportionment of real estate made this year in pursuance of law, exhibits the gratifying evidence of the increasing prosperity of the State. The real estate, with the improvements, as assessed this year, amounts to the sum of three hundred and twenty-nine millions, five hundred and ninety-nine thousand, one hundred and sixty-four dollars (\$329,599,164), while in 1859 the appraisement reached but \$297,990,696, showing an increase of \$31,608,468. Adding to this the appraisement of railroads and there is an aggregate of about \$338,000,000 of real estate subject to taxation.

Upon the subject of railroads, as there seems to be much difficulty arising out of the mode through which they are valued, a suggestion upon that subject is thought worthy of consideration, which is, that the valuation of that species of property be appraised annually, by the auditors of the several counties through which each line of road passes. For the purpose of having concert for such object, the Auditor of State should have the power to fix the time and place for such action; and that said Auditor of State be made a member of such board and acting as president thereof. After the several assessments have been so made, some one auditor, selected by the auditors along the line of road, should be appointed to attend at the Capitol, at such time as may be fixed by the said Auditor of State, then and there to equalize any apparent unjust and unequal appraisements.

That portion of the reservation of lands lying within the limits of the city of Indianapolis, south of the cross cut of the Central Canal and west of West street, is forcibly held by the present Canal Company on a pretended right in the purchase of the Canal. This office has exhausted all outside of a resort to litigation to settle this question; hence, feels it essential to the interests of the State to call the attention of the General Assembly to this case.

Since the purchase of the farm by the State for the purpose of establishing a House of Refuge, for the care and improvement of those who have no protectors and are left to the allurements of

vice, although the Constitution imposes the duty upon the State to provide such an institution for the benefit and improvement of this unfortunate class, which unfortunately seems to be accumulating, no care seems to have been taken of this land, which, at the present, stands in a condition not at all creditable to the purposes for which it was designed. The quality of the land, its convenience to the city, and its eligibility for the benevolent purposes intended, would seem to deserve attention beyond what has appeared in the past.

The condition of the accounts existing between the State and the General Government, remain, so far as this office has any knowledge, in the same condition as represented in my report to his Excellency last year.

The condition of the records of this office have been so kept, in reference to the tract books and reports of sales of swamp lands, as to exhibit such carelessness, omissions and irregularities, that much confusion has already arisen in reference to titles and the designation of lands. Mr. T. G. Palmer, whose familiarity with this office and the condition of these lands, together with my own experience, leads to the suggestion that something should be done by the General Assembly to correct what is already a source of great difficulty, and gives promise of increasing evils in the future, unless avoided by some proper remedy. I would suggest the appointment of some person well advised of the condition of those lands, and competent to place the books in such shape as to render intelligible the designation of those lands, together with the names of the original purchaser of each specific tract.

Inasmuch as the lands of the State, acquired through her commissioners, under the act of the General Assembly for the year 1859, are lying useless and the timber being wasted, it is suggested that some proper action be taken by the Legislature to put those lands to sale.

PROCEEDINGS OF THE STATE BOARD OF EQUALIZATION.

Be it remembered, that a State Board of Equalization, for the purpose of equalizing the appraisements between the counties and Congressional Districts of the State of Indiana, convened at the

office of the Auditor of State, in Indianapolis, on Monday, July 4, 1864, at 7 o'clock, P. M.

Present—T. G. Palmer, Deputy Auditor of State, and ex-officio President of the Board.

Willis S. Hargrove, Delegate from the First Congressional District.

William Williams, Delegate from the Second Congressional District.

Samuel W. Holmes, Delegate from the Third Congressional District.

C. B. Bentley, Delegate from the Fourth Congressional District.

Thomas Rogers, Delegate from the Fifth Congressional District.

J. T. Wright, Delegate from the Sixth Congressional District.

Chris. Miller, Delegate from the Eighth Congressional District.

R. Bell, Jr., Delegate from the Ninth Congressional District.

E. W. H. Ellis, Delegate from the Tenth Congressional District.

William G. Sutton, Delegate from the Eleventh Congressional District.

The President then called the Board to order, and on motion, Thomas Rogers was appointed Secretary.

The Delegates present were duly sworn, by Henry Vandegrift, a Notary Public, to faithfully perform their duties according to law, as members of said Board.

On motion, the Board adjourned to meet in the Hall of the House of Representatives on to-morrow morning, 10 o'clock.

TUESDAY MORNING, 10 O'CLOCK, }
 July 5, 1864. }

The Board met pursuant to adjournment.

Joseph Ristine, Auditor of State, being present, took his seat as President of the Board.

Present—Messrs. Hargrove, Williams, Holmes, Bentley, Rogers, Wright, Miller, Bell, Ellis and Sutton.

On motion, Willis Hargrove, E. W. H. Ellis and C. B. Bentley, were appointed a Committee on Credentials.

The credentials of the several delegates were referred to said committee, who made the following report, to-wit:

The Committee on Credentials have examined the same, and find the following persons duly elected and accredited as members of the State Board of Equalization, to-wit:

Willis S. Hargrove, of Gibson county, for the First Congressional District.

William Williams, of Washington county, for the Second Congressional District.

Samuel W. Holmes, of Jackson county, for the Third Congressional District.

Cyrus B. Bentley, of Franklin county, for the Fourth Congressional District.

Thomas Rogers, of Henry county, for the Fifth Congressional District.

Jacob T. Wright, of Marion county, for the Sixth Congressional District.

Chris. Miller, of Tippecanoe county, for the Eighth Congressional District.

R. Bell, Jr., of Porter county, for the Ninth Congressional District.

E. W. H. Ellis, of Elkhart county, for the Tenth Congressional District.

Wm. G. Sutton, of Jay county, for the Eleventh Congressional District.

In the case of the Delegate from the Seventh Congressional District, the Committee finds that E. T. Keightley, Auditor of Putnam county, was elected by the District Board as the Delegate, and that he appears by his deputy, H. W. Daniels; the Committee recommend that Mr. Daniels be recognized as the Delegate from the Seventh District, under the appointment of his principal.

WILLIS S. HARGROVE,
E. W. H. ELLIS,
C. B. BENTLEY.

Which report was concurred in.

The Delegates present then presented the appraisements and proceedings of the several District Boards.

On motion, Messrs. Wright and Holmes were appointed a committee to examine the proceedings of the several District Boards.

On motion, Messrs. Hargrove, Miller and Sutton were appointed a committee to prepare a general abstract of the District valuations.

On motion, Messrs. Bentley, Ellis and Williams were appointed a Committee for the purpose of ascertaining the authority of this Board to equalize the various railroad appraisements.

On motion, Messrs. Williams, Bell and Miller, were appointed a Committee on Per Diem of the Members of the State and District Boards.

On motion, the Board adjourned until to-morrow morning, at 10 o'clock.

WEDNESDAY MORNING, 10 O'CLOCK, }
July 6th, 1864. }

The Board met pursuant to adjournment.

Present, Messrs. Hargrove, Williams, Holmes, Bentley, Rogers, Wright, Miller, Bell, Ellis, and Sutton.

The Committees appointed yesterday asked further time to complete the business assigned them, which was granted by the Board.

After which, the Board adjourned until to morrow morning, ten o'clock.

THURSDAY MORNING, 10 O'CLOCK, }
July 7th, 1864. }

The Board met pursuant to adjournment.

Present, Messrs. Hargrove, Williams, Holmes, Bentley, Rogers, Wright, Miller, Bell, Ellis, and Sutton.

E. T. Keightly, the Delegate from the Seventh Congressional District, being present, and his credentials duly authenticated and satisfactory, was duly sworn by John S. Williams, a Notary Public, to faithfully perform his duties as a member of this Board. Mr. Keightly then presented to the Board the appraisement and proceedings of his District Board.

The Committee appointed to examine the proceedings of the several District Boards, now make the following report, which was adopted.

To the State Board of Equalization:

The undersigned, Committee appointed to examine the proceedings of the several District Boards, would report that they have examined said proceedings and find them duly authenticated.

J. T. WRIGHT,
S. W. HOLMES.

July 5th, 1864.

The Committee appointed to ascertain the authority of this Board to Equalize the various Rail Road appraisments, reported as follows, to wit:

The Committee to whom was referred the subject of the Equalization of the Valuation of the Rail Roads of the State, have examined the question with much care and have arrived at the conclusion that under the existing Law, the action of the Board of County Appraisers in each individual case was a finality, and that this Board has no supervisory power thereof; they believe, however, that this is a serious omission in the law, and subversive of the ends of justice, inasmuch as the valuations of the several roads as reported are manifestly unequal, and in many instances unjust to other tax payers, and they earnestly hope the Legislature, at the earliest opportunity, will so amend the Law as to provide for a revision of such valuation, and a remedy for the evils complained of.

E. W. H. ELLIS,
C. B. BENTLEY,
WM. WILLIAMS.

Which, on motion, was laid on the table.

Now comes C. H. Bailey, Auditor of Vigo County, and makes application for a revision of the appraisment of the several counties in the Seventh Congressional District, and on motion of E. W. H. Ellis the subject was referred to a committee consisting of Messrs. Hargrove, Keightley and Wright.

The Committee appointed to prepare a general abstract of the District valuations, now make the following report.

Mr. President:

Your Committee, to whom was referred the various Reports of District Boards, out of which to make a Tabular Statement, beg leave to offer the following Report. Many inaccuracies occur in the sub-reports, which made it impossible for us to present such report as we desire. All the information possible to obtain is herewith submitted.

Respectfully submitted,

WILLIS S. HARGROVE,
CHRIS. MILLER,
WM. G. SUTTON,
Committee.

Report concurred in.

The Committee to whom was referred the Equalization of the Appraisment of the several Counties of the Seventh Congressional

District now make the following report, which was laid on the table, to wit:

Your Committee would recommend that a deduction of twenty per cent., that was added by the District Board, be made on the lands of Vigo County.

And that five per cent. be added to the lands, and five per cent. to the town lots and improvements of said County.

And that ten per cent. be added on the lands in the County of Vermillion.

And that five per cent. be added on the lands of Parke County.

And that twenty per cent. be added on the lands of Sullivan County.

And that five per cent. be added on the lands of Greene County.

WILLIS S. HARGROVE,
J. T. WRIGHT,
E. T. KEIGHTLY.

The following resolution was then unanimously adopted:

Resolved, That this Board now proceed to the equalization of the Counties in the several Congressional Districts, in their consecutive order, and that when all the Counties are equalized that we proceed to the equalization of the several Districts.

Ordered by the Board that the value of the lands, without improvements, excluding town lots and improvements, in the following named counties, as equalized by the several District Boards, be increased in the following ratio, to-wit:

FIRST DISTRICT—

Davies County.....	10 per cent.
Dubois ".....	10 "
Gibson ".....	5 "
Knox ".....	20 "
Martin ".....	20 "
Pike ".....	5 "
Posey ".....	15 "
Spencer ".....	5 "
Vanderberg".....	20 "

SECOND DISTRICT—

Crawford County	10 "
Floyd ".....	10 "
Harrison ".....	10 "
Orange ".....	30 "
Perry ".....	10 "
Scott ".....	15 "
Washington ".....	5 "

THIRD DISTRICT—

Bartholemew County.....	5 per cent.
Brown ".....	20 "
Jefferson ".....	5 "
Jennings ".....	20 "
Lawrence ".....	20 "
Monroe ".....	10 "
Jackson ".....	5 "

On motion, the Board adjourned until to-morrow morning, nine o'clock.

FRIDAY MORNING, 9 o'clock, }
JULY 8th, 1864. }

The Board met pursuant to adjournment. Present—all the members.

The Board resumed the equalization of counties.

The following rates of per cent. were ordered to be added to the valuations of the lands without improvements, as equalized by the District Boards, in the counties hereinafter named :

FOURTH DISTRICT—

Dearborn County.....	40 per cent.
Decatur ".....	20 "
Franklin ".....	10 "
Ohio ".....	5 "
Ripley ".....	5 "
Rush ".....	10 "

FIFTH DISTRICT—

Randolph County.....	10 "
Wayne ".....	10 "

SIXTH DISTRICT—

Hendricks County.....	10 "
Shelby ".....	10 "
Johnson ".....	20 "

SEVENTH DISTRICT—

Clay County.....	10 "
Green ".....	10 "
Putnam ".....	20 "
Parke ".....	20 "
Sullivan ".....	40 "
Vermillion ".....	30 "

EIGHTH DISTRICT—

Correll County.....	20 "
Fountain ".....	20 "
Warren ".....	10 "

NINTH DISTRICT—

Fulton County.....	10 per cent.
La Porte ".....	5 "
Marshall ".....	10 "
Miami ".....	30 "
St Joseph ".....	10 "
White ".....	15 "

TENTH DISTRICT—

Allen County.....	20 "
La Grange ".....	10 "

ELEVENTH DISTRICT—

Adams County.....	5 "
Blackford ".....	10 "
Hamilton ".....	15 "
Howard ".....	15 "
Madison ".....	20 "
Tipton ".....	5 "
Wells ".....	10 "

It was ordered by the Board that the valuations of the real estate in the following counties remain as equalized by the District Boards, to-wit:

Warriek, Clark, Switzerland, Delaware, Fayette, Henry, Union, Hancock, Marion, Morgan, Owen, Vigo, Boone, Clinton, Montgomery, Tippecanoe, Benton, Cass, Jasper, Newton, Lake, Porter, Pulaski, Starke, Grant, Huntington, Jay, Wabash, Dekalb, Elkhart, Kosciusko, Noble, Steuben, and Whitley.

On motion, the Board adjourned until to-morrow morning, nine o'clock.

* Amount \$514,580, is for Railroads and Turnpikes.

SATURDAY MORNING, 9 o'CLOCK, }
July 9th, 1864. }

The Board met pursuant to adjournment. Present—all the members.

On motion, the following resolution was adopted.

Resolved, That the changes made by this Board are hereby declared to be final, and that the Counties and Districts, as corrected, are equal and uniform in their valuations.

Ordered by the Board that the following allowances be made to each member, to wit:

	Days Travel.	Days Sess.on.	Amount.
Willis Hargrove.....	23	6	\$87 00
William Williams.....	22	6	84 00
Samuel W. Holmes.....	13	6	57 00
C. B. Bentley.....	12	6	54 00
Thomas Rogers.....	16	6	66 00
J. T. Wright.....	6	18 00
E. T. Keightley.....	6	6	36 00
Chris. Miller.....	9	6	45 00
R. Bell, Jr.....	21	6	81 00
E. W. H. Ellis.....	28	6	102 00
Wm. G. Sutton.....	18	6	72 00
Joseph Ristine.....	6	18 00

The Board allowed E. T. Keightley full pay, because his Deputy, H. W. Daniels, was sent here by him, and remained until the Board determined that he was not entitled to a seat as a member of the Board.

And the Board not having the appraisement of the various Rail Roads from the several Counties through which roads run, adjourned until the second day of August next, for the purpose of procuring the proper data upon which to act in the equalization of the appraisement of said Rail Roads.

J. RISTINE, *President*.

THOMAS ROGERS, *Secretary*.

July 9th, 1864.

TUESDAY MORNING, 10 o'CLOCK, }
August 2d, 1864. }

The Board met pursuant to adjournment.

Present—

Joseph Ristine, Auditor of State, President.

Willis S. Hargrove, Delegate from the First Congressional Dist.

William Williams, Delegate from the Second Congressional Dist.

Samuel W. Holmes, Delegate from the Third Congressional Dist.

C. B. Bentley, Delegate from the Fourth Congressional District.
 Thomas Rogers, Delegate from the Fifth Congressional District.
 J. T. Wright, Delegate from the Sixth Congressional District.
 E. T. Keightley, Delegate from the Seventh Congressional Dist.
 Chris. Miller, Delegate from the Eighth Congressional District.
 R. Bell, Jr., Delegate from the Ninth Congressional District.
 E. W. H. Ellis, Delegate from the Tenth Congressional District.
 Wm. G. Sutton, Delegate from the Eleventh Congressional Dist.

On motion of E. W. H. Ellis, Messrs. Miller, Holmes and Bell were appointed a committee to prepare a tabular statement showing the length of line of the several Rail Roads in the State, the valuations per mile of rolling stock reported, and the valuations per mile as fixed by the District Appraisers.

On motion, the Board then adjourned until to-morrow morning, ten o'clock.

WEDNESDAY MORNING, 10 O'CLOCK, }
 August 3, 1864. }

The Board met pursuant to adjournment.

Present all the members.

The committee appointed to prepare a tabular statement showing the length of line of the several railroads in the State, the valuations per mile of rolling stock reported, and the valuations per mile as fixed by the district appraisers, made their report; and the Board, after hearing the arguments of counsel, and the statements of officers, touching the various railroads therein named, adopted said report with the following amendments, to-wit:

Total.....					8,605,500

The following resolutions were unanimously adopted, to-wit:

Resolved, That the valuation of depots, depot grounds and structures, belonging to the Pittsburgh, Fort Wayne, and Chicago Railroad, be stricken from the duplicates in the several counties through which the road passes.

Resolved, That upon the conveyance of any property, held by individuals for depots, depot grounds, and machine shops of any railroad company, to such company, the same shall be erased from the duplicate, and regarded as included in the valuation this day made of such railroad.

On motion, the Board adjourned until to-morrow morning, eight o'clock.

THURSDAY MORNING, 8 O'CLOCK.

The Board met pursuant to adjournment.

Present, all the members.

Ordered, By the Board, that the following allowances be made to each member, to-wit:

NAMES.	Days Travel.	Days Session.	Amount.
Willis Hargrove.....	23	3	\$78 00
William Williams.....	22	3	75 00
Samuel W. Holmes.....	13	3	48 00

WILLIAM PIERCE, *Gardener.*

TRUSTEES' REPORT.

*To the Members of the Senate, and the
House of Representatives of the State of Indiana:*

GENTLEMEN :—The period has arrived when it becomes our duty, as Trustees of the Indiana Institution for the Education of the Deaf and Dumb, to present to your honorable body our Report for the fiscal year ending October 31st, 1864.

Notwithstanding the disturbed condition of the educational interests of the country consequent upon the war, and the absence of the usual legislative provisions for its wants, the Institution has been highly prosperous, and fully sustained in all its departments.

It is well known that the last legislature failed to make the needful appropriations for carrying on the benevolent institutions of the State. The small remnant of a previous appropriation belonging to our Institution was soon exhausted, and the officers of State refused to pay out of the treasury the money which rightfully belonged to it, on the ground that a specific appropriation was essential for that purpose. Thus we were brought to the verge of a calamity, most deeply to be regretted and deplored by all. The prompt intervention of the State Executive alone averted the threatened disaster; and it is a matter of congratulation that we had a Governor who could feel and say that "to have closed the Asylums would have been a shame and disgrace, as well as a crime against humanity itself," and who, trusting to the good sense and patriotism of the people in the vindication of his course, promptly intervened, and obtained by loans at home and abroad the funds adequate to the needful expenditures of these Institutions; and we rejoice that his course has recently met with such a complete and full endorsement by the people at the ballot-box.

Here we would respectfully suggest, that as this failure of the Legislature to make appropriations for the benevolent institutions is the second of the kind that has occurred within a few years past, some legislative action should be taken to prevent a like occurrence in the future.

The Board having learned that the salaries of the officers of State were being paid under a law similar to the law enacted in 1852, for the government of this Institution, at once made application for the payment of the salaries of our officers, which were accordingly paid. Having learned, sometime in October last, that the expenses of State Printer had also been paid out of the treasury, we directed that another application should be made to meet the ordinary expenses for the present quarter, whereupon a warrant was issued upon the treasury, and the money paid over.

It will be seen by the accompanying Report of our most worthy Superintendent, that the estimated cost of supporting the Institution for the next two years is \$35,000 per annum, which, in view of the greatly increased expense of living, is certainly very reasonable, and an appropriation for that amount is respectfully asked. It will be also seen that the building used as a cabinet shop is wholly inadequate to the purpose for which it is used. It ought at once to be re-moddled, or a new building erected in its place. The probable cost of this improvement is estimated at \$5,000, which we consider reasonable, and respectfully ask that it be appropriated. We also approve the recommendation that the law which fixes the maximum allowance for the clothing of an indigent pupil at twenty dollars, be so amended as to increase the sum to forty dollars.

Statement of Receipts and Disbursements for the year :

Receipts.....	\$39,480 16
Disbursements.....	33,883 90
Balance on hand.....	\$5,596 26

For a detailed statement of the accounts, and for other matters of interest pertaining to the history of the Institution for the past year, we would respectfully refer you to the Report of the Superintendent; and we hereby express our testimony to the diligence, prudence and fidelity with which that officer and his assistants have discharged their difficult and responsible duties.

In conclusion, gentlemen, we commend this noble charity of our State to your warmest, and most earnest regard. If the influences of education upon the mind under ordinary circumstances is a matter of high consideration, its effects upon the imprisoned intellect of the Deaf Mute is wonderfully transforming—well nigh creative; and to secure this blessing to this whole class of unfortunate persons must be regarded as one of the highest benefactions of the age. .

ANDREW WALLACE, *President.*

1 D. J. 1865.—42

SUPERINTENDENT'S REPORT.

To the Board of Trustees :

GENTLEMEN :—I hereby most respectfully submit to your honorable body the following report, containing the usual summary of the transactions of the year just closed, and a statement of the present condition and wants of the Institution.

The period of time since the adjournment of the last legislature has been one of more than usual difficulty and embarrassment to those having the management of the Institution, and of great anxiety on the part of the friends of the deaf and dumb everywhere, for its prosperity. It is, therefore, a source of very great satisfaction, as well as ground of thankfulness to us, to be able to report that its usefulness, notwithstanding these difficulties, has not in any respect been diminished. The citizens of the State, of all classes, continue to manifest a warm interest in its welfare. Among the large number who have visited the establishment, much anxiety has been expressed, lest under the financial difficulties resulting from the failure of the appropriation bill, the school would have to be suspended and the pupils sent home. Fortunately, this threatened misfortune was averted by the intervention of Governor Morton. It is, therefore, a matter of universal congratulation among the friends of the deaf and dumb, that the Commonwealth is blessed with an executive who fully comprehends and appreciates the importance of this benevolent work, and who was willing to pledge his individual credit, as well as use his official authority, to sustain it and carry it forward. To him, therefore, we, who are appointed to administer this benevolence, are indebted, under Providence, for the good which we have been enabled to accomplish. Whilst on our part, we have endeavored to produce the best possible results with the means placed at our disposal, we can not but feel thankful to him chiefly for the means of that success which has crowned the labors of the year.

While all the Institutions for the deaf and dumb in the revolted States have been entirely swallowed up in the vortex of this wicked rebellion, now raging so terribly in the South, we, in the good providence of God, have been permitted to pursue our course of prosperity without molestation. We are informed that the Institutions established for the deaf and dumb in Virginia, North Carolina, South Carolina, Georgia, Alabama, Louisiana, Mississippi, and Tennessee have been broken up, the pupils and teachers scattered, and the means of their education entirely swept away by this unholy and fratricidal war of secession. The desperate wickedness of the rebellion is manifested in nothing else more than in this, that the promoters of it have sacrificed at its shrine the interests of the helpless and unfortunate, by converting all these benevolent institutions into places of treason and means for the destruction of the Union. While we condemn the authors of the great wrong, we commiserate the unfortunate victims of it, and record our most heartfelt gratitude that our lot has not been cast among such people, and that we have been saved from such a calamity.

While the general health of the pupils during the past year has been as good as usual, yet we have been called to mourn the loss of two by death from disease, and two others by an accident on the railroad.

The first death from disease was that of Francis Hunter, from Lawrence County, a youth fourteen years of age, and of very feeble constitution, who died on the 18th day of May last. His was a severe case of inflammation of the brain; and though every means was used which medical skill and kind attention could render, the disease terminated fatally on the second day after the attack.

The other death was that of Miss Rosannah Goltner, a very promising pupil seventeen years of age, from Adams County. On the 14th of October she was suddenly and most violently attacked with cerebro-spinal meningitis, which, notwithstanding every effort was made and every remedy known to the profession used, proved fatal in forty-eight hours after she was taken with it.

The fatal accident from the cars took place March the 28th, on the Terre Haute Railroad, about eight miles west of the city. Harrison M. Wilson, the elder of the two boys, was nearly sixteen, and was from Vigo county. The other one, John H. Fisher, was from Parke county, and was a year and a half younger. They both entered school in 1860, and had been in regular attendance

up to the time of their decease. They were both good students, and in attainments and standing were equal, if not superior, to the average in their class. They were familiar with traveling on the railroad, having frequently gone home and returned in that way by themselves. Up to the time of their leaving they manifested no dissatisfaction with any person or anything about the Institution. They gave no intimation of their intention or desire to go home. So far as we have been able to find out they ran away without cause or provocation. They left early in the morning, and to avoid being brought back, as it is supposed, they passed the Union Depot in the city, and attempted to reach the first station beyond, where, it is thought, they intended to get aboard the cars and go home. Walking together on the track, they had nearly reached the station when the express train from Indianapolis, coming up from behind at full speed, struck them both, throwing one to the right and the other to the left with such violence that they expired in a few minutes.

That intelligent deaf mutes should attempt to walk on a railroad track over which they knew trains were running almost every hour, after having been frequently warned against the extreme danger of such a course, is a reckless folly hard to believe; yet it is not an uncommon thing for them to do it all over the country. They do it because they see others doing it. The principle of imitation in them is stronger than the sense of danger.

Since the year 1856, we have heard of nine deaf mutes who have been killed by the cars in different parts of the State, and all of them, except one, who fell between the cars and was crushed, were killed while walking upon the track. All these accidents, except one, have occurred away from the Institution, and in every case the individuals had enjoyed the benefits of instruction, and a majority of them had been graduated. Although a railroad runs through the Asylum grounds, yet from the precautions taken, there is less danger here to the pupils from the running of the cars than in many other places. It is after they have left our care that nearly all these accidents have taken place, and we mention the fact to assure parents that their children are in no more, if as much danger here as they would be anywhere else in the vicinity of a railroad.

We have used our utmost endeavors on all proper occasions in the way of instruction and warning to this class of persons against the folly and extreme danger of their attempting to walk on a rail-

road track. We know of nothing else that we can do which we have not done to prevent such accidents. It is believed, however, if speaking and hearing persons were not allowed to walk upon the railroads the deaf and dumb would not. If, therefore, the Legislature were to pass a law prohibiting it, as has been done in Great Britain and other countries, we are of the opinion it would lessen, if not entirely prevent their occurrence. It is certainly worthy of consideration whether some such measure ought not to be adopted.

The number of pupils in attendance during the year past, including the class of new pupils received at the beginning of the present session, has been one hundred and seventy-six, of whom eighty-five were males and ninety-one females. Four have been removed by death, two have left the State, two have been dismissed, and sixteen, having completed the prescribed course of study, have been honorably discharged. The number, therefore, remaining at this date in the enjoyment of the privileges of the Institution is one hundred and fifty-two. They are all beneficiaries of the State—instructed, boarded and cared for free of charge. Two are the children of refugees from the South, and two are orphan children sent west by the Society in New York City, formed for the purpose of finding homes for such persons. They were taken by two of our deaf mute fellow-citizens to raise; but unfortunately within the last year they have, by the death of their foster parents, been a second time made orphans. They have been both admitted as pupils; one was received as a beneficiary from Fayette county, and the other from Tippecanoe county. They are bright, promising boys, and will, it is hoped, become useful members of society.

The admission of a much larger number of new pupils this term than usual, has made it necessary to form eight classes, one more than we had last year.

In the prosecution of the course of daily duty there have been scarcely any interruptions. Among teachers and pupils there have been as few instances of failures to meet the demands of every day's requirements as could be expected in so large an organization. All those systematic arrangements in the various departments, which are the result of experience, and which have heretofore proved so satisfactory, have been firmly maintained; and through them and the hearty co-operation of the officers and teachers a high degree of punctuality and efficiency has been secured in the management of the various details of the household, the shops, and the school.

In the department of instruction several changes have occurred since the date of the last report, by which we lost two of our most experienced teachers.

Mr. William Willard, who for over thirty years has devoted his entire energies to the education of the deaf and dumb, and who originated this Institution, and who has been more intimately identified with its prosperity from the beginning than any other individual, was, on account of ill health, relieved from duty in December last, and has retired to private life. He carries with him the sympathy and respect of the pupils, the high appreciation of his associates for intelligence and worth, and the best wishes of all who have known him for his future prosperity and happiness.

Mr. William H. DeMotte, for a long time one of our most faithful and successful assistant teachers, resigned at the close of last term and left us. For several years, though zealously devoted to teaching, he has been desirous of trying, for a time at least, some other field of labor. He, therefore, sought and obtained the appointment of State Agent for the Sanitary Commission in Washington City. On the acceptance of his resignation by the Board, he repaired immediately to the field, and entered at once upon the discharge of its duties.

The above mentioned vacancies have been filled by the appointment of Miss Mary J. Willard and Miss Harriet N. MacIntire, young ladies of liberal education, and who from infancy have been familiar with the language of signs. They have entered upon the discharge of their duties with very flattering prospects of success.

The large accession of pupils to the school in September last, rendered the services of another instructor necessary. The want has been supplied for the present by the appointment of August J. Boden, an intelligent deaf mute, a member of the Senior Class.

Mr. William S. Marshall, who went out from us two years ago, is still incarcerated in a Southern prison. It will be remembered that he resigned his situation here as a teacher in December, 1862, and from considerations of patriotism entered the service of his country as a volunteer. He enlisted as a private in the 51st Regiment, but was soon promoted and commissioned a Lieutenant of his company, and made Adjutant of the regiment. In April following, he, with that ill-fated regiment, was captured by the rebels in Northern Georgia, and has ever since been held as a prisoner of war. As an officer of that regiment, hated so intensely by the rebels, his imprisonment has been protracted and more than usually

severe. Through other officers imprisoned with him, who have escaped or been exchanged, we have heard occasionally from him. For more than fifteen months he was incarcerated in Libby Prison, a place from all accounts the most horrid of any in which human beings were ever confined, and kept by the most barbarous and inhuman wretches that ever lived. Once while there his exchange was arranged and he was on the point of being released, when it was discovered that he was a member of Col. Streight's regiment, and in revenge, it is supposed, for the escape of his Colonel, he was turned back and another was released in his stead. When Gen. Grant began to press upon Richmond, he, with the other prisoners, were sent South, and was one of the officers recently placed under fire at Charleston, and who, as we learn more recently, has been removed to the interior of the State. Five others of the employees of this Institution entered the service about the same time. They have all nobly died for their country. They all went out from us, but none of them have returned to us. Mr. Marshall alone, of those who have gone out from the Institution in this war, is alive, and he has suffered, and is suffering a lingering death. Such are the terrible sacrifices of this cruel war. Alas! that they are so great. May victory soon perch upon our banners, bringing peace and a restored Union, with all their attendant blessings!

The last year, in a financial point of view, has been the most trying one the Institution has ever passed through. With no money appropriated by the last legislature, and with nearly every article of consumption at a cost more than double what they have been in former years, it, however, will be the more gratifying to the citizens of the State to know that it has, notwithstanding, been sustained in its full efficiency, and at a cost not much beyond that of former years. To Governor Morton is due the credit of keeping up the Institution. On his own responsibility he borrowed money to sustain it; and if it had not been for him the benevolent design of the people would have been defeated, the establishment broken up and the unfortunate pupils scattered. The Constitution of the State says the Institution shall be sustained—the taxes for this purpose had been assessed, collected, and were in the treasury; and the Statute provides that the current expenses shall be paid out of any money in the treasury not otherwise appropriated; yet the Institution would have been compelled to suspend if it had not been for the intervention of the Governor. We congratulate, not only the deaf and dumb, but the benevolent throughout the State, that his course in

this respect, as well as in all others, has been so triumphantly vindicated by the people in the late election.

Up to the first of October last, the funds required for the support of the Institution since the adjournment of the Legislature, except for salaries, has been supplied by Governor Morton. The twenty-first section of the law for its government, passed in 1852, requires the Treasurer of State to pay the salaries of the officers and teachers out of any money in the Treasury not otherwise appropriated, on the warrant of the Auditor, issued on the certificate of the Board, and in this way they have been paid. The eleventh and thirteenth sections of the same law also provide that the ordinary expenses of the Institution shall be paid out of the general fund, on the estimate of the Superintendent and Steward, approved by the Governor, Auditor and Treasurer, or a majority of them. When we learned that the Auditor had paid his own salary, and that of the other State officers, under the authority of a law identically the same as the one for the government of this Institution, we made application for the payment of our salaries according to law, and the same were paid.

About the first of October last we were informed that the expenses of the State printing had also been paid out of the general fund of the State, and on the recommendation of the Board we made application for money sufficient to meet the ordinary expenses of the Institution for the present quarter. The estimate was submitted to the Auditor, was approved by the Governor and the Treasurer, a warrant issued on the Treasury, and the money was paid over.

The funds, therefore, to pay the salaries of the officers and teachers, and to defray the current expenses of the last month of the fiscal year, ending the 31st of October last, have been received from the State Treasury, and the means to meet all other expenses have been supplied by Governor Morton.

The following statement will exhibit the amount of funds received during the year, the sources from which they were obtained, the objects upon which they have been expended, and the balance on hand at this date :

*A Statement of Accounts, showing the Receipts and Disbursements
for the year ending October 31st, 1864.*

RECEIPTS.

From Warrants on the State Executive.....	\$16,205 99
From Warrants on the State Treasurer.....	18,550 25
From Counties, for clothing indigent pupils.....	735 51
From sale of Manufactures of Cabinet Shop.....	2,044 59
From sale of Manufactures of Shoe Shop.....	2,064 12
From the sale of surplus articles from the Farm and Garden.....	233 27
Balance on hand November 1st, 1863.....	21 43
Total receipts.....	<u>\$39,855 16</u>

DISBURSEMENTS.

I.—ON ACCOUNT OF CURRENT EXPENSES.

For Salaries of Resident Officers.....	\$2,900 00
For Salaries of Teachers.....	6,306 25
For Salary of Physician.....	300 00
For per diem and mileage of Trustees.....	378 00
For wages of Domestics.....	1,920 10
For Provisions and Groceries.....	8,410 10
For Wood and Coal.....	3,901 23
For Wages of Engineer.....	580 00
For Gas Light.....	497 00
For Furniture and Furnishing Goods.....	1,544 41
For School Books and Stationery.....	378 72
For Drugs and Medicines.....	85 48
For Plumbing.....	485 34
For Repairing Heating Apparatus.....	166 70
For Repairs of Buildings and Furniture.....	571 02
For Farm Implements.....	210 36
For Wages of Gardener.....	420 00
For Wages of Laborers.....	385 00
For Milch Cows and Stock Hogs.....	103 73
For Seeds, Plants and Shrubbery.....	58 32
For Sewing Machine.....	92 50
For Dentistry.....	18 50
For Sash for Hot-beds.....	50 00
Amounting to.....	<u>\$29,563 57</u>

II.—ON ACCOUNT OF SHOPS.

For Stock for Shoe Shop.....	\$1,985 65
For Wages of Foreman.....	720 00
For Stock for Cabinet Shop.....	1,254 17
For Wages of Foreman.....	722 00
Amounting to.....	<u>\$ 3,959 82</u>

III.—ON ACCOUNT OF CLOTHING.

For Ready Made Clothes.....	\$340 00
For Shoes and Boots.....	271 50
For Materials for Clothes.....	124 01
Amounting to.....	<u>\$ 735 51</u>
Total Payments.....	<u>\$33,883 90</u>
Balance on hand November 1st, 1864.....	<u>\$ 5,596 26</u>

Of the above named balance on hand, \$233 27 is held subject to the order of the Board, for the benefit of the farm and garden, and \$170 32 for the purchase of stock for the shops. The remainder, \$5,192, is intended to defray the current expenses of the Institution for the present quarter, ending the 31st of December next. It is estimated that the sum will be about sufficient for the purpose.

No material change has been made in the management of the work shops. They continue to be carried on as usual, and are considered to be essentially necessary in the education of the male pupils, in fixing habits of industry, and in preparing them for the active duties of life after they leave school.

In a pecuniary point of view the shops have been as successful as in any former year. The total cash receipts from the sale of articles manufactured by the pupils in the cabinet shop and shoe shop have been \$4,130 14, and the cost of maintaining them \$3,959 83, showing the net profits on the work the last year to have been \$170 32.

The building used for the cabinet shop was not originally intended for this business, nor is it adapted to the purpose. It was built for a cooper shop, is much too small, and very cold and uncomfortable in the winter season. The floor below is open, there is no ceiling over head, and the roof, from a defect in the framing, is giving away, so that the building is in danger of falling down. A new floor will have to be put in, the roof taken off, and a new one put on. Indeed the building ought to be re-moddled, and an additional story added to furnish proper facilities for carrying on this business will profit to the pupils. The unsafe condition of the building, as well as the want of additional room, requires that this improvement should be made immediately. We therefore respectfully ask for an appropriation sufficient for the purpose. It is estimated, to do it as it should be, it will cost about \$5,000. This sum will probably be found sufficient. The present accommodations are altogether inadequate and unsuitable for carrying on this business as it should be, and we deem it very necessary that provisions should be made for improving and enlarging them without unnecessary delay. With this view, we earnestly recommend to the General Assembly to grant the above named sum. It is in contemplation, should the application be responded to favorably, to make the improvement in the vacation, so that the building may be completed and ready to occupy on the return of the pupils at the commencement of next session.

We deem it our duty to call attention to the provision of the law for clothing indigent pupils, and to recommend to the members of the Legislature that the amount allowed be increased. The maximum allowed, as the law now stands, is only twenty dollars a year. This sum, always insufficient to clothe a pupil decently, is now found to be entirely inadequate for the purpose. A little reflection will convince any one that, at the present high price of wearing apparel, twenty dollars per annum is not enough to clothe one properly. It is true that the larger part of the pupils are clothed entirely by their friends, and that a considerable number more need only a partial aid in this respect. The expense for each of this last class does not ordinarily exceed ten dollars a year. But there are from thirty to forty pupils each session who are destitute of friends able to clothe them, and who, if they attend school at all, must be supplied at the public expense. The privilege is not liable to abuse as might be supposed; for we have scarcely found an instance in which parents who were able to clothe their children were not willing to do so. On the contrary, we have known in past years many children kept at home and deprived of an education by their parents, because they were not able to clothe them, rather than have them clothed at the expense of the State. This liability to abuse, however, is abundantly guarded against in the law, which is wise and judicious, and has worked well in all other respects except in this one particular. The amount allowed is not enough. It ought to be forty dollars per annum instead of twenty dollars. We therefore respectfully recommend that this amendment in the law be made, allowing in extreme cases of destitution a sum not exceeding in any case forty dollars per annum.

The law for the government of the Institution imposes upon the Superintendent the duty to make out and report to the Board bi-ennially the probable sum required to defray the expenses of the Institution for the ensuing two years. The prices of provisions, groceries, and supplies of all kinds are so variable, depending so much upon the rise and fall of gold, as well as the supply in the market, that it is extremely difficult to arrive at any very certain conclusion upon the subject. The quantity of articles needed is easily ascertained, from past experience, but to foretell what they will cost is the difficulty. If the calculation be based upon the prices paid two years ago, it would fall very far short of what would be necessary. All the leading articles of consumption cost

now a hundred, and some of them two or three hundred per cent more than they did when the last estimate was made. As the cost of living has advanced so greatly, the wages of employees and salaries of teachers ought to be increased in some just proportion, to enable them to support themselves, else they will be compelled to seek other fields of labor. It is thought to be by some about as probable that prices will advance as that they will recede during the period for which we estimate. The true basis, therefore, of the calculation, should be the probable cost of supplies. Should prices remain as they are for the two ensuing years an appropriation of forty thousand dollars a year will be required to sustain the Institution. But it is reasonable to suppose that the present prices will not be maintained throughout the whole period of the two years. If prices remain as they are during the year 1865, as is probable, the sum above named will be needed for the year. But should they recede twenty-five per cent. by the year 1866, as is by many counted upon, then a corresponding reduction in the estimate for that year may be made. Taking into view this probability we estimate that thirty-five thousand dollars a year, or seventy thousand dollars for the two years, will be necessary to maintain the Institution on its present basis. We therefore recommend the following appropriations be made:

For Current Expenses for the year 1865.

For Boarding Department, including Provisions and Groceries, Wages of Domestic,	
Fuel and Lights, Furniture and Furnishing Goods.....	\$23,000 00
For Salaries of Superintendent, Matron, Assistant Matron, Steward and Physician...	3,400 00
For Salaries of eight Teachers.....	6,300 00
For School Books, Apparatus and Stationery.....	450 00
For Drugs and Medicines.....	100 00
For per diem and mileage of Trustees.....	450 00
For Repairs, Improvements and other Contingent Expenses.....	1,270 00
Amounting to.....	\$35,000 00

To defray the current expenses of the Institution for the year 1866, a like sum of thirty-five thousand dollars will be required.

We are aware that the above estimate may seem large to some, but if they will sit down and make the calculation, item by item, of the expense of boarding a family of one hundred and eighty or ninety persons, the cost of the instruction, books and apparatus, for one hundred and sixty pupils, and of the care and attendance upon so many, leaving out everything except what is necessary to comfort, they will find that it is by no means excessive, but moderate, and especially so under the present aspect of the market.

In addition to the learning of trades, as noticed above, we will mention that the system of manual labor adopted and practised in the Institution embraces all the pupils, both male and female. During the intervals of study we endeavor to supply all with some useful and appropriate work. The female pupils, besides doing all the sewing for the Institution, and performing much of the household work, each year manufacture a variety of fancy articles for sale, the profits of which are devoted to the benefit of the library. The last year as great attention has been given to this part of their education, and as great improvement made, it is believed, as in any former year. For the interest manifested, and the success attained, both the pupils, and the Matron who has charge of this department, are worthy of high commendation.

To the liberality of the members of the Legislature, to the benevolence of the wise and good throughout the State, to the fostering care of the Board of Trustees, and especially to the great Father of Mercies, we, in conclusion, commend the Institution and all its interests.

All of which is respectfully submitted.

THOMAS MACINTIRE,
Superintendent.

CONTRIBUTIONS.

The usual number of Newspapers and Magazines have been gratuitously sent to the Institution the last year. They have been highly prized by the pupils, and have been the means through which they have obtained much valuable information. The deaf and dumb are as eager for news as any other class of persons, and from the nature of their misfortunes they could know very little of what is going on in the world without such publications. Therefore, the thanks of the pupils are most respectfully tendered to the proprietors of these publications, for their generous donations, and the solicitation renewed for the continuation of these favors.

The thanks of the Institution are also due, and are hereby tendered to Adolphus Koffman, Esq., of Lafayette, for a donation of \$25 for the benefit of the Library; and to the Hon. E. Dumont, member of Congress from this district, for a copy of the Report on Population, of the Eighth Census of the United States, containing very valuable articles on the statistics of the education of the deaf and dumb and the blind.

The list of donations and additions to the library is as follows:

Newspapers and Magazines.

Librarian.

RULES AND REGULATIONS

FOR THE

ADMISSION OF PUPILS.

I. The Institution is open to all the Deaf and Dumb of the State between the ages of ten and twenty-one years, for admission as pupils, *free of charge* for boarding and tuition, upon compliance with the rules. Applicants from other States will be received as pupils on the payment, in advance, of one hundred and fifty dollars a year for boarding and tuition.

II. The Institution will provide for each State pupil regularly admitted, boarding, lodging, washing, superintendence of conduct, manners and morals, medical attendance, instruction, school books, slates, and all other incidental expenses of the school-room, without charge; but will not pay the traveling expenses of pupils in coming to or returning from the Institution, nor supply them with clothing, except in extreme cases of destitution.

III. Those who are unable to pay for the necessary clothing, or whose parents neglect to supply them, it is made the duty of the Superintendent to furnish, in accordance with the following legislative enactment:

“That when the pupils of the Institution for the Deaf and Dumb are not otherwise supplied with clothing, they shall be furnished by the Superintendent, who shall make out an account therefor, in each case, against the respective counties from which said pupils were sent, in an amount not exceeding twenty dollars per annum for every such pupil, which account will be signed by the Superintendent, and attested by the seal of the Institution for the Deaf and

Dumb, and the Treasurer of State shall charge the account thus certified, to the county from which the pupil was sent, and credit the amount to the current expense fund of the Indiana Asylum for the Deaf and Dumb."

"SEC. 3. When such account shall be received by the Treasurer of the proper county, to whom it shall be immediately sent upon its reception by the Treasurer of State from the Superintendent, such county Treasurer shall cause the same to be paid out of the county Treasury to the Treasurer of State. And such county Treasurer shall collect the amount of such account from the estate of such pupil, if he have any, by suit, if necessary, in the name of the county."

IV. Each applicant for admission should come well supplied with clothing; and on all articles on which it is possible to mark the name of the pupil, it should be written with indelible ink. In all cases, except those clothed by the county, besides the ordinary supply of clothing, the applicant should deposit with the Superintendent a sum of not less than \$3 00 to defray incidental expenses, repairs of shoes, &c., any part of which remaining unexpended at the close of the session will be returned. Each pupil should be supplied with a trunk.

V. Pupils will be admitted on the following conditions: 1st. The pupil well provided with clothes, is to be brought to the Asylum punctually at the commencement of each session, unless detained at home by his or her sickness. 2d. The pupil is to remain in the school until the last Wednesday in June, of each year. 3d. No parent or guardian shall be allowed to take a pupil out of the school in session time, without the consent of the Board of Trustees.

VI. The annual sessions of the school commence on the 15th day of September, and close on the last Wednesday of June. *Every pupil is to come promptly on or before the first day of the session, and is to remain until the last day of the same. The only exceptions allowed are cases of sickness.*

VII. No pupil, unless under extraordinary circumstances, can be received at any other time than the commencement of the session.

VIII. The length of the course of instruction is five years ; and that the pupils may become more proficient in their studies, they are allowed and advised to remain one year longer. At the end of six years, the Superintendent may select such pupils as he may consider would be particularly benefitted by continuing longer at school, and if approved by the Board of Trustees, they shall be permitted to remain an additional year.

IX. It is the intention of the Trustees to render the pupils self-supporting, so far as practicable, and that every pupil, on leaving the Institution, shall be so proficient in some useful occupation or trade as to be able to procure a livelihood without reliance on the charities of others. In accordance with this design, all the scholars will be required to labor a portion of each day, the girls in performing the lighter kinds of housework, and various kinds of needle-work, as plain sewing, ornamental work, dress-making and millinery, and the boys at various trades, the necessary work about the Asylum, and in the cultivation of the farm and garden.

X. All business letters, or letters of inquiry in regard to pupils in the Asylum, or those whom it may be designed to place there, should be addressed to THOMAS MACINTIRE, *Superintendent, Institution for the Deaf and Dumb, Indianapolis.*

XI. Those persons bringing pupils to, or taking them away, can not be furnished with board, lodging or horse-keeping at the Asylum.

XII. Applicants for admission should be between ten and twenty-one. But a discretionary power of varying from the rule is lodged with the Board of Trustees. Twelve, in ordinary cases, is considered the best age for entering the Institution.

XIII. All applications should be accompanied with written answers to the following questions :

1. What is the name, in full, of the applicant ?
2. What is the age of the applicant ? If possible, give the day, month, and year of birth.

3. What is the name of the father or nearest friend? his post-office address, including county and town?

4. Can the applicant defray all his or her expenses at the Institution for clothing, or would he or she have to be clothed by the county?

5. Is the applicant in good health and sound mind? What is the state of his or her general health?

6. Was the applicant born deaf? If not, at what age did he or she lose his or her hearing, and by what disease or accident?

7. Can the applicant speak at all? If so, has his or her speech failed or improved within the last year or two?

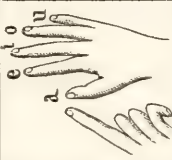

8. Whether the deafness is total or partial? If partial, what is the degree of hearing? Can he or she hear any articulate sounds? What noises can he or she hear?

XIV. All pupils are expected to spend the vacations at home.

RULES FOR VISITORS.

1. The Institution will be open for the reception of visitors from 10 to 12 o'clock in the forenoon, and from 2 to 4 o'clock in the afternoon, of Mondays, Wednesdays, and Fridays, during the sessions of school.

2. On these days, and during the hours specified, an attendant will be in readiness to wait upon visitors, and to conduct them through all parts of the establishment, open to the public.

3. Persons who wish to visit the Institution on other days, or at other hours than those specified, can only do so by procuring permits from the President of the Board, or from one of the Trustees.

4. The vacation extends from the 1st of July to the 15th of September.

FIFTH ANNUAL REPORT

OF THE

BOARD OF CONTROL

OF THE

Northern Indiana State Prison,

FOR THE YEAR 1864.

TO THE LEGISLATURE.

INDIANAPOLIS:
JOSEPH J. BINGHAM, STATE PRINTER.

1865.

REPORT OF THE BOARD OF CONTROL.

OFFICE BOARD OF CONTROL
NORTHERN INDIANA STATE PRISON, }
MICHIGAN CITY, Dec. 15, 1864. }

*To his Excellency, O. P. MORTON,
Governor of the State of Indiana:*

The undersigned Board of Control of the Northern Indiana State Prison, in compliance with the requirements of law, make their annual report of the condition of the prison, for the year ending December 15, 1864.

The number of prisoners now in the prison is 114, which is a fair average of the number during the year. These have been profitably employed, the larger portion working under contractors, at a fair compensation, and the balance in the necessary labor of the prison and the farm. The discipline of the prison is excellent, and the general conduct and deportment of the men all that could be expected. For this the State is under obligations to the efficient Warden, Thomas Wood, who has established such a perfect system of discipline, that but little difficulty is experienced in maintaining good order, and the necessity for punishment, we are happy to say, but seldom occurs. Mr. Wood's labors in this respect have been greatly lessened by the hearty co-operation of his deputy, Samuel C. Freeman, and the faithful and prompt discharge of their duty by the guards and officers generally. The prison is kept in admirable order; the building, beds, clothing, and everything connected with the prisoners, being remarkably clean and neat. The prisoners are well fed with an ample supply of good, wholesome provisions, and are comfortably clothed. As the result of the good care taken of them, they are remarkably healthy, and in as good condition as any similar number of men to be found outside of the prison walls.

In April last a contract was made with Messrs. Jones, Chapin &

Co., of Chicago, for from forty to eighty men to work as coopers, at seventy-six cents per day; and also for the use of the steam-engine, at two dollars and fifty cents per day. They are now using fifty-five men at this rate of compensation. Under a contract made with Messrs. Murray & Potter last year, thirty-three men are employed by them at wagon making, at seventy cents per day. These contracts are highly favorable to the State, being at a much higher rate than usual, and are each made for the term of four years.

Under them the earnings of the prisoners are large, amounting to the sum of twelve thousand eight hundred and eighteen dollars and seventy-nine cents, for the past year, and making the expense of carrying on the prison proportionably less. We are not without hopes that if ever the number of prisoners should be materially increased, the institution will be made self-sustaining.

By reference to the reports of the Warden and Clerk, and the tables accompanying them, it will be seen that the total expenses of the prison for the current year, with the exception of salaries of Directors, Clerk, and Deputy Warden, not yet paid, have been thirty-six thousand five hundred and thirty-nine dollars and ten cents; and that the amount received from convict labor, &c., is thirteen thousand five hundred and ninety-two dollars and fifty-seven cents; from the United States, for keeping United States convicts, two thousand and sixty-nine dollars and thirty-seven cents; from Treasurer of State, two thousand three hundred dollars, and from Governor O. P. Morton, eighteen thousand one hundred and five dollars and ten cents, making the total amount of receipts for the year, thirty-six thousand and sixty-seven dollars and four cents.

This shows but a comparatively small amount furnished by yourself, taking into consideration the great advance in the price of provisions and all other necessities, and the fact that out of the expenditures a large stock of provisions, &c., has been accumulated and is now on hand.

The fiscal condition of the prison is excellent, and we feel a just pride in saying, is proof that this Board has used the most rigid economy compatible with the interest of the State and strict justice to the comfort of the convicts.

There is a large outstanding debt against the institution which we trust you will use your influence to induce the Legislature to make the necessary appropriation to meet. Much of it has been owing for a long period, to the great detriment of the creditors, and justice requires that it be paid without further delay.

The indebtedness of the prison at the time the present Board came into office, March 11, 1863, was sixty-four thousand one hundred and five dollars and ninety-one cents; amount accrued between the 11th and 25th of March, 1863, at which latter date the present Board came into possession of the books, is nine hundred and sixty-eight dollars and seventy-seven cents; the amount of debt accrued from March 25, 1863, to December 15, 1864, including pay of Directors, Clerk and Deputy Warden, purchase of steam engine and fixtures, &c., is twelve thousand, five hundred and forty-two dollars and eleven cents, making a total indebtedness of seventy-seven thousand, six hundred and sixteen dollars and seventy-nine cents, which amount does not include the amount advanced by your Excellency. The thirty-three thousand three hundred and thirty-six dollars and forty-four cents, being total sum advanced by you to the Northern Indiana State Prison, we regard as a high compliment, and one, too, that will not be forgotten by the officers of said prison, and we hope that the Legislature will refund the same back to your Excellency at its earliest opportunity.

We take the liberty of renewing the recommendation made in our last report, that measures be taken for the immediate erection of a cell-house, for safe keeping of the prisoners, and the completion of the prison walls. The safety of the prisoners and economy on the part of the State alike demand that this be no longer delayed. By the report of the Warden it will be seen that the estimated cost—

For completing and finishing south wing of Cell House is	\$78,842 68
For completing and finishing the Wall and Towers.....	20,000 00
For completing and finishing offices of Directors and Clerk.....	4,000 00
For completing and finishing Hospital buildings, Kitchen, Women's Department and Chapel... 50,000 00	
For completing and finishing Guard House.....	15,000 00
Making amount required.....	\$167,842 68

These buildings are all necessary, and, when completed, the State will have a prison adequate to its wants, and one that it may well be proud of. We urge that an appropriation of that amount be made.

Some difficulty has been encountered by the Board in consequence of the number of laws in force in relation to the State prisons of the State. Some of these refer exclusively to the Southern prison, some to the Northern, and some to both.

The consequence is, that in many cases the Board are uncertain

which law they are acting under. We would suggest the passage of one general law for the management of both prisons, and applicable equally to each.

Having thus briefly stated the most prominent features relating to the institution under our charge, and our discharge of the high duties entrusted to us, we refer, for further details, to the accompanying reports of the Warden, Clerk, Physician and Moral Instructor, and to our previous report.

Respectfully Yours,

J. H. SWAAR, *Pres't Board.*

R. S. HASTINGS, }
THOMAS TIGAR, } *Board of Commissioners.*

WARDEN'S REPORT.

MESSRS. J. H. SWAAR, THOS. TIGAR, and R. S. HASTINGS,

Directors of the Northern Indiana State Prison:

GENTLEMEN:—In obedience to the requirements of the statute, I herewith transmit to you my annual report, as Warden of the Northern Indiana State Prison, dating from December 1st, 1863, to Dec. 15th, 1864.

It is a source of no little gratification to me, that I am able to report the general condition of the prison, during the past year, as equal to what, under all the circumstances, its most ardent friends could have desired.

This is mainly owing, gentlemen, to your valuable aid, and efficient co-operation, not only in the management and control of the financial affairs of the Prison, but in the direction and discipline of the convicts themselves. It is also, in a great measure, due to the zeal and fidelity with which my corps of assistants have discharged their respective duties, to each of whom I improve this occasion to return my sincere thanks, and acknowledge the obligations I am under for many acts of courtesy and kindness, received at their hands.

DISCIPLINE.

As order is said to be the first law of nature, so discipline—thorough, judicious discipline—should be the first law of a Prison. Not an unwise, arbitrary discipline, intended merely to exhibit authority on the one side, and obedience on the other, but a discipline which, while it retains these essentials, shall employ them in the best way to serve the interests of the State, and improve the condition of the convict.

My first efforts, on assuming charge of the Prison, were directed to inaugurating this state of things—a task of no little difficulty—

but, when once accomplished, it became an easy matter to continue it.

As a part of this general plan, I have, during the last year, worked but few of the convicts outside of the prison walls; in consequence of which, there have been no escapes, with but a single exception, and the convicts have, at the same time, been quite as profitably employed. Those whom I did employ outside of the walls, were, on account of their advanced age, or the short time they had to serve, not liable to escape.

FINANCES.

For a full and complete statement in detail of the receipts and expenditures of the Prison, from the 1st of December, 1863, to the 15th of December, 1864, I would refer you to the comprehensive report of the gentlemanly and efficient Clerk of the Prison, T. D. Bailey, Esq., which is herewith handed you. For the general purposes of this report, I have condensed the same under a few leading heads; to-wit:

Total amount of expenditures.....	\$36,539 10
-----------------------------------	-------------

RECEIPTS.

Received from Gov. O. P. Morton.....	\$18,105 10
Received from convict labor, &c.....	13,592 57
Received for the keeping and medical attendance of U. S. convicts.....	2,069 37
Received from the Treasurer of State, for salaries of Warden and Moral Instructor	2,300 00
Total amount of receipts.....	36,067 04

Statement of the indebtedness of the Prison, which has accrued from the 25th of March, 1863, to the 15th of December, 1864, with the exception of the salaries of the Directors and Clerk, which date from the 11th of March, 1863:

Amount due Directors—Salaries.....	\$5,478 24
Amount due Deputy Warden—Salary.....	1,377 74
Amount due Clerk—Salary.....	1,761 13
Amount due Thomas Word, per vouchers.....	700 00
Amount due T. D. Bailey, per vouchers.....	400 00
Amount due M. A. O. Packard, per vouchers.....	100 00
Amount due H. H. Roberts, for Engraving.....	2,250 00
Amount due J. Sharon—Furniture Warden's House.....	175 00
Amount due J. & W. H. Ward—Furniture Warden's House.....	175 00
Amount due H. H. Walker, per vouchers.....	125 00
Total.....	\$12,542 11

We have on hand in stock, grain and hay, cloth and clothing, shoes and leather, wood within the prison walls, and provisions and subsistence on hand, principally procured the past year, an amount not much less than nine thousand dollars.

A complete and detailed inventory of all the prison property will be found in the report of the Clerk.

It will be recollected that the Board of Directors, which preceded yours, created an indebtedness against the prison to a considerable amount, for which they issued evidences of indebtedness, called "prison scrip."

We found considerable difficulty in arriving at the exact amount of this outstanding scrip, but finally succeeded with the following result:

Amount of Indebtedness of the Northern Indiana State Prison on the 25th of March, 1863.

Total amount of Scrip issued up to the 11th of March, 1863.....	\$64,105 91
Amount of Indebtedness due for which no scrip was issued, and which accrued from the 11th to the 25th of March, 1863.....	968 77
Total Indebtedness to March 25, 1863.....	65,074 68
Added to this the Indebtedness accrued under our administration, noted above.....	12,542 11
And we have Total Indebtedness to date.....	\$77,616 79

This is, of course, exclusive of the thirty-three thousand three hundred and thirty-six dollars advanced by Governor Morton.

It will be seen, by an examination of these figures, that the actual cost of running the prison, during the year just closed, above the receipts, has not been large, especially when we consider the enormous advance in the prices of all articles of subsistence.

The guard expenses is, and ever will continue to be a heavy item, until a good and sufficient cell-house, (the foundation for which is already laid,) shall be completed, when it may be materially reduced.

In point of economy, therefore, alone, to say nothing of the many other advantages attending it, the erection of a good and suitable cell-house should not be longer delayed.

In compliance with your direction, I have procured policies of insurance on the prison buildings, of eighteen thousand dollars; nine thousand dollars in the Relief Fire Insurance Co. of New York, and nine thousand dollars in the Park Fire Insurance Co. of New York, Moore & Straus, agents, at Chicago, Ill.

THE FARM.

In consequence of the great drouth the past season, which was particularly severe upon light sandy soils, the yield of the prison farm was small. In addition to this, we lost about fifteen acres of fair timothy grass by fire, and by the same means a large amount of the farm fence was destroyed, but it is being rebuilt as rapidly as the lumber can be procured.

IMPROVEMENTS.

During the last year we have made many valuable improvements upon the real property of the prison. We have inclosed with a good and sufficient fence above forty acres of land, that was lying out to the commons, and which may now readily be brought into easy and profitable cultivation.

With the help of an old frame, built for the engine house, now no longer in use, I have caused to be erected on the prison land, near the main entrance to the prison, a very comfortable and convenient dwelling for the use of the Warden. The whole was completed in good, plain style, at a trifling cost to the State, not to exceed five hundred dollars.

The same property is now worth not less than fourteen hundred dollars. Surrounding this house, I have laid off and improved a large yard and garden spot, ornamenting the one, and cultivating the other in a manner to make them highly useful and valuable. I have set out upon this spot of ground over one thousand fruit and ornamental trees, besides many grape shoots, strawberry beds, &c. This lot of ground, now so valuable to the State, was one year ago a bleak and unsightly sand knoll; and all this has been done at a trival cost to the State.

HOSPITAL.

By reference to the report of the Physician to the prison, Dr. W. R. Godfrey, it will be found that during a part of the summer there was considerable sickness among the convicts, chiefly flux, but through the efficient skill and attention of Dr. Godfrey, all were restored to health, with but one exception. But notwithstanding this unusual sickness, the hospital account will not be found large.

CONTRACTS.

In April last, under your direction, I contracted with Messrs.

Jones, Chapin & Co., of Chicago, to work from forty to eighty men as Coopers, at seventy-six cents per day. They are at this time working about fifty-five men. They have, besides, hired the use of the Engine, for which they pay two dollars and fifty cents per day, counting every day in the week, whether the same be run or not. They furnish every thing necessary to run the same.

The contract made last year with Messrs. Murray & Potter, Wagon makers, at seventy cents per day, is still in force. They are at this time working thirty-three men. The remaining convicts able to labor, are usefully and profitably employed in general prison labor.

VISITORS.

We were, during the summer, favored with visits from D. M. Miller, Esq., Warden, and Rev. R. J. L. Matthews, Chaplain of the Southern Prison, also from Col. Terrell, Financial Secretary of His Excellency, Gov. Morton, and Hons. Jos. Ristine, Auditor, and James S. Athon, Secretary of State, each of whom expressed themselves well pleased with the general condition and management of the prison. This, from gentlemen of their acknowledged skill and judgment in such affairs, was a compliment much esteemed by us. We were also visited by two gentlemen, Messrs. Tomlinson and Moody, of the Society of Friends, who were making it their business to look after the condition of convicts in different parts of the country. We afforded them every facility we could for the purpose of their visit, and they left us apparently well pleased with the Prison and its discipline.

COMPLETION OF THE PRISON.

It may appear almost useless on my part to direct your attention to the necessity of an early completion of the Prison,—a fact that has not failed to impress itself upon your minds—but, feeling the importance of the matter, I cannot willingly suffer any opportunity to pass without presenting it.

Is it not a little singular that men will not bring to the discharge of public affairs the same wisdom and judgment that they employ in the commonest concerns of life? What would be thought of that man, who, undertaking to build a mansion for himself, would be content to live in it as best he might, half finished, leaving the work he had done open to waste and destruction, by reason

of his failure to complete the structure? He certainly would establish no very enviable character for wisdom and prudence.

The illustration is in point. The State has undertaken to build for herself a Prison at this place. None can reasonably question the necessity of such an institution, or that, if completed according to the plan proposed, it does not promise to be as useful and profitable to the State as any other institution of the kind in the country.

A part of that prison has been completed, and is in as successful operation as can be, under the circumstances; but the part already completed, and the part unfinished, are now suffering waste from a failure to complete the whole. Nor is this the only evil. The Prison never can be made such as it should be, and such as it may be—self sustaining—until it is completed, no more than a man can enjoy the comfort, convenience and security of a home, with a house half-finished.

But it is urged that the cost will be necessarily heavy. That is very true. But is it likely to be any the less by delay? It *must* be greater. Every principle, therefore, of economy and prudence, calls for the immediate completion of the Prison, and it is to be sincerely hoped that the honorable and intelligent Legislature of Indiana will not fail in their plain duty in this matter. I would further suggest, that when building contracts are let, that they be let without any reference to the employment of convict labor. There are several reasons for this. First—the convicts can be more profitably employed by letting them to manufacturing contractors, than at the rate provided by law that they shall be hired to building contractors. Secondly—contractors will make their estimates lower, when they are left free to employ their own workmen, and, lastly, the consequent greater liability to escape, and the increased expense of guards will be avoided.

The following estimates, for the respective classes of work, are taken from the Report of 1860, to which I have added 100 per cent., to correspond with the advanced price of labor and materials.

For completing and finishing the South Wing of the Cell House.....	\$78,842 63
(This is the first estimate made in 1860, but the foundation of the Cell House is laid, and the grates for the windows are on hand.)	
For completing and finishing the Walls and Towers	20,000 00
For completing and finishing the Offices for Directors and Clerk (foundation laid).....	4,000 00
For completing and finishing Hospital Buildings, Kitchen, Women's Department, and Chapel..	50,000 00
For completing and finishing the Guard House.....	15,000 00
Total amount required.....	\$167,842 63

There remains but a single subject to which I desire to call your attention, and that is the proper estimates for the support of the

Prison for the ensuing two years. We have made these estimates upon the most careful investigation, and upon that settled maxim of public affairs,—judging of the future by the past,—but, of course, any material fluctuation in the state of the currency, and the consequent advance or decline of the prices of every thing, would affect the correctness of our estimates, either in making them too little or too great.

We would, therefore, ask an appropriation of thirty thousand dollars for the support of the Prison for the ensuing two years. This sum, we believe, will be amply sufficient.

With a grateful sense of many kindnesses and courtesies received at your hands during our official relation together, I am, gentlemen, very truly yours,

THOS. WOOD,
Warden.

Engine and fixtures.....	3,000 00	
Furniture in Warden's house.....	375 00	
Total amount.....		<u>\$21,983 31</u>

PHYSICIAN'S REPORT.

HOSPITAL DEPARTMENT,
NORTHERN INDIANA STATE PRISON,
MICHIGAN CITY, December 15th, 1864. }

*To Messrs. Swaar, Hastings and Tigar,
Board of Control:*

GENTLEMEN:—The fifteenth of December being the time appointed for the officers of the Northern Indiana State Prison to report to your Honorable Body, I herewith submit the following statement of the sanitary condition of the Prison, and the health of the inmates thereof. The health of the convicts was good during the fall and winter months, with exception of slight indispositions incident to the season of the year, such as coughs, colds, and slight attacks of lung fever, which were easily controlled. From the first of April to the first of July there was scarcely any sickness. During the month of July derangements of the stomach and bowels were quite frequent, assuming the character of simple diarrhœa. On the last day and night of July it seemed to assume the character of an endemic, and at my morning visit upon the first day of August I found forty-five patients in the Hospital who had been carried there during the night, all of whom had been attacked and were then suffering in various stages of severity under a typhoidal dysentary and flux, and during the day and night following some thirty-five more were added to the sick list. Some cases were very severe, while others were mild. The milder ones yielded to treatment in from six to ten days, while the severer ones continued from two to three weeks. There were but eight or ten convicts who escaped the epidemic. I am under great obligations to the Warden and other officers of the Prison for their courtesy to myself, and their kindness and untiring efforts in assisting me in the care of the sick. Nothing was left undone by them that could add to their comfort. There have been two deaths since my last report; Jackson Bonden, (colored) died June 24th, 1864, of Consumption; Isaiah Wansetler died August 28th, of dysentary. He had been previously attacked by the same disease the

first of the month of which he recovered in about a week, then was sent below, where he remained four or five days when he injudiciously drank a pint of vinegar, and in less than twenty-four hours was brought back to the Hospital with a relapse of his disease, of which he died—being the only one who died with disease of the bowels. There is one convict to whom I wish more particularly to refer. John Blissford was sent to Prison from Allen County for a term of twenty years. Said Blissford, about the fifteenth of April last, attempted suicide by hanging himself, but before the act was fully consummated he was rescued, since which time he has been insane. He was thoroughly treated in hopes that absorption would take place and he gain his reason, but all remedies have signally failed in his case, and he still remains hopelessly insane. I would recommend that an effort be made to get him removed to the Insane Asylum at Indianapolis, for I think his chances for gaining his reason while confined in this Prison very slim. Every attempt at enforcing discipline on any of the convicts or any unusual noise about the Prison sets him raving, and he becomes unmanageable, and thereby making it dangerous to have him at liberty in the Prison. Owing to the excellent sanitary condition of the Prison we have had no case of typhoid or other kinds of fever during the fall months. One convict has the consumption; the balance are enjoying good health, well clothed and fed, cheerful, and able to do their tasks and eat their rations. I cannot close my report without once more and emphatically bearing testimony to the fact, that my labors as Prison Surgeon have been made comparatively light and pleasant by the excellent sanitary arrangements pervading the establishment, and the voluntary assistance rendered me by the officers of the Prison, in what I considered a critical period of its history.

Respectfully submitted,

W. R. GODFREY,

Physician.

REPORT OF MORAL INSTRUCTOR.

MICHIGAN CITY, December 10th, 1864.

*To the Honorable Board of Control
of the Northern Indiana State Prison.*

GENTLEMEN:—As Moral Instructor, I have promptly fulfilled the functions of the office with great pleasure to myself, and I trust with general satisfaction and profit to the convicts committed to my charge.

Of the one hundred and fourteen prisoners, nine were found that could neither read nor write, and thirteen that were unable to write. Instructions in reading, writing and arithmetic, therefore, have been promptly imparted to those who were deficient in these branches, all of whom, to a greater or less extent, have improved beyond our most sanguine expectations.

It was found upon examination that seventy-five of the convicts had been in their earlier years, subjects of Sabbath School instruction, doubtless in a partial degree; and thirty-eight had been connected with some branch of the Christian church; of many of these hopes are entertained of permanent reformation.

To all the convicts lectures on the Old and New Testament have been consecutively delivered on every Sabbath. In these lectures they have manifested unusual interest.

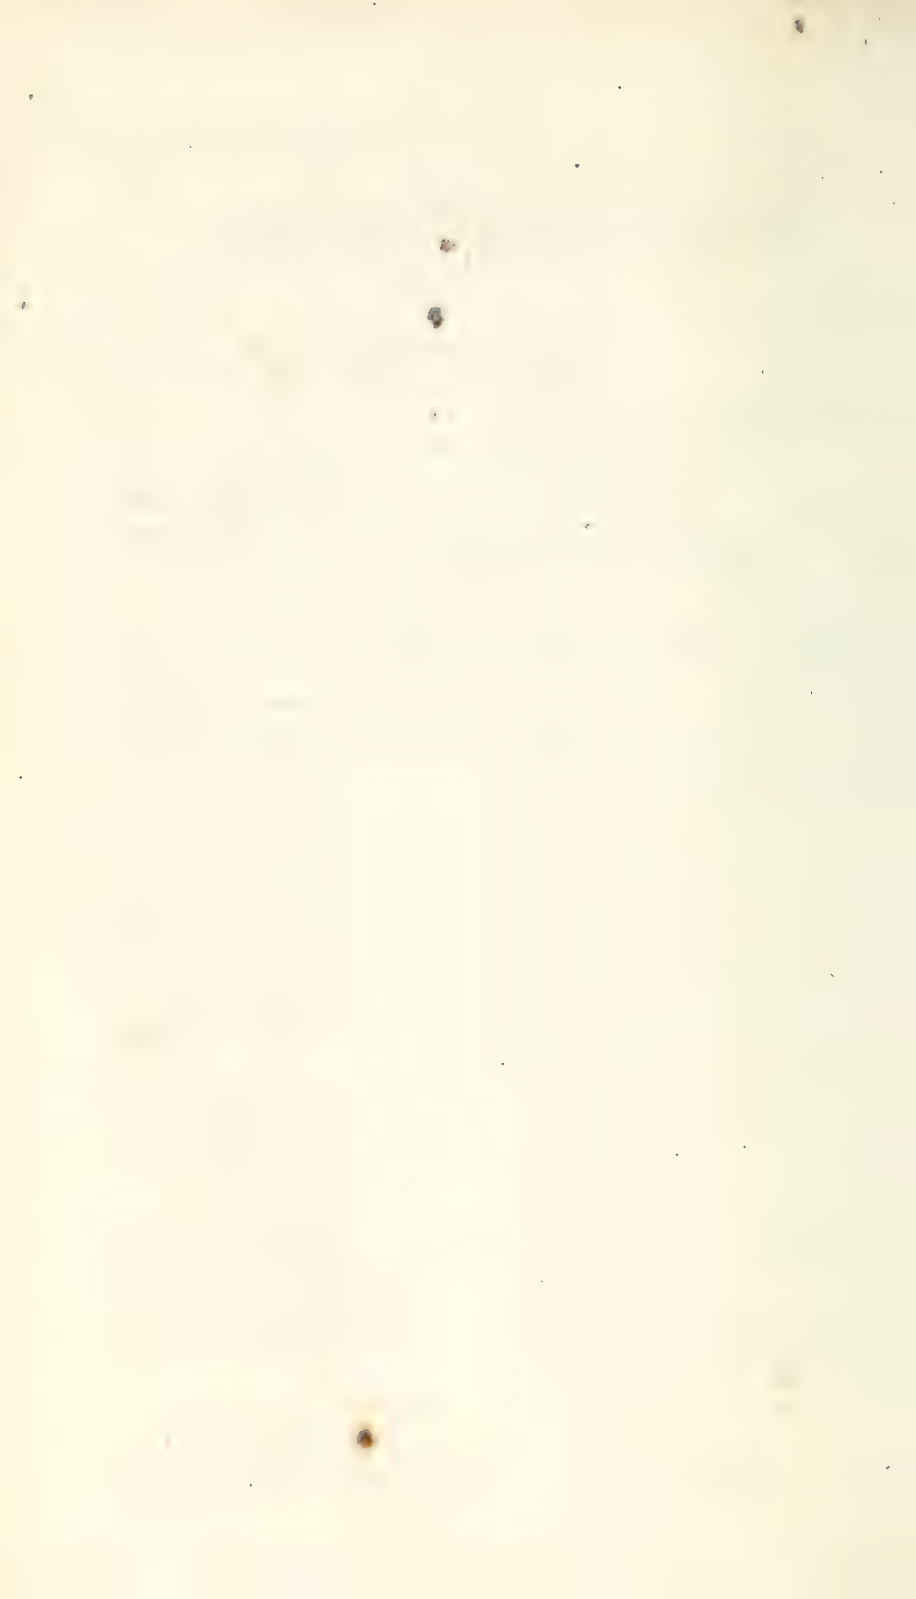

The Library is kept in good order, and with the exception of ordinary wear and tear, the books are in very good condition. The prisoners manifest no ordinary interest in perusing the books which are received from the Library once a week.

I shall close my labors at the end of the current year, indulging the fondest hope, that as no labor has been spared for their moral improvement, lasting impressions have been made on their minds that will tend to promote their interests and welfare here and hereafter.

All of which is respectfully submitted.

F. P. CUMMINS.

Moral Instructor of Northern Indiana State Prison.

APPENDIX.

DETAILED STATEMENT of Expenditures at the Northern Indiana State Prison, from December 16, 1862, to March 25th, 1863, Hiram Iddings, Warden, Hon. Hugh Hanna, President Board of Directors, as shown by the books of the Prison.

REPORT

OF THE

STATE DEBT SINKING FUND

COMMISSIONERS.

TO THE LEGISLATURE:

INDIANAPOLIS:

JOSEPH J. BINGHAM, STATE PRINTER.

1865.

REPORT.

To the General Assembly of the State of Indiana:

The State Debt Sinking Fund Commissioners respectfully report the proceedings of said Board, in relation to said Fund, since the last meeting of the General Assembly.

The table appended hereto will show the number of Bonds and Stocks purchased; the date of purchase; from whom they were purchased, and the amount paid for the same.

By this statement, it will be seen that the Bonds and Stocks purchased amount to the sum of six hundred and seventy-nine thousand eight hundred and eighty-three dollars at a cost to the State of six hundred and thirty thousand nine hundred and forty-five dollars and forty-one cents, being forty-eight thousand nine hundred and thirty-seven dollars and fifty-nine cents less than the amount represented upon the face of such Bonds and Stocks.

The Board also call the attention of the General Assembly to the fact, that by the report of the Auditor of State, made at the present session, it appears that there was due to this Fund from the State, on the first day of November, 1864, the sum of \$501,163.49, to which amount there is to be added \$12,099.84 for delinquent taxes since collected and due this Fund for 1863, which, added to the amount named of \$501,163.49, makes the aggregate of the Fund \$513,263.33 due from the State at this date. Since the first day of November there has been drawn from the Fund \$30,000 to pay the interest due on the War Loan Bonds outstanding. There has also been purchased since November 1st, 1864, Bonds and Stocks costing the sum of \$216,525.00, making the nett balance of this Fund, in the Treasury of the State, \$266,738.33.

The undersigned, two of said Commissioners, would state that \$50,000 was placed, by order of said Board, and under the authority of the law directing the disposal of this Fund, in the hands of

the Agent of State, to be expended in the purchase of the bonds and stocks of the State. Up to this date, no report of the expenditure has been made, except for the sum of \$2,550. This sum of \$50,000 so advanced, forms no part of the above balance of \$266,738.33, as the same was charged to this Fund in the report of the Auditor above referred to, and the State has been credited therewith.

The taxes levied for the express purpose of the ultimate extinction of the public debt was set apart specially for that object, together with the unappropriated balance of moneys in the Treasury. At present the $2\frac{1}{2}$ per cent. bonds of the State can be purchased at from sixty-eight to seventy cents: the 5 per cents at about ninety cents. In anticipation of the near approach to maturity of these bonds (the $2\frac{1}{2}$'s), when the holders will most probably demand an increased rate of interest, we deem it for the best interests of the State that the unexpended balance in the Treasury should be invested at an early day as practicable, and we recommend such disposition of the fund.

Our experience suggests one amendment to the present law regulating this fund, and in that regard legislative action is necessary. As the law now stands, the Agent of State, under sec. 8 of the act of 1861, is the only person authorized to invest the fund. The delinquency recently occurring has led the undersigned to recommend that the act referred to be so amended as to give authority to either of said Commissioners to make purchases under the rules and regulations now prescribed by law. The fact that the bonds and stocks of the State are held in various localities, an amendment of this kind will add to the facilities for their purchase beyond what is afforded in the city of New York alone.

The Bonds and Stocks purchased and set forth in this report have been, with the exception of \$3,000, purchased by the undersigned with the consent of the Agent of State, without whose authority the money could not have been thus invested, as the undersigned felt unwilling to place additional funds in his hands until the aforesaid \$50,000 was accounted for.

Respectfully submitted,

J. RISTINE, }
M. L. BRETT, } *Commissioners.*

INDIANAPOLIS, January 7th, 1865.

TRUSTEES' REPORT.

*To His Excellency, O. P. MORTON,
Governor of the State of Indiana:*

Since the adoption of our present State Constitution, by which biennial instead of annual sessions of the Legislature were instituted, it has been the custom of the Trustees of this Institution, save in a single instance, to make their yearly reports alternately to the Legislature and the Governor. Whereas, by reference to the Statutes of Indiana, vol. 1, chap. 145, it will be seen that we are required by law to report every year to the Governor. Therefore, in obedience to this requirement, the undersigned would respectfully beg leave to lay before your Excellency the following summary, as the "Eighteenth Annual Report" of the Board.

It is with more than ordinary satisfaction that, despite the unfortunate omission of the last general assembly to make the needful appropriations for the support of the Institution under our charge, we are permitted, through your enlightened policy, to report another year of prosperity in its mission of usefulness to the blind children of the State. Were it not for your timely aid, in providing the necessary funds, upon your own responsibility, they must, under the circumstances, have suffered the misfortune of remaining at home in helpless ignorance for two years or upwards; while the efficiency of the Institution, for years to come, must have been materially impaired by its suspension for so long a time. Such a calamity would have been greatly deplored, not only by those immediately interested, but by every intelligent citizen of the State, without regard to party affiliation. For the people of Indiana are of one heart in their desire for the uninterrupted prosperity of her benevolent institutions—the noblest monument of her Christian philanthropy.

By reference to the annual communication of the Superintendent, which is herewith submitted, as a part of this report, it will be seen that a larger number of pupils were in attendance during the past year than ever before; and that the several departments of the Institution, organized for their care and instruction, have been conducted by the respective officers in charge, with commendable zeal and fidelity. While the abstract of expenditures inserted below exhibits the gratifying fact that the strictest economy has been practiced. Notwithstanding the continued increase in the prices of all kinds of supplies and labor, the expense, per capita, of maintaining and instructing the pupils, exceeded but little that of the previous year, and was considerably less than in some years before the war. This result, allow us to say, has not been attained without the most careful supervision on the part of the Board, as well as of the Superintendent.

The report of our Secretary, also hereto appended, shows the various items of expenditure, as passed upon by the Board, amounting, in the aggregate, to \$20,773 65. Warrants for \$1,180 25 of this amount, were drawn upon the Auditor of State, and paid from money refunded by counties, on account of clothing furnished to the pupils by the Institute. The remaining warrants, amounting to \$19,593 40, were drawn upon yourself, as shown in the "Secretary's Report"—Appendix A.

The following abstract, made from the accounts allowed by the Board, as detailed in the report alluded to, contains a classified statement of the year's disbursements:

On account of fees and mileage of Board of Trustees, and salary of their Secretary	\$ 500 80
On account of salaries of Teachers and other subordinate officers.....	2,505 00
On account of wages of Employees	2,370 66
On account of Groceries and Provisions.....	9,635 08
On account of Stable Expenses.....	420 63
On account of Fuel and Lights.....	2,326 31
On account of Drugs, Medicines and Medical attendance.....	296 23
On account of Clothing and Traveling Expenses of Pupils.....	1,293 16
On account of Postage, Telegraphage and Revenue Stamps.....	54 85
On account of School Apparatus, including musical instruments.....	102 72
On account of Books, Stationery and Printing.....	88 15
On account of Tools and Fixtures for Work-shops.....	23 80
On account of House-furnishing Supplies.....	612 71
On account of Laundry, Cooking, Warming, Bathing and Lighting Fixtures.....	290 75
On account of Repairs on Premises.....	252 80

\$20,773 65

Eight hundred dollars of the Superintendent's salary were paid by the State Treasurer, out of the general fund, on the warrant of the Auditor, under the Act for the payment of the salaries of public

officers; together with the further sum of seventy-five dollars, on account of the salary of the attending physician; being the balance of a specific appropriation, made by the Legislature of 1859. For these amounts, no warrants were issued by our Board; but, in order to get at the actual expenses of the Institution, they should be added to the total amount of our warrants, as above; and from the sum thus found, \$21,648 65 should be deducted, the amount refunded by counties on account of pupils' clothing expenses—\$1,177 42; which would leave 20,471 23, as the real expenses of the Institute, for the year.

Allow us, in this connection, to call attention to the inadequacy of the rate of compensation fixed by law for the Superintendent of this Institution. His present salary, including a specific appropriation of two hundred dollars, is but one thousand dollars per annum; while that of the Superintendent of the Institution for the Deaf and Dumb, including a similar appropriation of four hundred dollars, is one thousand four hundred. This, too, despite the fact that the former is burthened with the duties of Steward, in addition to those of Superintendent, without receiving extra compensation therefor; whereas, the latter is provided with the assistance of a competent Steward, at a salary of eight hundred dollars. Thus, for the sum of one thousand dollars per annum, the Superintendent of this Institution performs the same amount of service, as that for which twenty-two hundred dollars are paid in the Institution for the Deaf and Dumb. Why this difference was made by the Legislature in prescribing the rate of compensation for these two public officers, we have never been able to understand; but have always regarded it as unjust. Had our board possessed the legal authority to do so, we would long since have yielded to the claims of justice, and placed the salary of our Superintendent at a figure which would be commensurate with the services rendered. The present salary was fixed some years since, when the expenses of living were far below those of the past two or three years; and even at that time, was disproportionate to the arduous duties of the office. What then can be said of it in times like the present!

We trust that your Excellency will take this matter under consideration, and make such recommendation to the next General Assembly as you may deem just, in the premises.

For a detailed account of the condition and wants of the several departments of the Institute, you are again referred to the accompanying Report of the Superintendent. The various suggestions of

that officer, are worthy of the most serious consideration, based as they are, upon an experience of more than a quarter of a century, in the care and education of the blind. We fully agree with him in the conviction, that it is the duty of all concerned, to make every needful provision for placing our Institution upon a par with the best in the country, in its educational appointments.

Concerning the matter of constructing works for warming the Institute buildings by steam, we need only add to what has been said by the Superintendent, that we have ever felt the deepest solicitude upon this subject; and have, from time to time, urged its extreme importance upon the Executive and the Legislature. We most earnestly hope, therefore, that the required steps may be taken at the coming session, to place our buildings in a condition of comfort and entire safety to its unfortunate inmates. Should they ever meet with the awful calamity which is at any time possible, with our present dangerous method of warming by common stoves throughout the building, it would cast a fearful responsibility upon those who might have prevented it by a timely provision.

Of the necessity for repainting the interior of the main building and the fences enclosing the grounds, in order to their preservation and better appearance, we have already spoken in previous reports; and again beg leave to urge this improvement upon the attention of Your Excellency and the Legislature, together with the needed repairs upon the fences, and the required supplies for the school and household departments, alluded to in the "Superintendent's Report."

To the recommendations of the Superintendent, upon the subject of modifying the law which provides for the clothing of our pupils, your attention is also particularly directed. The present allowance of twenty dollars per annum is obviously too limited; and we are not sure but even forty dollars, the sum suggested, will be found insufficient for the purpose, at present prices. The other proposed changes in the law referred to, are likewise important.

It is hardly necessary to explain, that, in view of the present high prices of every kind of labor and supplies, which are without a parallel in the history of our State, our estimates for the support of the Institution during the next two years, and the other objects of expenditure alluded to above, must be considerably larger than in previous years, when a different state of things prevailed. We have also to take into account that our school is annually increasing in numbers.

The estimates of appropriations needed are as follows :

For Current Support of Institute from Feb. 1, 1865, to Feb. 1, 1866.....	\$25,000
For Steam-heating Fixtures and the necessary Buildings therefor.....	20,000
For Painting Building, and Repairing and Painting Fences.....	2,000
For Purchase of additional Pianos and School Apparatus.....	2,000
For Replenishing Mattresses, Bedding, Carpeting, etc.....	2,000
For Current Support of Institute from Feb. 1, 1866, to Feb. 1, 1867....	25,000

The foregoing estimates are based upon the present prices, but should any considerable advance take place before the expiration of the two years covered by them, they will undoubtedly prove too low. We would therefore suggest that the Legislature make provision in some way to meet such an emergency. The simplest way to do this would be to add a sufficient sum, say five thousand dollars, per annum, to our estimate for current support. If this is objected to, a contingent fund might be placed in the custody of the Executive, or officers of State, to be drawn upon in case of necessity. In any event, no more would be expended by our Board, than the actual requirements of the Institution should demand.

In conclusion, the undersigned would earnestly invite your Excellency and the members of the Legislature at the coming session, to make a full examination into their official acts, and the condition of the Institution under their charge ; doubting not that both will be found to meet the cordial approval of all concerned.

Respectfully submitted,

ANDREW WALLACE, *President.*

JOHN S. SPANN, }
JOHN BEARD, } *Trustees.*

Attest: T. A. LEWIS, *Secretary.*

INDIANAPOLIS, Nov. 1, 1864.

APPENDIX A.

Of the foregoing warrants, Nos. 425 to 438, and 440 to 451, all inclusive, amounting to \$1,180 25, were drawn upon the Auditor of State, and paid by him from money refunded by County Treasurers, on account of clothing furnished to pupils.

The rest, amounting to \$19,593 40, were all drawn upon the Governor.

T. A. LEWIS, *Secretary.*

APPENDIX B.

SUPERINTENDENT'S REPORT.

To the Board of Trustees:

GENTLEMEN:—In presenting for your consideration as the Eighteenth Annual Report of the Superintendent, the following summary of the operations of the several departments of our Institution since the date of his previous report, the undersigned feels warranted in premising that the past year will be found to have been fraught with a degree of prosperity not exceeded, if indeed equaled, by that of either of its predecessors. This, too, in the face of unprecedented difficulties, arising out of the disturbed condition of all business relations throughout our State, in common with the nation at large. If, in ordinary times of State and national prosperity, such a palpable manifestation of the blessing of Divine Providence upon our joint labors in behalf of the interesting charge committed to us, should call for expressions of profound gratitude, how much is such an obligation enhanced in times like the present. Truly is our enterprise in the keeping of “Him who doeth all things well.”

ASSISTANT OFFICERS.

With the few exceptions mentioned below, our corps of assistant officers remains the same as at the date of my last report; and I am happy in being able, as heretofore, to bear testimony to their continued fidelity and increasing usefulness in the discharge of the onerous duties assigned them in their respective spheres. They are again commended, without reservation, to the confidence and esteem of your Board.

On the 10th of May last, Mrs. H. A. Moore, who had occupied a teachership in the Literary Department for nearly three years, closed her connection with the school, in accordance with a pre-

vious tender of her resignation. She was an able teacher, and, from a course of zealous devotion to the interests of her pupils, as well as the Institution at large, had established herself in the confidence and kindly regard of the entire household; for which reasons, her departure from our midst was a source of regret to all.

On account of the nearness of the approaching summer vacation, Mrs. Moore's place remained unoccupied until the commencement of the present session, when it was filled by the transfer of Miss P. Hawley to the Literary Department exclusively, she having been previously engaged, for the most part, in the charge of the female branch of the Handicraft Department, as explained in my last report.

A large increase in the number of young pupils, at the opening of the present session, rendering an extended classification of the school imperative, the necessity for an additional teacher in the elementary branches was created; and this want was supplied by the appointment of Miss Carrie L. Sawyer as such teacher.

In the Handicraft Department, the place made vacant by the transfer of Miss P. Hawley, as above stated, together with that of an assistant whose services had been dispensed with, was filled by the employment of Miss L. D. Hawley, who devotes her whole time to the duties of this Department, and is paid for the same out of the profits accruing from the sale of articles manufactured.

With the improved organization here indicated, the work of instructing the pupils has been greatly facilitated; and the present session, taking the portion already passed as an earnest of the future, may be regarded as an exceedingly useful one to them. But I cannot consent to pass from this subject without expressing the conviction that the present compensation of our assistant officers is not sufficiently remunerative for the times. Their respective salaries were fixed at a time when the prices of clothing and other necessaries were very far below those now prevailing, and justice would seem to dictate such an increase of their pay as would be proportionate to their enhanced expenses. Your earnest consideration of this matter is respectfully solicited, in full confidence that you will be found willing to deal justly with them.

PUPILS.

At the beginning of the year, Nov. 1, 1863, our roll contained the names of eighty scholars, as per last report. Subsequently

twenty-three new pupils were received, making the entire number connected with the Institute, during the year, one hundred and three. Of these, forty-one were males; and sixty-two females. For a list of their names, places of residence, etc., see the accompanying catalogue, marked Appendix D.

All but one, a paying pupil from the State of Michigan, were residents of our own State, and as such, were supported at the expense of the Institution.

The following table shows the number received from each of the several counties, respectively:

RESIDENCE.		Males.	Females.	Total.

From the foregoing, it will be seen, that during the past year the Institution dispensed its benefits to a larger number than in any previous year since its establishment. And had it not been deemed necessary by your Board, to reject all applicants above twenty-one years of age, until the Institution shall have been again provided for by legislative appropriation, our numbers would have been much larger; for applications from persons of the class named, have been unusually frequent for the past two years. Such do not come within the limits prescribed by our regulation as to the ages of pupils, it is true, but it had been our custom to make exceptions in favor of those adult applicants who possessed good moral character, coupled with ability to learn some useful trade which might prove a means of self maintenance. This humane policy prevails in most of the institutions for the blind of other States, and it is hoped you will sanction a return to it in ours, so soon as the pecuniary means at your disposal will justify such a course.

Of the one hundred and three pupils enrolled during the year, twenty-eight received their discharge, or informally terminated their connection with the school, leaving seventy-five names upon the roll at the date of this report.

The following are the names of those who left during the year:

Jonathan L. Dix, Thomas W. Huckin, William S. Manning, Lawrence D. Taylor, Frederick W. Winter, Elizabeth R. Armstrong, Sophia Bixler, Louisa Briggs, Juliette G. Bryant, Catherine E. Dixon, C. Anna Green, Lucina E. McClellan and Harriet F. Scott, were honorably discharged, as having completed their studies in full, or so far as was deemed expedient.

John W. Best, Frances B. Livingston, Mary J. Watson, and Mary J. Anderson, were obliged to discontinue their studies on account of feeble health. The first three of these died with pulmonary consumption, after returning to their homes. They were all exemplary pupils, and their memory is kindly cherished by their former associates.

Henry Lemon, M. Elizabeth Hamilton, Minerva J. Hungate, and Esther Lemon, have removed with their friends out of the State.

Joseph Green. Charles M. Frazier, George Mathies, Emily A. Miles, Mary E. McGee, and Hannah Vasbinder, were informally discharged, as being, from various causes, disqualified for continuance in the Institution.

Sarah A. Davis, after a short stay with us, was recalled to her

home on account of the sickness of her mother; and, for some unexplained reason, has not returned.

SCHOOL DEPARTMENT.

The same branches of study, literary and musical, as were reported last year, have, with no essential variation, continued to form the routine of school exercises; and the results of the year just closed have been, for the most part, similar to those of previous years. The course of study, and the advancement made in the various subjects composing it, have been so often adverted to in preceding reports, that it would seem unnecessary to occupy space here with a recapitulation of details with which you are already familiar. Suffice it then, to say, that the progress of the school has been in every way commendable, both to the pupils and the teachers engaged in their instruction.

Your attention has already been called, on several occasions, to an existing lack in our Institution, of some essential appurtenances in the way of appropriate apparatus for furthering the business of instruction; and I beg leave to again urge upon you, the importance of supplying this want as soon as the State Legislature can be induced to provide the requisite means. Ours is the only Institution for the blind, of any size, which is destitute of a church organ; and yet the necessity for such an instrument is just as urgent with us as it is with others. Without it we are unable to give those of our pupils who expect to gain a livelihood as musicians, such a preparation as is furnished in other establishments of the kind. We also need, to make our music department complete in its appointments, several additional piano-fortes, besides other instruments. In the school-rooms, we want more raised books and maps; more ciphering frames, with their accompanying figures; more, and superior appliances for writing; a complete set of philosophical apparatus; and a collection, more or less extensive, of specimens, models and tactual illustrations of various objects in the domain of Nature and of Art. The last named, should embrace a variety of mineral and metallic substances, the more important products of the Vegetable Kingdom, as well as that of Animated Nature; a human skeleton, and representations of the different organs of the body; types of the different races of men, and busts of individuals with distinctive mental characteristics; the constituent elements of Architecture, with their several combinations into the different or-

ders; models of the various implements and machines in general use, etc. etc.

The collection just named would admit of indefinite extension, and every article added to it would increase its usefulness just so much. Its paramount importance, however, among the agencies employed in the instruction of the blind, may not, at first view, be obvious to you, but a little reflection will make it apparent. In schools for the seeing, the subject of Object Teaching has, of late, claimed a large share of the attention of our best educators, and its value is, on all hands, highly estimated. This, too, in full view of the circumstance, that the pupils of such schools are possessed of the faculty of vision, which, above all the other senses, facilitates the acquisition of a correct knowledge of existing objects, even in the walks of daily life, without the intervention of special means for its attainment. What, then, cannot be said in favor of the prime necessity of the employment of these special means in the instruction of a class of persons who, being deprived of the important sense alluded to, must depend upon the circumscribed powers of an inferior one for the acquirement of similar knowledge. Think you, but for a moment, upon the far reaching scope of the mind, through the medium of the visual sense, gathering into its never filled storehouse, almost at a single impulse, a specific knowledge of the countless objects embraced within the horizon of the beholder, and contrast this *extended* view with the blind child's *contracted* horizon, whose radius terminates at his finger-ends, and whose area is but slowly traversed by his tactual sense. You will then begin to realize the necessity of bringing within his reach the many objects which would otherwise be inaccessible to him, and wonder, not at our asking for so much to aid him in his search after objective knowledge, but rather at the marvelous results of his slow, patient toiling after the mental aliment which is acquired by you with so little effort. Perchance, too, you will find here, fresh cause to admire the beneficence of that compensating law by which Divine Mercy "tempers the wind to the shorn lamb."

The present may be an inauspicious time to call for all that is required to place us upon a par with the older institutions of the Eastern States, but it is not unreasonable to hope that some of our more urgent wants may be provided for by the Legislature, soon to convene, if the subject be properly presented to them. At all events, I do not feel that I can fully discharge the trust confided to me, without keeping your Board apprised of our necessities, let

the result be what it may. Very much is expected of us, in the matter of unfolding the minds of our pupils, and training them for self-maintenance ; as much, perhaps, as of those institutions which are supplied with the requisite appliances for instruction. But these expectations can be realized only so far as the means provided are commensurate with the end to be attained. It is true, as has been stated, that our school is making commendable progress, notwithstanding the obstacles with which our teachers have to contend ; but it is plain that with enhanced facilities, their labors would be correspondingly increased in fruitfulness.

On account of the peculiar difficulties to be overcome in adapting instructional appliances to the condition of students who are deprived of the sense which constitutes the main channel relied upon by others for conveying to the mind that objective knowledge which is essential to the proper unfoldment of its powers, and the consequent expensiveness of constructing such appliances, after they have been devised, even the most fortunate of our schools for the blind are but scantily provided with instrumentalities of the kind in question, as compared with educational establishments for the seeing ; whereas it is patent, even to the most inexperienced, that the requirements of the former, in this respect, far exceed those of the latter. It surely needs no argument, then, to enforce so palpable a duty as that which requires of those who are entrusted with the supervision of the education of the blind, in whatever capacity, should provide their instructors with every possible facility for overcoming the obstacles presented by their disability. What if the cost of such provision is greater than in the case of those who are endowed with all their senses ? If the proper education of the latter class, with their superior natural advantages, is deemed of such paramount importance as to call for vast expenditures on the part of every commonwealth, in furtherance of its attainment, how much more loudly does the helpless condition of the former plead for equal privileges, and even superior ones, so far as they can be furnished. If a humane and enlightened policy demands so much in the one case, it certainly demands no less in the other.

It is clear then, that even should our institution be put in possession of every device now in use in similar establishments, our whole duty will not yet have been discharged. The business of instructing the blind is comparatively a new one ; and there still remains very much to be done, ere it arrives at a state of completeness in its appointed agencies, which will compare favorably with

the present advanced condition of other departments of education. Hitherto, the labor and expense of preparing books and originating apparatus, have mainly been borne by a few of the pioneer institutions of our country; and those have been furnished to the remainder, at the mere cost of duplication. But the burthen has proved a heavy and exhaustive one to them, notwithstanding the liberal aid they have received from public and private munificence; and it is meet that each institution should bear its proportion of the onerous burthen. This can best be done through some united effort in the direction of multiplying appropriate instrumentalities, whether in the way of books or school apparatus. But if such a concentration of means should prove impracticable, which may be the case, then each institution ought, by separate action, to set itself to work in earnest for the origination of such instrumentalities, keeping in mind, as far as may be, the general good of the whole.

In the matter of printing, several efforts have already been made, to combine the action of those interested, in the formation of some feasible plan for increasing our now scanty stock of text books and general reading matter. Among these, was the calling of a convention of the superintendents and teachers of all the institutions for the blind, in the United States, to take the matter under consideration. This convention met at the New York Institution, in August, 1853, and was well attended, nearly all the institutions being represented. Various resolutions, looking to the advancement of the object in question, were discussed and adopted; and a committee appointed to memorialize Congress for a grant of land, to aid in the formation of a national printing fund. But, for some reason, Congress was never so memorialized, and the effort in that direction, remains just where the convention left it at its adjournment.

Another movement was subsequently inaugurated, which, if not defeated by the present unfortunate condition of our country, promises better success. Mr. D. Sherrod, a blind gentleman of the State of Mississippi, several years since, conceived a plan for the establishment of a "National Printing House for the Blind," to be endowed by legislative appropriations and private contributions. And after canvassing several of the Southern and Western States for the furtherance of this object, he has succeeded in obtaining a charter from the Legislature of Kentucky, for the proposed institution, as well as the sum of twenty-five thousand dollars required

by that charter before the printing house should commence operations. Several of the States have appropriated liberally to the fund; and hundreds of individuals have subscribed greater or less amounts.

The printing house is located in Louisville, and is under the management of a Board of Directors, appointed by the Legislature of Kentucky. A press and the necessary types have, I believe, been purchased; and other steps have been taken towards a practical commencement of the enterprise. But of the exact amount of progress, made thus far, I am not informed. There is ground for confidence, however, that with proper encouragement from the friends of education throughout the country, this enterprise may yet be made productive of great good to the blind.

If a similar effort could be organized for the preparation of instructional apparatus, or the scope of the present organization so extended as to embrace this object, we might be permitted to hope for the approach, at no distant time, of the day when all our institutions will be amply provided with superior appliances of the kind in question, instead of the rudely constructed make-shifts with which we are now, for the most part, compelled to content ourselves. The laws of Political Economy, which regulate the supply of articles in ordinary use, are of little or no effect in this case, inasmuch as the demand for such things as we need, is too limited to stimulate individual enterprise and competition in the matter of their production.

Still another source of hope for a more extended supply of reading matter, in raised letters, for the blind, was, before the war, held out to the friends of the cause. Some fifteen or twenty years ago, Mr. H. F. Walworth, a gentleman of large means, then residing in the South-eastern part of the State of Arkansas, and being himself blind, declared his intention to bequeath a liberal portion of his wealth to this object. His plan was, to establish a magazine or newspaper, to be distributed gratuitously among the educated blind of the Southern States, so that they might be kept informed upon the current news of the day. Believing that a greater benefit would be conferred upon the blind reader by furnishing him with a library of standard works, than by the contemplated periodical, some of us to whom he confided his intention endeavored to prevail upon him to modify his plans in accordance with this view. But it would seem, from the following notice,

which appeared some months since in the newspapers, that he adhered to his original design :

“ Horace F. Walworth, late of West Baton Rouge, Louisiana, has left half of his property, or about \$250,000, for the purpose of establishing a printing office for the publication of a paper or magazine, to be published weekly, for the use and benefit of the blind, which paper or magazine shall be printed with raised letters, or in the most approved methods for their use, and be distributed gratuitously among the blind of the Southern States, or sold to such as are able and willing to pay for them.”

As a large share of Mr. W.'s wealth was known to consist of slave property originally, it is feared that, unless he changed the form of that portion of it some time before his death, the avails of his bequest may be considerably diminished by the effects of the Southern Rebellion. The hope is still indulged, however, that after peace shall have been restored to the country, his bequest may prove a valuable boon to his companions in misfortune.

INDUSTRIAL DEPARTMENT:

The business of this department continues to be conducted upon the plans heretofore reported. The workshops for the males are in the charge of an experienced instructor, who trains the pupils in the different arts pursued, without pecuniary compensation from the Institute. The use of the shops, with their tools and fixtures, being furnished him free of charge, he is enabled to make the labor of the apprentices available in the way of remuneration for his services in teaching them. The raw material is, of course, furnished by himself, and the manufactured articles disposed of for his own benefit.

The labor of the females in sewing and knitting, together with the manufacture of various articles of bead-work, is performed under the direction of a competent lady, who is paid for her services out of the proceeds of the sales of bead-work. The sewing and knitting being for the use of the household mainly, little direct income is derived from this source, but a considerable saving in the household expenses is effected. The materials used in the bead-work are also paid for out of the proceeds of sales, and a small profit is still left to the Institution, as will be seen by reference to the statement below. So that this branch of the work department

may be set down as more than self-sustaining; while the male branch, as explained above, is likewise conducted without expense to the State. This is a gratifying result, and one which is unusual in institutions of this kind.

The following tables will exhibit to your Board the operations of the industrial department during the year:

PRODUCTS OF THE WORKSHOPS.

Sweeping brooms.....	11,748
Yards of rag carpeting.....	1,025
Brush—clothes and scrubbing.....	450
Chairs resated with cane.....	17

ARTICLES MADE BY THE FEMALES.

Aprons.....	12
Bead-work—number of pieces.....	2,226
Bed spreads.....	4
Chemises.....	30
Dresses.....	5
Dress skirts.....	50
Drawers—pairs.....	40
Geralaldis.....	6
Handkerchiefs hemmed.....	100
Hats trimmed.....	8
Head dresses.....	7
Hose—pairs.....	6
Napkins hemmed.....	100
Night dresses.....	6
Pillow cases.....	60
R pairs on sunbry articles.....	475
Shade.....	4
Sheets.....	20
Shirts.....	6
Socks—pairs, for soldiers.....	15
Suspenders.....	6
Table cloths.....	8
Table covers.....	10
Tatting—yards.....	10
Tidies.....	2
Towels hemmed.....	45
Under-waists.....	8

N. B. The value of the labor upon the foregoing articles, exclusive of the bead-work, is one hundred and sixty-three dollars and thirty cents.

RECEIPTS AND EXPENDITURES ON ACCOUNT OF BEAD-WORK.

CREDIT.

By receipts for manufactured articles, during the year.....	\$790 21
By value of manufactured articles on hand at close of year.....	31 45
By value of material on hand at close of year.....	49 50
Total.....	\$871 16

DEBIT.

To value of manufactured articles on hand at beginning of year.....	\$35 15
To value of materials on hand at beginning of year.....	200 48
To paid for materials during the year.....	118 19
To paid for instruction during the year.....	110 00
To paid pupils for overwork during the year.....	242 21
Total.....	\$706 03
Balance in favor of the Institute.....	165 13
Total.....	\$871 16

HOUSEHOLD DEPARTMENT.

The past year has been marked by an unusual degree of healthfulness in our numerous family of officers, pupils and employees. If we except the four persons mentioned in a preceding paragraph as having left the school on account of feeble health, all of whom were afflicted with chronic disease which they brought here with them, we will not have to chronicle a single case of severe illness since the date of our last report. This, I need hardly say, constitutes a very strong argument in favor of the salubrity of the location of our Institution, as well as the efficiency of our household regimen and the skillful care of the attending physician and matron. And the force of this remark is greatly strengthened by a consideration of the fact that a very large proportion of our pupils, in common with those of all similar establishments, come to us with feeble, undeveloped constitutions.

Much of the immunity from sickness among our inmates, is due to the excellent ventilating arrangements of the building, and the oversight of the officers in the matter of physical exercise. But the invigorating agency of the latter, might be made vastly more efficacious in the promotion of sound physical development, if we could add to our present resources a thorough system of calisthenic and gymnastic exercise. This, in the absence of appropriate space in our already well occupied buildings, would necessitate the construction of a commodious gymnasium with suitable appurtenances; and it is hoped that your Board will see the propriety of taking early steps towards providing us with this valuable means of furthering the well-being of our charge. Such an auxiliary is coming to be regarded as a prime necessity in any institution for seeing scholars; and it is quite evident that the demand for it is infinitely greater in one like ours.

Another important desideratum in the household department, is the earliest possible construction of an improved steam apparatus

for warming our buildings, including that used for the work-shops. This matter has been so often presented to your notice on former occasions, that it might seem unnecessary to introduce it here; but the subject is one of so much urgency, that you will pardon another reference to it. Independently of all economic considerations, our present inconvenient method of warming by nearly fifty stoves, scattered throughout the buildings, is so palpably unsafe, that I cannot rest easy without persevering in an effort for its abandonment. It is not alone for the safety of the buildings, that we are solicitous, though this should be a sufficient reason in itself for the proposed change; but we shudder at the possible calamity which might befall our helpless family in the event of a conflagration, particularly if it should occur in the night time. Besides the terrible casuality to which we are continually liable from the possible burning of the premises, the persons of our pupils are in constant jeopardy from accidental contact of their clothing with the hot stoves; and scarce a week passes in which we do not have cause to tremble at some narrow escape from the impending danger.

The appropriate committees of the last General Assembly had this matter under advisement, and were prepared to report in favor of a liberal appropriation for the construction of steam-works upon our premises, similar to those which have been in successful operation for several years at the state institution for the deaf and dumb. But the unfortunate omission of that body to act upon most of the business brought before it, defeated the consumation of our wishes. It is earnestly hoped, therefore, that you will again urge the importance of the measure upon the attention of the Legislature about to assemble; and that, through your recommendation, some favorable action in the premises may be secured. Indeed, a further postponement of a provision which is imperatively demanded by every consideration of humanity and enlightened policy, can scarcely be regarded otherwise than as extremely unfortunate.

A special appropriation is also needed, in addition to that for the current support of the Institution, to enable us to provide in a suitable manner for the comfort of our household. Most of the mattresses and bed clothing of the pupils, as well as the carpeting throughout the house, are in a worn condition through long service, and must be renewed at an early day. The same is likewise true of some other articles of household use.

The law which provides for the clothing of our indigent pupils, will need some revision at the hands of the Legislature. The pres-

ent allowance of twenty dollars per annum on account of each pupil clothed by the Institute, has always been insufficient in some cases, and is now wholly inadequate to the purpose, in any case; which fact must be obvious to any one. Forty dollars per annum is the least sum which should be fixed as the maximum of expenditure for this object.

It must be borne in mind, too, that the matter of clothing merely, is not the only source of expense on account of these indigent pupils, which is properly chargeable to the respective counties of their residence. Our regulations require that all shall leave the Institute for their homes, during the summer vacations; and it often happens in carrying out this requirement, that we are obliged to defray the traveling expenses of those who are county charges. Such items it has been our custom to charge to their clothing account, in the absence of any special provision for the outlay. Though quite limited for the object in question, it is thought that the above mentioned sum could, in most instances, be made to cover both traveling and clothing expenses. But in no case would it all be drawn, unless actually necessary. In presenting our accounts to the State Treasurer, each item of expenditure is distinctly set forth.

In connection with this subject, I would here repeat a recommendation, made in a previous report, viz: that application be made to the Legislature for such a modification of the enactment concerning the clothing of indigent pupils, as will include their expenses in coming to and returning from the Institution, as well at the time of their first entrance and final departure, as at that of the annual vacation. Also, for a further provision requiring the counties to take charge of our homeless pupils, not only during the recess of school, but likewise after they shall have completed their term of instruction or been found incompetent to receive an education.

The changes here suggested, would relieve us of much embarrassment in certain cases, and at the same time go far towards correcting the false notion that our Institution is an asylum for the homeless rather than a school for the instruction of those whose deprivation prevents their acquiring an education elsewhere. The want of such legal enactment has, in numerous instances, induced us, from motives of humanity, to retain pupils much longer than is contemplated by our regulations, and often at a serious disadvantage to the school.

BUILDINGS AND GROUNDS.

Under this head, allow me to call the attention of your Board to several much needed improvements upon our premises.

1. As a receptacle for the boilers, pumps, and other machinery connected with the steam heating apparatus, to which reference was made in a preceding paragraph, we need a building of appropriate construction and dimensions; and, in conjunction therewith, a large smoke-stack, such as is usually employed in like cases. There were erected, several years ago, a small building and stack for the purpose; but these, besides being palpably unsuitable in size and plan, are in such close proximity to the main building, as to be at once unsafe and greatly in the way. Instead of being placed considerably in the rear, as they should be, they are both situated between the wings of the building, and the boiler-house is but eight feet from the rear wall of the central division. The standing committees of the last Legislature, to whom the affairs of the Benevolent Institutions were referred, strongly condemned the structures in question, and stipulated, in their recommendation of an appropriation for the desired steam apparatus, that others, more suitable in character and position, should be substituted.

2. We are destitute of proper laundry facilities, in consequence of a lack of room in our present building, and suffer extreme inconvenience therefrom, especially in the winter season, when it is utterly impossible to have our washing and ironing done in a proper manner, and without unreasonable exposure to those engaged in its performance; besides which, we are subject to continual expense and vexation, with our present arrangements, by reason of the frequent bursting of the steam and water pipes from freezing. It is recommended, therefore, that the proposed building for the steam works be so planned as to include the necessary apartments and appliances for this important branch of domestic economy. Such could be done with comparatively little additional expense.

3. As connected with the foregoing, together with the kitchen, bath-rooms and wash-rooms of the pupils, we require a more perfect system of drainage than the one now employed. The grade of our premises is quite light; and our only resource thus far, has been in cess-pools, placed near the building. These soon fill up, and we are obliged to dig others; while the drains leading to them, from their slight inclination, are frequently choked with sediment. How to get rid of this source of annoyance, without considerable

expense, is a difficult question, but it is no less important than difficult, and therefore demands a practical solution in some way. Were the streets of our city provided with ample sewerage, the matter could be easily managed; but with the prevailing system of surface gutters, we are interdicted by the City Council from draining into the streets. It may be, that by joint action on the part of the Legislature and the City, a sewer could be constructed from one of the streets bounding the Institute premises, to some appropriate point, which would be of mutual benefit to the city and ourselves. Without further comment, your timely consideration of this subject is earnestly solicited.

4. The wooden fences enclosing a portion of the southern half of our grounds, are in a very defective condition, by reason of the rotting off of most of the posts, and need immediate reconstruction.

5. The interior of the main building, together with the entire woodwork of the shop building and all of the fencing, iron as well as wooden, are suffering for want of paint. Little or nothing, in the way of painting, has been done upon the premises since their first occupancy, now about twelve years; and the due preservation of the parts enumerated, to say nothing of their appearance, demands your earliest attention to them, in this regard.

Special appropriations by the Legislature, will of course be required for the several objects here alluded to, and I trust you will see the propriety of urgently recommending the same in your forthcoming report.

All of which is respectfully submitted,

W. H. CHURCHMAN, *Sup't.*

Indianapolis, November 1, 1864.

APPENDIX E.

CIRCULAR.

LOCATION AND OBJECT OF THE INSTITUTION.

The Indiana Institute for the Education of the Blind is located at Indianapolis, the capital of the State, and occupies a healthful and beautiful site in the Northern part of the city.

It has for its object the moral, intellectual and physical training of the young blind, of both sexes, residing in the State.

It is, therefore, an educational establishment, and not an asylum for the helpless, or a hospital for the treatment of disease.

It was founded in the year 1847, conformably to an Act of the Legislature of the State; from which body it receives its entire support, through the medium of direct appropriations made upon estimates of its wants, furnished by the officers in charge.

ORGANIZATION AND MANAGEMENT.

The Institution is organized under three separate departments: the School, the Industrial, and the Household; each performing its respective office of ministering to the improvement and comfort of the pupils.

The general government of the Institute is entrusted by the Legislature to a Board of Trustees, elected by that body, while the immediate control and management of its several departments are confided to a general Superintendent, chosen by the Board.

The Superintendent is assisted in the school and industrial departments by competent instructors, and in the household department by an experienced Matron, who administers the domestic concerns, having the immediate supervision of the female pupils when

out of school, and the direction of the several domestics in the performance of their allotted duties. These assistant officers also receive their appointment from the Board, upon the nomination of the Superintendent, but are directly responsible to the latter for the faithful discharge of their respective trusts.

PLAN OF EDUCATION.

The plan of education pursued at the Institute is designed to be thoroughly practical, comprehending all that is necessary for such a development of the mental and physical powers of the blind, as is best calculated to place them on an equal footing with seeing persons in their capacity for usefulness and self-maintenance.

The course of instruction, therefore, embraces, in addition to the ordinary routine of school branches, the science and practice of vocal and instrumental music; several appropriate mechanic arts; moral and religious culture, and such other training as serves to establish becoming personal habits, energy of character, business tact, etc.

DOMESTIC ARRANGEMENTS.

In the household department, every means which experience can suggest for the promotion of the health and comfort of the pupils, is provided. Among these are commodious, well-ventilated dormitories, school-rooms, hospitals and various other apartments; spacious halls, piazzas and out-door promenades, suitable for exercise in all kinds of weather; ample arrangement for cold, warm and shower bathing; good wholesome food and comfortable beds; prompt medical advice, with other necessary attention in case of sickness; and above all, kind, sympathizing friends whose duty and pleasure it is to minister to the moral and physical wants of their unfortunate charges, striving in each of their various relations to supply to them all the desirable comforts of home.

AGE OF PUPILS.

From ten to fourteen, is the most favorable age for entering the Institute, provided the pupils have judicious care and training at home, prior to that age. But as this is not always the case, and as there are many who lose their sight after that age; or, having lost it earlier, do not find an opportunity of going to school at the proper time, the regulations of the Institute allow of the admission of all

proper subjects who are not under eight or above twenty-one years of age.

It must be borne in mind, however, by the friends of blind children, that though they have the privilege of sending them to the Institute at a later period than the one mentioned as the best, yet it is of the highest importance that they should be sent within said period; for as they grow older their neglected powers lose their susceptibility for cultivation, thus rendering the training more and more difficult until they become wholly incapacitated for receiving such an education as will fit them for a life of usefulness, independence and happiness. It is not uncommon to witness results of this kind, arising out of the morbid tenderness with which a blind child is regarded by his friends, they being unwilling to entrust him at the proper age to the care of strangers, lest some harm should befall him. Indeed every year's experience, but serves to indicate more clearly, the lamentable prevalence of this unjust neglect; as there are constantly applying for admission into the several institutions of the country, those whose melancholy lot it is, to lead a life of hopeless ignorance and dependence; but who might, with proper training in early youth, have become happy and useful members of society, maintaining themselves comfortably and respectably.

TERM OF INSTRUCTION.

This is not limited to any definite number of years; but is determined in each individual case, by the acquirements of the pupil and the consequent fitness for graduating. The length of each one's term, will therefore depend upon his aptness to learn, and the extent of the course pursued.

SCHOOL SESSION.

There is one session of the school in each year, commencing on the first Wednesday after the 15th day of September, and closing on the last Wednesday in June following, leaving a vacation of twelve weeks; during which time the pupils have an opportunity of visiting their homes and replenishing their clothing.

ADMISSION OF PUPILS.

Any person desiring the admission of a pupil into the Institu-

tion, must address the Superintendent, giving definite and truthful answers to the following questions, viz :

1st. What are the names and post office address of the parents or guardians of the person in question ?

2d. Are such parents or guardians, legal residents of the State of Indiana ?

3d. What is the name of the person for whom application is made ?

4th. What is the date of his or her birth ?

5th. At what age did he or she become blind, and from what cause ?

6th. Is the degree of blindness sufficient to prevent the acquirement of an education in a school for the seeing ?

7th. Is the person of sound mind, and susceptible of intellectual culture ?

8th. Has he or she ever been a pupil in any institution for the blind, and if so, what one ?

9th. Is he or she free from bodily deformity, and all infectious diseases ?

10th. What is the moral character of the applicant ?

Upon the receipt of proper answers to the foregoing queries, the parties interested will be notified of the result of their application ; and no person should be sent to the Institute in advance of such notification.

GENERAL REGULATIONS.

1st. No person of imbecile or unsound mind, or of confirmed immoral character, will be knowingly received into the Institute ; and in case any person shall, after a fair trial, prove incompetent for useful instruction, or disobedient to the wholesome regulations of the Institute, such pupil will be thereupon discharged.

2d. No charge is made for the boarding and instruction of pupils from the State of Indiana ; but all are expected to come provided with an adequate supply of good, comfortable clothing ; which must be replenished from time to time, as it becomes necessary.

3d. The stock of clothing should embrace suitable articles for both summer and winter, and a sufficient number of each kind to admit of the necessary changes for washing and repairing.

4th. All of the clothing must be sent in good order and condi-

tion, not only upon the first entrance of the pupil, but also at each subsequent return from home, after the vacation.

5th. Each article should also be distinctly marked with the owners' name or initials, in order to prevent confusion or loss.

6th. In cases where the parents or guardians of pupils are unable, through indigence, to supply them with the necessary clothing, the same is provided by the Institution, and the amount of its cost collected by law from the respective counties in which such pupils reside.

7th. Applicants of suitable age and capacity from without the State, will be received as pupils, and furnished with boarding and tuition at the rate of \$150 00 per annum, payable half yearly in advance.

8th. It is important that all of the pupils of each year should be present at the commencement of the school session, and remain until its close. This will, therefore, be expected of them, unless prevented by sickness or other emergency. In case of non-compliance with this rule on the part of any pupil without a sufficient reason, his or her right to the privileges of the Institution, will, at the discretion of the Superintendent, be forfeited.

9th. Persons visiting the pupils from abroad, cannot be accommodated with boarding and lodging at the Institute during their stay in the city.

10th. All letters to the pupils should be addressed to the care of the Institute in order to insure their prompt reception.

W. H. CHURCHMAN,

Superintendent.

M E S S A G E

OF THE

GOVERNOR OF INDIANA,

TO THE

GENERAL ASSEMBLY.

JANUARY 6TH, 1865.

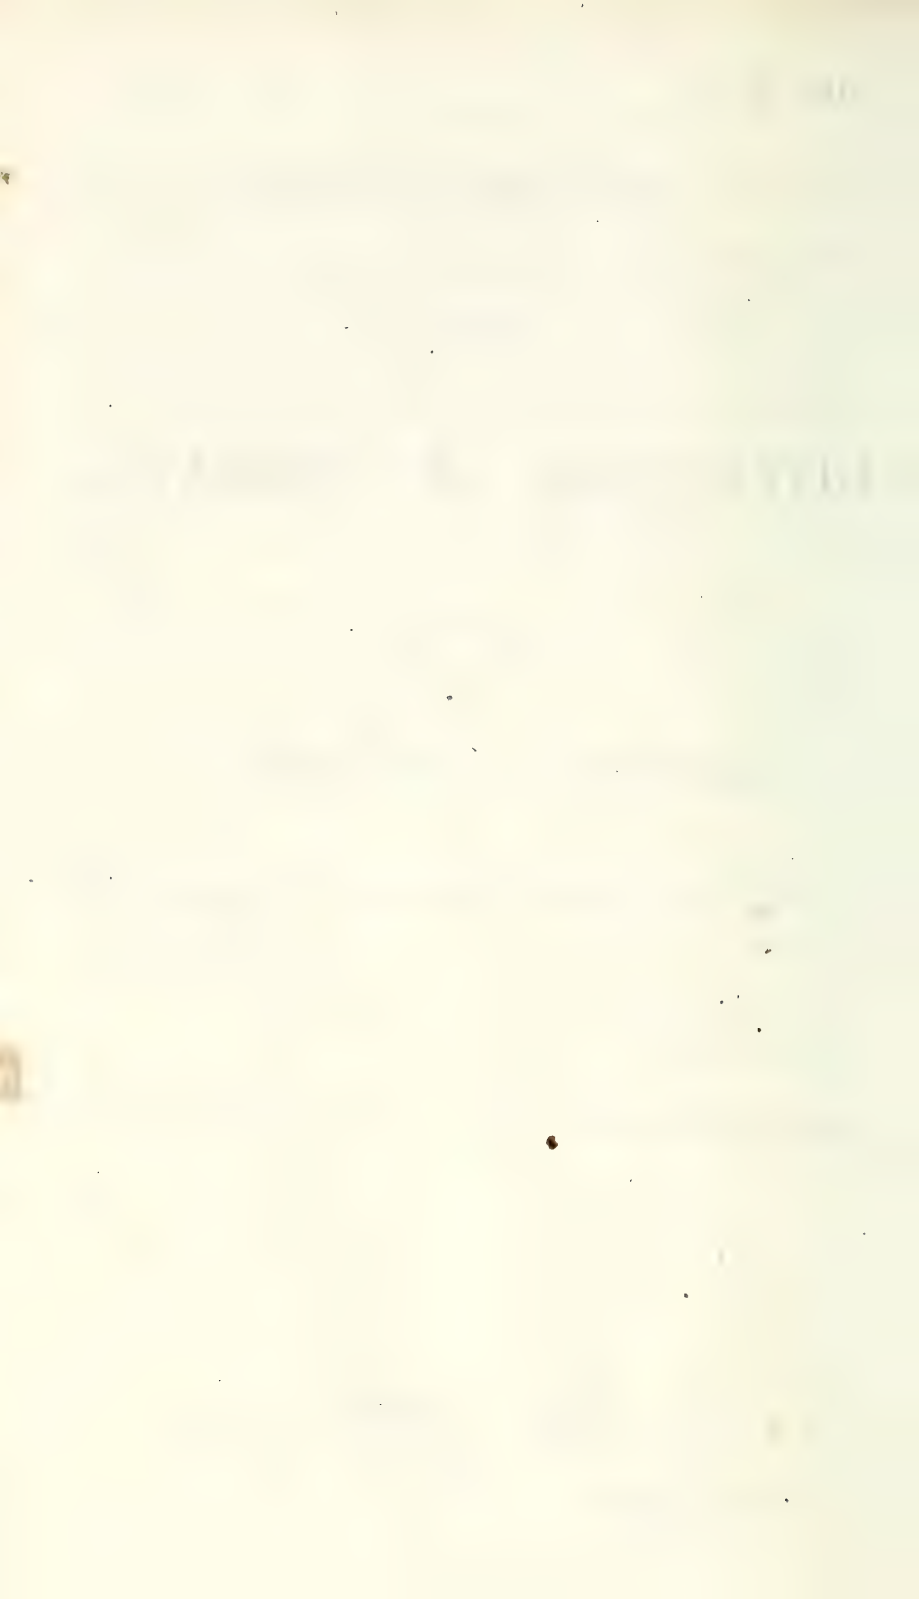

7,000 COPIES ORDERED FOR THE USE OF THE SENATE.

INDIANAPOLIS:

JOSEPH J. BINGHAM, STATE PRINTER.

1865.

1 D. J. 1865—57

MESSAGE.

*To the General Assembly
of the State of Indiana:*

From the report of the Adjutant General I am able to give the number of men who have gone into the military service of the United States from this State, from the beginning of the war until the 1st day of January, 1865:

VOLUNTEERS TO JANUARY 1, 1862.

Infantry,	6 Regiments 3 months.....	4,698
"	2 Regiments 1 year men.....	1,698
"	48 Regiments 3 years men.....	47,505
Cavalry,	3 Regiments 3 years men.....	3,238
Artillery,	17 Batteries	2,292
		<hr/> 53,035

UNDER CALLS FOR 1862.

Infantry,	1 Regiment, 54th, 1 year	1,023
"	30 Regiments 3 years men	28,272
Cavalry,	2 Regiments 3 years men.....	2,437
Artillery,	7 Batteries.....	978
		<hr/> 31,687

RECRUITS 1861 AND 1862, AND TO SEPT. 5, 1863.

Infantry.....	4,810	
Cavalry	537	
Artillery	499	
	<hr/>	5,846
		<hr/>
		97,987

UNDER CALLS OF 1863 AND 1864.

Infantry,	4 Regiments 6 months men.....	3,773
"	6 Regiments 3 years men.....	5,505
"	2 Regiments 1 year men (140th and 142d)	1,880
Cavalry,	7th Regiment	1,167
"	5 Regiments.	6,001
Artillery,	1 Battery, 25th	144
		<hr/> 14,697

RECRUITS FROM SEPTEMBER 5, 1863, TO DATE.

Infantry.....	9,707	
Cavalry.....	1,347	
Artillery.....	1,298	
		12,352
Additional number, shown by rolls in the Adjutant General's office, say.....	900	
Additional for 28th U. S. Colored Volunteers.....	518	
One hundred days volunteers, 8 regiments.....	7,129	
Re-enlisted Veterans.....	11,494	
		148,850
Drafted men and substitutes, forwarded and in camp, as reported by General Carrington, Superintendent.....	14,580	
Enlisted in Regular Army.....	1,110	
Enlisted in the Navy.....	774	
		16,464
Total number of men furnished.....		165,314

RECRUITS FOR UNEXPIRED TERMS.

There is a peculiar hardship existing in regard to the recruits of 1862 for the old regiments. They undoubtedly enlisted upon the understanding that they were to be mustered out along with their regiments, and would not be held for three years from the time of their enlistment. This understanding was participated in by their recruiting officers, the general mustering officer stationed here by the Government, and by the State authorities. When the time came for mustering out their regiments, they demanded their discharge, which was refused. I presented the matter to the Secretary of War, who declined to act on it, on the ground that the formal muster roll which they had signed, showed that they had entered the service for the period of three years, and left him no discretion to interfere in their behalf. This was true; but nevertheless, the understanding existed in full force, as the statement in the muster roll was explained by the mustering officer as a mere technical necessity. I afterwards addressed a memorial on the subject to Congress, stating all the facts, and inviting them to take action for the relief of these men, but they failed to do so at the time. I present the matter for your consideration, trusting that you will see fit to lay it before Congress.

GALLANTRY OF INDIANA SOLDIERS.

The duty of appointing officers to command our regiments is full of responsibility and embarrassment. I have commissioned

many whom I did not know, and for whose fitness I was compelled to rely entirely upon the opinion of others. But it affords me great gratification to state that the Indiana officers, as a body, have been found equal to those of any other State; that they have, upon every battle-field, nobly sustained the great cause, and shed lustre upon the flag under which they fought. Many have been appointed to high commands, in which they acquitted themselves with the greatest honor and ability, and very many have nobly laid down their lives in battle for their country. Our private soldiers have behaved with uniform and distinguished gallantry in every action in which they have been engaged. They form a part of every army in the field, and have been among the foremost in deeds of daring, while their blood has hallowed every soil. Hitherto engaged in the peaceful pursuits of trade and agriculture, they have manifested that lofty courage and high-toned chivalry of which others have talked so much and possessed so little, and which belongs only to the intelligent patriot who understands well the sacred cause in which he draws his sword. Thousands have fallen the victims of an unnatural rebellion. They were fighting from deep convictions of duty and the love they bore their country. Their unlettered graves mark an hundred battle-fields, and our country can never discharge to their memory and their posterity the debt of gratitude it owes. That gratitude should be testified by the tender care we take of their families and dependent ones whom they have left behind, and by the education of their children.

GETTYSBURG CEMETERY.

After the battle of Gettysburg, arrangements were made by the State of Pennsylvania, for the establishment of a national cemetery upon the battle-field, in which each State having troops engaged, should have a place set apart for the burial of its dead. As Indiana lost many gallant and cherished sons in that great conflict, I took the responsibility of co-operating with Pennsylvania and other States, by the appointment of Colonel John G. Stephenson, as commissioner to select the place and superintend the removal thereto of our dead. These duties he faithfully performed, and for more full information you are referred to his report herewith submitted; and for an account of the expenses incurred, to the financial report of Mr. Terrell. For my action in this matter, your approval is respectfully solicited.

CARE OF SOLDIERS' FAMILIES.

I invite your immediate attention to the necessity of making an appropriation for the relief and support of the families of our soldiers. It is too well understood to require argument or statement, that the monthly pay which they receive, especially after deducting that part which their own wants in the field absolutely require them to expend, is wholly insufficient for the support of their families, at this period of high prices. The duty resting upon the people of the State to provide support, and prevent suffering and destitution in these cases, is also too clear for argument, and needs only to be stated to command general assent. If the relief be furnished in the manner proposed, the burden will fall upon all the people of the State, according to their several capacities to bear it, and will be so light as to be scarcely felt, and will, I am sure, be cheerfully borne. It is an hour of great trial to the nation, and solemn duties are devolved upon the people, whether at home or in the field. Our soldiers are performing their duties gloriously, and to the admiration of the world. Let the people at home do theirs, and all will be well.

INDIANA STATE SANITARY COMMISSION.

I have thought proper to lay before you the report of Dr. Hannaman, President, and Alfred Harrison, Treasurer, of the Indiana State Sanitary Commission. Since its formal organization on the 3d day of March, 1862, it has received contributions in money to the amount of one hundred and fifty-five thousand seven hundred and ninety-six dollars and forty-five cents, and supplies for the army valued at three hundred and thirteen thousand six hundred and five dollars and sixty-six cents, making an aggregate of four hundred and sixty-nine thousand four hundred and two dollars and eleven cents. As to the manner in which this money and these supplies have been expended and distributed, and the number, management and operations of the various military agencies that have been established, the appointment of special surgeons, and traveling Sanitary Commissioners, you are referred to Dr. Hannaman's report. This Commission has been instrumental in preserving many lives, and relieving untold suffering and distress. It has received no support from the fairs held in the great cities, in which large sums have been realized, but has been sustained by a system of collections and voluntary contributions on the part of

our people, which are fully described by Dr. Hannaman. I am aware that, as this Commission has not been established by law, and is not therefore legally responsible to the Legislature, it may be said by some that you should take no cognizance of it whatever, but as the people of the State have a right to know what disposition has been made of their patriotic gifts, and as the soldiers of Indiana are deeply interested in its continued success, which can only be maintained by preserving the confidence of the people in its integrity and efficiency, it is my desire, and that of all the officers engaged in its administration, that you should take cognizance of it, and institute such investigations by a proper committee, as will establish its merits and claims to public confidence, or enable its enemies to point out its defects.

I cannot leave the subject without expressing to Dr. Hannaman my sincere thanks for the devotion, ability, and disinterested patriotism with which he has presided over its affairs. For more than two years he has entirely abandoned his own business, and given his time and labor wholly to the great work of relief to our sick and wounded soldiers, without reward or the hope of it, and has thus set a noble example before our countrymen of the spirit in which the burthens and duties of the war should be borne. Nor should I omit to return thanks to the Treasurer and all other officers of the Commission, for their devotion and efficiency in the discharge of their duties; and especially to the patriotic women of Indiana, by whose labors and influence the greater part of the contributions have been made. Their zeal has not been diminished by the protraction of the war, but has increased with the increasing wants of our soldiers; and while many have labored unceasingly with their hands, others have given most liberally, and often from very small means. They have their reward in the support they have given to the cause, and in the gratitude of the many thousands of brave hearts that they have made light and happy.

The duty of collecting back pay, pensions and bounties for our soldiers and soldiers' widows and orphans, free of charge, I devolved upon the agencies established at Washington and in this city, nearly two years ago, and they have accomplished much good in that way. But I have not been able to employ the force necessary to meet the demands of a business so large and important, and I recommend that such legislation be had as will establish agencies upon a permanent basis, with a force sufficient to transact the business, and save the claimants from the great sacrifice they may

otherwise be compelled to make, many of whom are but poorly able to bear it.

SOLDIERS' VOTES.

Under the provisions of our Constitution, no person can vote except in the precinct in which he resides. This should be so amended, in my opinion, as to enable such of our citizens as are in the military service of the Government, and who would be entitled to a vote if at home, to vote wherever they may be, in camp or field, under such reasonable regulations and safeguards as might be prescribed by the Legislature.

I can conceive of no greater political injustice, than the exclusion from the right of suffrage, of those gallant men who are absent from home, because they are fighting the battles of their country. I earnestly hope that immediate steps will be taken to relieve our Constitution of this injustice, and although it may not be accomplished in time to become operative during the war, it should not on that account be neglected.

LEGION.

It is important to the peace and security of the State that we have a well organized and equipped militia, which may be speedily called out in an emergency. To the officers and men of the Indiana Legion, the State chiefly owes the immunity she has enjoyed from invasion, plunder and murder, by the guerrillas and marauding bands which have infested many of the adjoining counties of Kentucky. On several occasions they met the enemy in battle, when they ably maintained the credit of the State, and behaved with that distinguished courage which has characterized the soldiers of Indiana throughout this war. Some have fallen in battle, and I earnestly recommend that their families be provided for, and placed upon a footing at least equal to the families of those who fall in the Federal service.

The organization, discipline and efficiency of the militia should be encouraged and promoted by every means and inducement which the Legislature can present, and placed, if possible, upon an enduring basis. It should be so organized that every person capable of performing military duty, might, in an emergency, be compelled to render military service, and the defense of the State not

left to those only who enter voluntary organizations. Where all are equally interested, all should be subject to equal duties and obligations, and no militia system can be regarded as efficient for the protection of the State, under which every able-bodied man within military age cannot, when necessary, be called into the field. In this respect the present law is entirely wanting, and in many others is so defective as to make it a matter of surprise that the organization of the Legion should have been so efficient and well maintained as it has. I therefore call your attention to the necessity of so amending the law, as to create a military organization that will be efficient and suited to the circumstances by which we are surrounded.

The very able report of Major General Mansfield, of the general operation and condition of the Legion for the last two years, herewith submitted, is interesting and important.

QUARTERMASTER'S REPORT.

The report of the Quartermaster and Commissary General is herewith laid before you, and your attention especially called to its contents. The administration of this department by Gen. Stone has been highly successful and satisfactory.

EXPENDITURES OF THE PAYMASTER.

The State Paymaster, Major Stearns Fisher, has disbursed for all purposes the sum of two hundred and fifty-eight thousand six hundred and ten dollars and ten cents. Of this amount I advanced to him one hundred and seventy-one thousand six hundred and sixty-one dollars and eighty-eight cents, of which he repaid to me the sum of fifty thousand dollars. He drew by my order from the special military fund, created by the law of 1861, the sum of seventy-five thousand dollars. When this latter sum was refunded to me by the Government upon filing with it the receipted pay-rolls, I paid the money into the State Treasury to the credit of the appropriation from which it was drawn, and from which he has drawn again, the sum of sixty-nine thousand eight hundred and forty-two dollars and nine cents. According to his report, which is herewith submitted, the whole amount of liabilities incurred to the Indiana Legion and minute men, for military services, is four hundred and nineteen thousand seven hundred and forty-two dollars and eight

cents, of which amount the sum of two hundred and thirty-five thousand seven hundred and sixty-eight dollars and forty-six cents has been paid, leaving unpaid the sum of one hundred and eighty-three thousand nine hundred and seventy-three dollars and sixty-two cents. But the Paymaster has still in his hands the sum of twenty-seven thousand four hundred and seventy-three dollars and seventy-seven cents in cash, leaving the balance to be provided for.

DAMAGES BY THE MORGAN RAID.

In the month of July, 1863, the State was invaded by the rebel General John Morgan, and the forces under his command. In response to a call which I issued for military forces for the purpose of capturing and punishing this robber horde, our people flew to arms in numbers and with an alacrity before unknown in the history of the war. In a few short hours the invasion was converted into a flight, and the invaders all being mounted were enabled to effect their escape over our eastern border, into Ohio, where they were finally captured. During their brief presence in the State, however, they inflicted much damage by the destruction of property, the plundering of stores, the stealing of horses and provisions, and robberies of various kinds. The true theory of our government is that it shall protect the people in their persons and property against invasion and loss from the public enemy, or injury by domestic insurrection. Where losses in property have been thus sustained, it is much easier for the people of the State to bear them in their collective capacity, than it is for the particular individuals upon whom they have fallen. In many instances, persons who lost their property in the Morgan raid were in humble circumstances, and were put to great inconvenience thereby, and in some cases even reduced to destitution. I therefore recommend that a commission be created, clothed with such powers as will enable them to make a full and careful appraisalment of the damages sustained, and that an appropriation be made to defray them out of the Treasury, when they have been legally assessed. As there is a natural tendency to exaggerate damages when they are to be paid for by the public, such safeguards should be adopted by the commission as will prevent imposition upon the State.

ARSENAL.

When our first regiments were ready to take the field, they were

unprovided with ammunition, and as none could be readily procured, it became necessary to have it prepared. Colonel Sturm then was engaged for that purpose. He had studied the art in Europe, and was thoroughly instructed in all its details. He succeeded well in the enterprise from the beginning, and his ammunition was pronounced the very best in use. Thus was the Arsenal established, and as the demand for ammunition daily increased, and the necessity so far from passing away became constantly greater as the war progressed, what was first intended as a temporary convenience, became a large and permanent establishment. Colonel Sturm continued at the head of the establishment, managing it with great success and ability, preparing ammunition of every description for artillery and small arms, and not only supplying our own troops when going to the field, but sending immense quantities to the armies in the West and South. In several emergencies, the armies in the West and South were supplied from here, when they could not procure it in time from other arsenals, and serious disasters were thereby avoided.

Shortly after the Arsenal was fully established, it was brought to the attention of the War Department, and the ammunition having been thoroughly tested, the Government agreed to pay for what had already been issued, and to receive and pay for what should be prepared thereafter, at prices which were satisfactory to both parties. These prices were generally below what the Government paid for ammunition, but such as, it was believed, would fairly indemnify the State for all costs and expenses incurred on that account.

The operations of the Arsenal were suspended during the session of the late Legislature, and its condition and results fully reported to that body. No Legislative action having been taken in regard to it, and the necessity for its continued operation still existing in full force, I proposed to the Auditor and Treasurer of State, that they should co-operate with me in carrying it forward. This they declined to do, on the ground that it was not authorized by law. Afterwards I determined to take the responsibility of continuing it, provided the Legislative Auditing Committee would examine and audit all items of expenditure that might be incurred on that account. To this the Committee agreed, upon condition that one of their number should be selected to be present at the Arsenal at all times, for the daily examination of its expenditures, and inspection of its operations. With this arrangement I was

well satisfied, and the Committee selected Hon. Samuel H. Buskirk for that duty. He continued in the performance of the duty thus assigned him with ability and industry, until the final winding up of the Arsenal, at which time the Committee made a full report of its operations, which is herewith submitted. It will be found from an examination of this report, and the detailed accounts of the arsenal from the time of its starting, that it yielded a net cash profit to the State of seventy-one thousand three hundred and eighty dollars and one cent, (\$71,380 01,) besides leaving on hand, for future use, if necessary, all the tools and apparatus stored away in the Quartermaster's Department, valued at four thousand and two dollars and forty-four cents. All sums at any time drawn from the State Treasury, on account of the Arsenal, have been returned, and the profits only have remained in my hands, which I have charged against myself in the general account, and have used in defraying the expenses of the State Government. It was no part of the original plan that profits should result to the State from its operations, and they have sprung solely from the economical and skillful management, for which Colonel Sturm is entitled to the chief credit. Its original establishment and continuance were strictly a military necessity, and whether absolutely covered by the law or not, have been of great benefit to the State and the Government. It entailed upon me great responsibility and anxiety, from which I gladly escaped at the earliest moment.

EDUCATION.

Your attention is called to the Report of the Superintendent of Public Instruction, and the suggestions and recommendations contained in it. The school law requires amendment in several important particulars; and it is believed that the fund can be materially increased without adding to the burthens of the people of the State.

While Indiana has a larger school fund than any other State, she has not, by any means, the best system of common schools. Money alone will not make good schools, and an indispensable requisite is educated and disciplined teachers. The necessity for a State Normal School has been severely felt for many years, and earnestly urged by the most eminent teachers and friends of education. Indeed, I am satisfied from my own observation, and the recorded experience of other States, that our system of common schools can never even approach to what it ought to be, until an institution

shall be established in which teachers shall be trained and disciplined for their high and honorable calling. A few thousand dollars diverted every year from the school fund revenue, for this purpose, would soon make the expenditure of the balance vastly more beneficial to the children of the State. When we consider the magnitude of the school fund, the wealth of the State, and the ability of our people to pay taxes for the advancement of education, there is no reason why we may not have a system of common schools equal to that of any other State, save the absence of qualified teachers; and these we shall never have, in sufficient numbers, until a State Normal School has been permanently established of sufficient capacity to receive and instruct all who desire to enter the profession of teaching.

DONATION OF LAND BY CONGRESS FOR AGRICULTURAL COLLEGES.

In presenting the subject of the donation of land by Congress for Agricultural Colleges, in the several States, I cannot do better than repeat the recommendations of my former Message.

“On the 2d day of July, 1862, the Congress of the United States passed an act donating to each of the States not in rebellion against the Government, an amount of public lands equal to 30,000 acres for each Senator and Representative in Congress, to which the States are respectively entitled by the apportionment under the census of 1860. This entitles Indiana to 390,000 acres. Whenever there are public lands in the State, subject to sale at private entry at \$1 25 per acre, the quantity to which the State is entitled shall be selected from such lands; but if there are no such lands in the State, or not enough, the Secretary of the Interior is to issue to the State land scrip for the requisite number of acres. This scrip cannot be located by the State to which it is issued, but must be sold; but the purchasers may locate it upon any of the unappropriated lands of the United States, subject to sale at private entry at \$1.25 or less per acre.

“There being no public lands in this State for sale at private entry, held by the Government at \$1 25 per acre, Indiana is entitled to receive her donation in scrip.

“This donation is made upon the following conditions: First—That all moneys derived from the sale of lands or scrip, shall be invested in stocks of the United States, or of the States, or some

other safe stocks yielding not less than five per centum per annum, on the par value.

“Second—That the moneys so invested shall constitute a perpetual fund, the capital of which shall never be diminished, except as hereinafter stated.

“Third—The interest on the stocks to be inviolably appropriated by the State, to the endowment and support of at least one College, in which the leading object shall be, without excluding scientific and classical studies, and including Military Tactics, to teach such branches of learning as are related to Agriculture and the Mechanic Arts.

“Fourth—If any portion of the fund thus invested shall, by any contingency be lost, it shall be fully restored by the State.

“Fifth—That no portion of the said fund shall be applied to the purchase, repair, or erection of any building, but that a sum not exceeding ten per cent. of the original amount may be expended for the purchase of sites or experimental farms.

“Sixth—No State shall be entitled to the donation, unless the Legislature shall express its acceptance thereof, within two years from the date of the approval of the Act by the President.

“I recommend that the Legislature promptly express its acceptance of the grant, pledging the faith of the State for the performance of the conditions upon which it is made.

“The necessity for scientific instruction in agriculture, is generally acknowledged, and Congress intended, by this magnificent donation, to provide means for the permanent establishment of at least one efficient Agricultural College in each State.

“The question presents itself as to the disposition which shall be made of the grant. Shall it be given to the State University, or apportioned among all the Colleges in the State, upon such terms and conditions as the Legislature may prescribe; or shall a new Institution be created expressly designed to carry out the will of Congress? It may be difficult now to determine the question from the fact that we cannot know how much may be realized from the sale of scrip. If an amount should be realized, large enough to endow respectable and successful Professorships in each of the Colleges now in the State, attaching to them experimental farms, it would, perhaps, be the best disposition of it that could be made. But if it should not be large enough for such division, which I apprehend will be the case, then I recommend that it be applied to the establishment of an institution for Agricultural and Military

instruction, to which the children of soldiers who shall die in the service during this war, shall be admitted free of charge.

At the last session of Congress, the time was extended within which the States might accept the grant, and it is important that you take action upon it before the final adjournment.

EMIGRATION.

It is not necessary to argue the importance of adding to the wealth and population of Indiana, by increasing the emigration to her borders from the various countries of Europe. The agricultural and mineral resources of the State are as yet, comparatively, undeveloped, for the want of population, labor and capital. Nearly one fourth of the whole area of the State is a coal field, a large part of which is said to be of the best quality. Excellent iron ore is found in vast quantities in many counties, and throughout the State, excepting a few small localities, the soil is rich and fertile, capable of producing all the grains and grasses in the greatest abundance. The State abounds in fine timber, and living streams of water, and in every respect presents facilities for an easy and profitable agriculture, while an abundance of coal and water power furnishes the means for manufacturing on the largest scale and cheapest terms. Large tracts of country are yet unsettled, and in many counties the population is quite sparse, and it is not too much to say, that the State can support in ease and comfort a population three or four times larger than the present. The war has made a heavy draft upon the labor of the State, which is now scarce and in great demand, and should be replenished and increased by every legitimate means. I therefore earnestly recommend the establishment of a Bureau of Emigration, upon a plan similar to that adopted by several of the western States, providing for one or more agents in Europe, whose duty it shall be to furnish to persons about to emigrate to America, information of the geography, population, wealth and resources of the State, and the prospects for health, comfort, wealth and education, presented to those who come in search of new homes, and of such facilities for getting here as the State may be able to furnish. Some of our sister States have in this way added largely to their population and wealth, and while we are somewhat late in beginning, it will be later and worse for us the longer it is put off. In accordance with this view I have caused to be prepared and published, in both

English and German, a pamphlet setting forth the condition and resources of the State, and presenting the inducements offered to emigrants from abroad, copies of which are herewith submitted.

COLONIZATION.

I recommend that the second section of an act approved March 5th, 1853, which authorizes the State Board of Colonization to appoint an agent or corresponding secretary, be repealed. Since the passage of the act, I learn that nearly eight thousand dollars has been paid out in salaries to the Secretary appointed by the Board, and in that time but one man has been sent to Liberia from the State. This office is a mere sinecure, and the duties which have been attached to it by law, can be readily performed by the Secretary of State, should any arise in the future.

NEGRO TESTIMONY.

The statute which excludes negroes from testifying in courts of justice, in cases in which white persons are parties, is, in my opinion, a stigma upon the humanity and intelligence of the State. The idea that the white race must be protected against the colored, by imposing on them this disability is absurd, and has been made the cover and protection for much crime and injustice. As the law stands, murder may be perpetrated with impunity by white persons in the presence only of colored witnesses, and it is well known that negroes are often employed by white persons as the instruments of crime and fraud, because of their inability to testify in courts of justice. The interests of both races demand that this disability be removed; and if the fact of color affects credibility, that can be referred to the court and jury as in other cases, and would undoubtedly receive due consideration. Indiana and Illinois are the only free States whose statute books are dishonored by the retention of a law so repugnant to the spirit of the age, and the dictates of common sense.

ENUMERATION AND APPORTIONMENT.

Sections fourth and fifth of the Constitution of the State are in these words:

“SEC. IV. The General Assembly shall, at its second session

after the adoption of this Constitution, and every six years thereafter, cause an enumeration to be made of all the white male inhabitants over the age of twenty-one years.

“SEC. V. The number of Senators and Representative shall, at the session next following each period of making such enumeration, be fixed by law, and apportioned among the several counties, according to the number of white male inhabitants above twenty-one years of age in each: *Provided*, That the first and second elections of members of the General Assembly, under this Constitution, shall be according to the apportionment last made by the General Assembly, before the adoption of this Constitution.”

The enumeration required, of the white male inhabitants of the State, over twenty-one years of age, has never been made. An apportionment for Legislative purposes was enacted in 1857, and justice as well as the constitutional provisions require that a new one shall be made. Under the present law, which was very imperfect in the beginning, great inequalities existed in the presentation in the Legislature, and these are rapidly increasing by the increase and changes in our population.

STATE TREASURER'S REPORT.

The condition of the Treasury will be presented in the report of Mr. Brett, State Treasurer. While I have had occasion to except strongly to his policy in several respects referred to in this message, it is but just to say that in others the administration of his department has been entirely satisfactory.

NATIONAL DIRECT TAX.

By the 6th section of an act of Congress, approved August 6, 1861, a direct annual tax of twenty millions of dollars was levied upon the United States, and apportioned among the several States. The apportionment devolved the payment of \$904,875 33 on the State of Indiana.

By the 53d section of the Act it was provided that any State might assume, assess, and collect its portion of the tax and pay the same into the Treasury, and if thus paid on or before the last day of June of the year for which it was levied, should entitle such State to a deduction of fifteen per cent. of the gross amount to be paid by such State. The section further provides that notice of

the intention of the State to assume and pay her portion of the tax, without the intervention of the Federal officers, must be given to the Secretary of the Treasury by the Governor, or other proper officer, on or before the second Tuesday of February of each year in which the tax is to be paid. The section also contains this proviso: That the amount of direct tax apportioned to any State shall be liable to be paid or satisfied in whole or in part by the release of such State, duly executed to the United States, of any liquidated and determined claim of any such State, of equal amount against the United States: Provided, that in case of such release, such State shall be allowed the same abatement of the amount of such tax as would be allowed in case of the payment of the same in money.

From the very beginning of the war the State was compelled to advance large sums of money to equip and supply our volunteers, and, in fact, furnished supplies of every kind until the fall of 1861, and it was believed, shortly after the passage of that Act, that our advances, over and above all reimbursements, would soon be sufficient in amount to set off the amount of tax apportioned against the State. Accordingly I opened a correspondence with the Secretary of the Treasury on the subject, and ascertained from him that the advances made by the State on behalf of our troops would be regarded as a "claim," within the spirit and meaning of the Act, and would be admitted in payment of the tax to an amount which should be found due on settlement. After consultation with the Auditor, Treasurer, and Secretary of State, and in conjunction with them, on the —— day of December, 1861, I filed in the office of the Secretary of the Treasury at Washington, a paper officially signed, of which a copy is herewith transmitted, in which we assumed that the State would pay her portion of the direct tax without the intervention of Federal officers, and proposing to set-off against the same a like sum due to the State for advances made in furnishing our troops, and to release the United States from further liability for the sum thus set-off and advanced against the tax. This paper was accepted by the Secretary of the Treasury, who thereupon declined to appoint the officers provided by the law to collect the tax within the State. On the — day of January, 1862, Mr. Lange, the Auditor of State, proceeded to Washington with the papers and vouchers embracing our claims against the Government up to the time, for the purpose of making settlement. He found, however, that the mode of settlement with the several States

had not been determined upon by the Treasury Department, and that the press of business in the Department was such as to prevent the taking up of our accounts. He was directed to file them in the Department to be taken up for adjustment whenever they could be reached. It then became obvious that our accounts would not be settled and adjusted by the last day of June, 1861, so as to be "liquidated and determined" within the meaning of the Act of Congress, as before quoted, and that, after all, our set-off against the tax was about to fail.

Accordingly, I brought the matter to the attention of our Congressional delegation, and asked them to procure, if possible, such legislation as would facilitate the settlement of our accounts, and if that could not be done, to procure the extension of the time in which accounts could be filed and settlements made, so that the advantage of the set-off need not be lost. After much trouble and delay, they procured the passage of an Act, which was approved on the 13th day of May, 1862, the concluding part of which is as follows: "Provided, that in case of such release, such State, Territory, or District shall be allowed the same abatement of the amount of such tax as would be allowed in the case of the payment of the same in money," shall be construed as applying to such claims of States for reimbursements of expenses incurred by them in enrolling, subsisting, clothing, supplying, arming, equipping, paying, and transporting its troops employed in aiding to suppress the present insurrection against the United States, as shall be filed with the proper officers of the United States before the 30th of July next. And in such cases the abatement of fifteen per centum shall be made on such portion of said tax as may be paid by the allowance of such claims, in whole or in part, the same as if the final settlement and liquidation thereof had been made before the 30th of June."

This Act healed the difficulty, and under it we filed with the proper officers, anterior to the 30th of July, 1862, claims against the United States, due to the State, more than enough to cover the amount of tax due from the State, after deducting the fifteen per cent. from the gross amount.

By this operation, the State has saved fifteen per cent. of the original amount, which is \$135,731 30, reducing the amount from \$904,875 33 to \$769,144 03, and the latter sum is set-off and paid by our advances. The arrangement is mutually advantageous to the State and General Government. It would do the Government no

good to draw a large amount of money from the people of the State for taxes, while she was debtor to the State to a still larger amount, which indebtedness must sometime be paid by money raised by taxation. Besides this, the Government was in no condition to reimburse the State in the full amount of her advances, and if these advances were not used to pay the direct tax, the tax must have been collected from the people of Indiana immediately, while the advances would, in all probability, remain as a suspended debt for years to come, on which the Government, if it followed former precedents, would pay no interest. I respectfully recommend that the Legislature approve my action, and that of the State Officers, in the premises.

This subject was laid before the Legislature at its last session, but no action was taken in reference to it. The settlement of our accounts with the Government has progressed slowly, owing to the imperfection of many of the vouchers, growing out of the haste with which the business was done, and the inexperience of the officers in the beginning of the war. At the request of the Department I have made arrangements to send an Agent to Washington to co-operate with the accounting officers of the Government, and anticipate but little trouble in bringing the settlement to a speedy and successful issue.

BENEVOLENT INSTITUTIONS.

The late Legislature adjourned without making formal appropriations for the support of the Benevolent Institutions, and the Penitentiaries. Without attempting to enter into the history of the transactions of that body, or the causes which led to its disruption, it is enough to say that it was so constituted, and adjourned under such circumstances, as forbade the idea of harmonious and beneficial action to the State, should it be re-assembled in extra session. The Auditor and Treasurer promptly decided that no money could be drawn from the Treasury for the support of these institutions, because of the absence of legal appropriations for that purpose. To this conclusion I offered no objection, although, in my own opinion, an appropriation for the support of the benevolent institutions was the clear legal result of the constitutional provision, and the statutes, creating them and providing for their support; and it is very certain that had the same liberal construction been adopted in regard to them, and the Penitentiaries, that was extended to the

payment of the State Printer, they would all have been supported from the treasury.

As the matter stood, the operations of all these institutions—unless it was the Southern Penitentiary—must have been suspended, or I must procure moneys outside of the treasury with which to carry them forward. This I determined to do if possible. The honor and humanity of the State demanded that the operations of the Benevolent Institutions should not again be suspended, and the peace and security of the people of the State required that the convicts in the Penitentiaries should not be turned loose upon society before their time. The financial report will show that I was generously sustained by the constituted authorities of various counties, by many private persons, and by one railroad corporation, to all of whom I desire, in the most public manner, to return my thanks. The money thus obtained, added to the profits of the State Arsenal, was sufficient to support the Benevolent Institutions, and Penitentiaries, and defray all other civil expenses, from the time the duty of providing for them devolved upon me, until the first day of January, 1865, leaving a balance of the civil fund in my hands of \$8,768 95.

The annual reports of the Board of Trustees of the Benevolent Institutions are herewith laid before you, from which it will appear, that when the high prices of all articles that enter into their consumption are considered, that they have been carried on with more economy, and at less cost, than at any former period in their history. This statement I am advised is fully sustained by a careful examination and comparison of the reports of their expenditures from the time of their first establishment.

PENITENTIARIES.

The Northern Prison, located at Michigan City, is the one with which I have had most to do. It has, I believe, been well and economically managed, for which much credit is due to its Warden, Thomas Wood, Esq., and to its Board of Trustees. In this connection I beg leave to call the attention of the Legislature to the remarks in my former message in reference to the construction of that Prison, and the debt contracted for building shops in 1862.

“At the regular session of the Legislature in 1861, the sum of 10,000 dollars was appropriated for the purchase of materials and construction of the Northern Prison, located at Michigan City, for

the year 1861, and a like sum for the year 1862. At the extra session in 1861, the sum of \$30,000 was appropriated for material and construction of the Northern Prison, and for the support of convicts, and the payment of the expenses incurred for the month of January, 1861.

"At the same session a law was passed for the transfer of 200 convicts from the Southern Prison, at Jeffersonville, to the Northern Prison, but no provision was made for their return in case their labor should not be required. At the same session an act was passed providing that all persons sent to the Penitentiaries from counties north of the National Road should be confined in the Northern Prison. The work in the construction of the Prison was vigorously pressed in the summer and fall of 1861, and it was found necessary, by the Board of Directors, in order to keep the convict labor employed, to anticipate, and draw upon the appropriation made for the construction of the Prison in 1862; so that when the work for the year 1861 was closed up, there remained unexpended of the fund appropriated for the construction of the Prison in 1862, but about 3,000 dollars. It was apparent, then, that the labor of the convicts could not be employed in the construction of the Prison during the year 1862, for the want of means with which to purchase the necessary materials. The labor of the convicts could not be leased or hired out to contractors for the want of shops in the prison in which they could be employed. To work the convicts out of prison and about the town, would be so expensive, in the employment of guards, as to make their labor unprofitable; besides there was no authority for doing so, except as connected with the construction of the Prison.

"As the matter stood, it was inevitable that the convict labor should be almost wholly unemployed throughout the year 1862, and must so continue until the prison shops were constructed, when the labor might be hired to contractors, as in other prisons. If the shops were constructed in 1862, this labor could be made remunerative through the year 1863, but if not constructed until 1863, this could not happen until 1864. It was evident that the State would sustain a great loss by the delay in the construction of the shops, and accordingly the Board of Directors convened in this city in February last, and myself and other State officers were invited to be present for consultation; and, after full consideration of the subject, it was believed by all to be clearly to the interest of the State that the work of construction of the shops should be com-

menced at the earliest moment, provided the contract could be let at fair prices, and the contractor, being fully advised of the condition of affairs, should be willing to await the action of the Legislature for his pay. The Board of Directors then proceeded to advertise for proposals for the work, and a public letting was had. I directed Mr. John B. Stumph, of this city, reputed to be an honest and capable builder, to be present at the letting, and see that the contract was properly made, and in accordance with the plans and specifications before that time adopted by the State for the construction of the shops. The contract, I have every reason to believe, was fairly made, upon terms, as I am informed, fifteen per cent. below the original contract for the same work, and at least twenty per cent. below what the same work could be now let for in cash. The shops have been completed, and Mr. Stumph was again directed to examine and measure the work. His report of the letting, quality and measurement of the work is herewith submitted. In view of the early completion of the shops, the Board of Directors were able to lease the labor of the convicts upon terms highly favorable to the State. This business is a proper subject for Legislative investigation, which I hope will be promptly made, and that means will be speedily provided to pay the contractor the amount which shall be found to be honestly due."

To what I have here said, I will only add that the shops, the construction of which I authorized in 1862, would now cost at least seventy-five per cent. more than the price for which they were contracted, and that without them the convict labor of the prison could not have been made available. Justice requires that an appropriation to pay for them should be made without delay.

MILITARY EXPENDITURES.

Upon the adjournment of the Legislature I found myself unprovided, with the exception of a small balance of the military contingent fund, with money or appropriations for military purposes. New regiments could not be raised under the requisitions of the Government, nor recruiting carried forward, without the use of large sums of money. The Legion had received no pay for their services from the beginning of the war, and the organization could not be successfully continued unless payment was made, and the men reimbursed for their actual expenditures, for which the appropriation for the Legion fund, made in 1861, was inadequate. The

Southern border was still disturbed by threats and danger of invasion, and such steps were to be taken, if possible, as would guaranty peace and security to our people. In this dilemma, I determined to apply to the President for an advance under an appropriation made by Congress, on the 31st of July, 1861, which act is in these words :

"Be it enacted by the Senate and House of Representatives of the United States of America, in Congress assembled :—

"That the sum of two millions of dollars be, and the same is hereby appropriated, to be expended, under the direction of the President of the United States, in supplying and defraying the expenses of transporting and delivering such arms and munitions of war as in his judgment may be expedient and proper, to place in the hands of any of the loyal citizens residing in any of the States, of which the inhabitants are in rebellion against the Government of the United States, or in which the rebellion is, or may be threatened, and likewise for defraying such expenses as may be properly incurred, in organizing and sustaining, while so organized, any of said citizens into companies, battalions, regiments, or otherwise, for their own protection against domestic violence, insurrection, invasion, or rebellion."

After a full consideration of the condition of affairs in Indiana, the President advanced to me, as a disbursing officer, out of said appropriation, the sum of two hundred and fifty thousand dollars (\$250,000). It will be perceived that this money was not paid to me as a loan to the State, or an advance to the State upon debts due to her from the General Government, and creates no debt against the State whatever, but that in theory it is an expenditure made by the President, through me, as his disbursing agent. It has, however, been disbursed exclusively in the name and for the benefit of the State, in the payment of necessary military expenses, for which the State should have made ample appropriations. I have advanced to the Paymaster of the State forces, at different times, the sum of one hundred and seventy-one thousand six hundred and sixty-one dollars and eighty-eight cents, of which the greater portion, however, has been reimbursed to me by the General Government, upon my filing in the proper Department the receipted pay-rolls of the Indiana Legion, for services rendered in the war. For a detailed account of the expenditures of the military fund,

the Legislature is referred to the financial report of Hon. W. H. H. Terrell, Financial Secretary, which is herewith submitted, and to the vouchers on file in this Department. All of these expenditures were laid before the Auditing Committee, appointed by the late Legislature, for examination, and received their approval. As will be shown by the report, I had on hand on the 1st day of January, 1865, of the military fund, the sum of one hundred and fifteen thousand four hundred and eighty-seven dollars and twenty-eight cents, and the question is now presented as to the proper method of settlement with the Government for this fund. One of two ways may be adopted. *First*, by returning to the Government the balance of the fund unexpended, and by settling with it for the amount expended, upon vouchers of expenditures, after the same shall have been approved by the Legislature; and this would be in accordance with the theory upon which the money was originally advanced by the President. *Second*, by paying into the State Treasury the unexpended part of the fund, and treating the whole as an advance to the State, to be accounted for by her in her general settlement with the Government for advances made. This latter plan is, in my judgment, more consonant with justice and the honor of the State, the money having been expended for purposes for which the State was honorably and patriotically bound to make provision.

FINANCIAL STATEMENT.

The total amount of cash received by me is.....	\$1,026,321	31
I have disbursed—		
For civil purposes on vouchers.....	\$199,644	93
For military purposes on vouchers.....	702,420	15
Total.....	_____	902,065 08
Leaving a balance in my hands of.....		\$124,256 23

Of this balance, \$8,768 95 belongs to the funds received on account of civil expenses, and \$115,487 28 on account of funds received for military expenses.

In conclusion, on this subject, I respectfully request that a joint committee of the two Houses be speedily appointed to investigate the civil and military expenditures I have made since the adjournment of the last Legislature, and to examine the vouchers for the

same on file in my department, and that the Legislature will make prompt provision for the repayment of the money I have borrowed for public purposes. It was advanced from patriotic motives, with a full reliance upon the good faith of the State for its reimbursement, and without it the machinery of the State Government could not have been kept in motion.

I appointed Hon. W. H. H. Terrell as Financial Secretary, and placed under his care and management the examination and settlement of all accounts. He deserves great credit for the ability and success with which he has conducted the business, and I desire in this public manner to express to him my thanks for his services. His report is herewith submitted as an accompanying document.

INTEREST ON THE STATE DEBT.

Shortly after the Legislature adjourned, the question was sprung as to the existence of legal appropriations for the payment of the interest upon the public debt, and the opinion of Mr. Hord, Attorney General, was published denying their existence and any power to withdraw the money from the treasury to pay the interest, which opinion was endorsed and acted upon by Mr. Ristine, the Auditor of State. Believing that the question had its origin in political considerations, and that there was little room to doubt as to the legal right and duty of the Treasurer to remit the money to New York to pay the interest, I at once took issue with these gentlemen. The State had failed to pay the interest upon her bonds from 1841 to 1847, during which time she acquired a reputation for repudiation and bankruptcy, from which she only recovered after many years of faithful discharge of her obligations. The dark cloud which had thus been placed upon her financial character had seriously retarded her growth in wealth and population, by deterring emigration from her borders. In 1846 she effected a compromise with most of her creditors by the transfer of the Wabash and Erie Canal for one-half of their debt, and the issuing of new stocks for the other half, upon which she solemnly pledged herself to pay the interest semi-annually. This pledge, and the legislation had in pursuance of the compromise, was treated by Governor Whitcomb and the various officers of State, as a valid appropriation of the money necessary to pay the interest under the old Constitution, which, upon this subject, is like the present. In 1850, the framers

of the new Constitution, by the 20th section of the 10th article, solemnly ratified this contract with the bondholders, by appropriating all the revenue of the State, derived from taxation for general State purposes, after defraying the ordinary expenses of the State Government, to the payment of the interest and the liquidation of the principal of the public debt. It was clearly the purpose of the new Constitution to place the credit of the State beyond the contingency of dishonor by acts of omission or prohibition on the part of the Legislature. Under the new Constitution, further legislation to pay the interest was not deemed necessary, and this construction was acted upon by all administrations down to 1863; although perhaps in one case, a formal appropriation was made, without any definite purpose. An action for a mandamus against the Auditor, was commenced by Mr. W. H. Talbot, President of the Sinking Fund Board, for the avowed purpose of having the question settled, which was carried through the Circuit and Supreme Courts, and resulted in a decision by the latter against the existence of an appropriation. Without intending any disrespect to the eminent tribunal by which this case was decided, I must be permitted to observe that the history of its origin, progress and conclusion, was such as to deprive it of any moral influence, and that the principles upon which the decision was made have been since openly disregarded by the Auditor and Treasurer of State, in the payment of large sums of money to the Public Printer.

But leaving out of view wholly who was right or wrong upon the legal question, it was a matter of the first importance that the obligations of the State should be promptly met, and her credit rescued from the disaster of a new dishonor. It had received a shock in the discovery and exposure of the Stover forgery of our State stocks, amounting to nearly three millions of dollars, from the evil consequences of which it was relieved only by a determined effort on the part of the State authorities to bring the criminals to justice. No argument was required to prove that should it again become impaired by a serious failure upon the part of the State to meet her engagements, it could not be restored during this generation, and the progress of the State in wealth and population would receive a serious check. Determined, if possible, to avert the threatened calamity, I went to New York and laid the whole matter before the House of Messrs. Winslow, Lanier & Co., with the request that they should advance the amount necessary to pay

the interest, until such time as the Treasury might be unlocked, and the money obtained therefrom. My request was generously met, and after full consideration, acceded to, provided a correct list of the stockholders could be obtained. It is proper to state, that in making this arrangement, no stipulation was asked for or given, in regard to the compensation they should receive for the use of their money, and the risk and trouble they should incur; but the whole matter was referred to the future action and good faith of the State. They at once notified John C. Walker, Agent of State, of their readiness to pay the interest, and asked him to furnish from his books a list of the stockholders, for the making out of which they offered to pay. This he peremptorily refused, and denied access to his books, from which they desired to copy the list. They then proposed to him that he should pay the interest in the usual way, upon his own books, agreeing to honor his checks issued therefor, at the same time exonerating him from all personal liability for any moneys so paid. This offer was likewise refused. The correspondence between Winslow, Lanier & Co. and Walker, upon this subject, is herewith submitted for your consideration. As Messrs. Winslow, Lanier & Co. would not take the responsibility of paying, in the absence of a correct list, owing to the existence of a large amount of spurious stocks, which otherwise they had no means of detecting, the interest which fell due on the first day of July, 1863, went unpaid.

Determined not to be defeated, if possible, in the effort to preserve the credit of the State, I attempted to secure from other sources a correct list of the stockholders, and in this attempt succeeded in November. In the mean time the necessity for action had become more manifest and imperative than before. While the American stockholders had a correct knowledge of the state of affairs, and but few stocks were changing hands or being offered in the market, the case was quite different with our stockholders in Europe. In Europe, American politics are always badly understood, and the principal fact which they clearly comprehended was, that they did not receive their interest. They associated this failure with that of 1841, and began to say that there was some strange fatality attending Indiana securities, and declared their intention of sending them back to America and getting clear of them at once and forever. Such a measure would have given the State a bad name abroad, seriously affecting emigration to her borders,

and would have been followed by great depreciation and loss of credit throughout the United States.

Having presented the list to Messrs. Winslow, Lanier & Co., they promptly renewed their offer, and gave public notice that they would pay the back interest which fell due in July, and afterward gave further notice that they would pay the interest accrued on the 1st day of January, 1864, the 1st day of July, 1864, and the 1st day of January, 1865, and up to the 31st of November last, as I am advised, had paid out four hundred and sixteen thousand six hundred and seventy-seven dollars and eight cents. How much they have paid since the 1st of January, 1865, I am not advised, but presume it will make the aggregate as much as five hundred and seventy-five thousand dollars. The noble and generous conduct of this house should and will be appreciated by the people of Indiana; and Mr. Lanier, in his clear comprehension and able management of the affair, has displayed not only financial ability, but a broad statesmanship not often exhibited in financial affairs.

I trust that the generous confidence which he has reposed in the good faith of the people of Indiana will not be disappointed, and that the Legislature will hasten to reimburse him for the money he has expended and indemnify him for the use of it, and for the trouble he has incurred.

In conclusion, upon this subject, I am glad to be able to say, that the credit of the State has been fully preserved; and that her stocks now command a higher price relatively in the market, when compared with the stocks of other States, bearing like interest, than at any former period in her history.

John K. Gapin, Esq., who was clerk in the office of the State Agent, during the incumbency of Col. R. N. Hudson, was appointed by me to prepare the books and make the payment of the interest on the State debt, at the banking house of Messrs. Winslow, Lanier & Co., and under their general direction and supervision. He has performed that duty with ability, and to the satisfaction of all parties, and thus far without compensation. I recommend that provision be made to pay him liberally for his valuable services.

STATE DEBT AND SINKING FUND.

The subjects of the State Debt and Sinking Fund, will be reserved for a special communication to the Legislature at another time.

EXECUTIVE DEPARTMENT.

The labors in the Executive Department have been greatly increased by the war, and by the peculiar condition of the State Government for the last two years. The force which I have employed is small compared with the amount of work which has been done. Much responsibility has been devolved upon the Financial and Military Secretaries, and their labors have been most arduous. Colonel William H. Schlater has performed the duties of Military Secretary for more than three years with marked ability and fidelity, and to the satisfaction of myself and the army. Captain Geo. H. West and Captain John M. Commons have performed with efficiency and to my entire satisfaction the labors appertaining to their desks. Col. John C. New, an able and efficient officer, has succeeded to the place held by Colonel Terrell, who has been appointed Adjutant General, which office had been most ably filled by Gen. Laz. Noble.

ELECTIONS AND CONSPIRACIES.

While engaged in a civil war of gigantic proportions, a Presidential election has quietly taken place; its results have been peaceably and readily acquiesced in, and the bitterness and personal animosities which are usually engendered in such a contest, have passed away as speedily and perfectly as at any former period in our history. The ability of the people to come together under such circumstances, and peaceably elect a Chief Magistrate, has been regarded alike by the friends and enemies of republican institutions as the great test of their capacity for self-government, and accordingly we find that the result of the late elections has made a profound impression throughout the old world, and has given renewed assurances of the perpetuity of our Government.

I congratulate you on the returning harmony of the people of our State, and that the dangers which threatened us with internal dissensions, have apparently passed away. Some misguided persons who mistook the bitterness of party for patriotism, and ceased to feel the obligations of allegiance to our country and Government, conspired against the State and National Governments, and sought by military force to plunge us into the horrors of revolution. A secret organization had been formed, which by its lectures and rituals, inculcated doctrines subversive of the Government, and

which, carried to their consequences, would evidently result in the disruption and destruction of the nation. The members of this organization were united by solemn oaths, which, if observed, bound them to execute the orders of their Grand Commanders without delay or question, however treasonable or criminal might be their character. I am glad to believe that the great majority of its members regarded it merely as a political machine, and did not suspect the ulterior treasonable action contemplated by its leaders, and upon the discovery of its true character, hastened to abjure all connection with it. Some of the chief conspirators have been arrested and tried by the Government, and others have fled; their schemes have been exposed and baffled, and we may reasonably hope that our State may never again be endangered and dishonored by the renewal of these insane and criminal designs.

THE WAR.

We are in the midst of a bloody civil war, forced upon the Government by the rebellious inhabitants of certain States. The theory upon which this war was begun was the pretended right of a State to withdraw from the Union whenever its rights under the Constitution of the United States were violated, of which violation it had the exclusive power to judge and determine. This claim was founded upon the dogma that the Union was a compact of sovereign and independent States, to which they were parties in their municipal character; that the United States were not a nation, but an aggregation of nationalities united in a co-partnership for certain purposes, and upon certain conditions, which were contained in the articles of co-partnership known as the Federal Constitution. The exercise of the right of secession, or withdrawal from the Union, was justified by the allegation that the people of the Northern States had violated their constitutional obligations by refusing to capture or permit to be captured in their midst, fugitive slaves escaping from their masters, and by various other acts of hostility to the institution of slavery; and by the further declaration that there was good reason to believe that the Government of the United States, under the administration of Mr. Lincoln, would perform acts of violence subversive of the prosperity and even the existence of slavery. To have conceded the right claimed, and permitted any number of States peaceably to withdraw from the Union, would have involved not only the destruction of the Gov-

ernment, but the absolute dissolution of the nation, breaking it into as many fragments as there are States, each claiming sovereignty and independence as to all the others. When the war was begun, therefore, there was but one of two things for the Government to do, either to suppress the rebellion and assert its integrity as a nation, or to abdicate its authority and confess itself without right to enforce its decrees and perpetuate its existence, by conceding the want of national unity and the right of secession. It must be admitted that between these two there was no middle ground, and the Government was forced at once to a choice between national life and national death, the life only to be preserved by the total suppression of the rebellion that menaced it. Between these contending theories there could, in the nature of the case, be no compromise, as they were utterly antagonistic and irreconcilable. The rebellion was begun upon an alleged right upon which it must stand or fall, and was resisted by the Government upon the ground that its own life could not be preserved if the existence of this right were in any manner or to any extent conceded.

It is hardly worth while to consider what would be our condition if this rebellion were successful. The most thoughtless or stupid mind cannot fail to perceive that the several States, fragments of a once powerful and happy republic, could not live together in prosperity and peace; but that war following upon war, anarchy and the destruction of personal liberty, would inevitably result, to be succeeded by the night of despotism, burying in utter darkness the fair hopes and glorious prospects which once illuminated our national horizon. Whatever it may cost us to preserve the Union, we may be assured it will cost us everything to lose it. A refusal to prosecute the war because it is expensive, would not be unlike the case of a man who should resolve to die because the employment of a physician would embarrass his financial affairs. Nor would it be less absurd to refuse to sustain the Government and prosecute the war upon the pretence that by so doing constitutional rights and personal liberty would be endangered, when we know perfectly well that if the rebellion succeeds, civil and religious liberty and constitutional rights, of whatever kind, will be overwhelmed in one common ruin.

Let us hope that human slavery, which has ever been the source of national dissensions and heart burnings; which from the beginning has arrayed our people into classes, and fretted them into mutual hatreds, and for the preservation and prosperity of which it

has been solemnly avowed that this mighty war and most bloody rebellion were begun and are prosecuted, has received its mortal wound, and will soon be consigned to the common grave of loathsome tyrannies, from which there is no resurrection. Should the Congress of the United States pass a joint resolution to prohibit slavery, or involuntary servitude, throughout the United States, I do most earnestly hope that the people of the several States will hasten to give it their solemn sanction, so that it may pass into our fundamental law, and go out to all the world that our country is in fact, as in name, "the land of the free," as well as "the home of the brave."

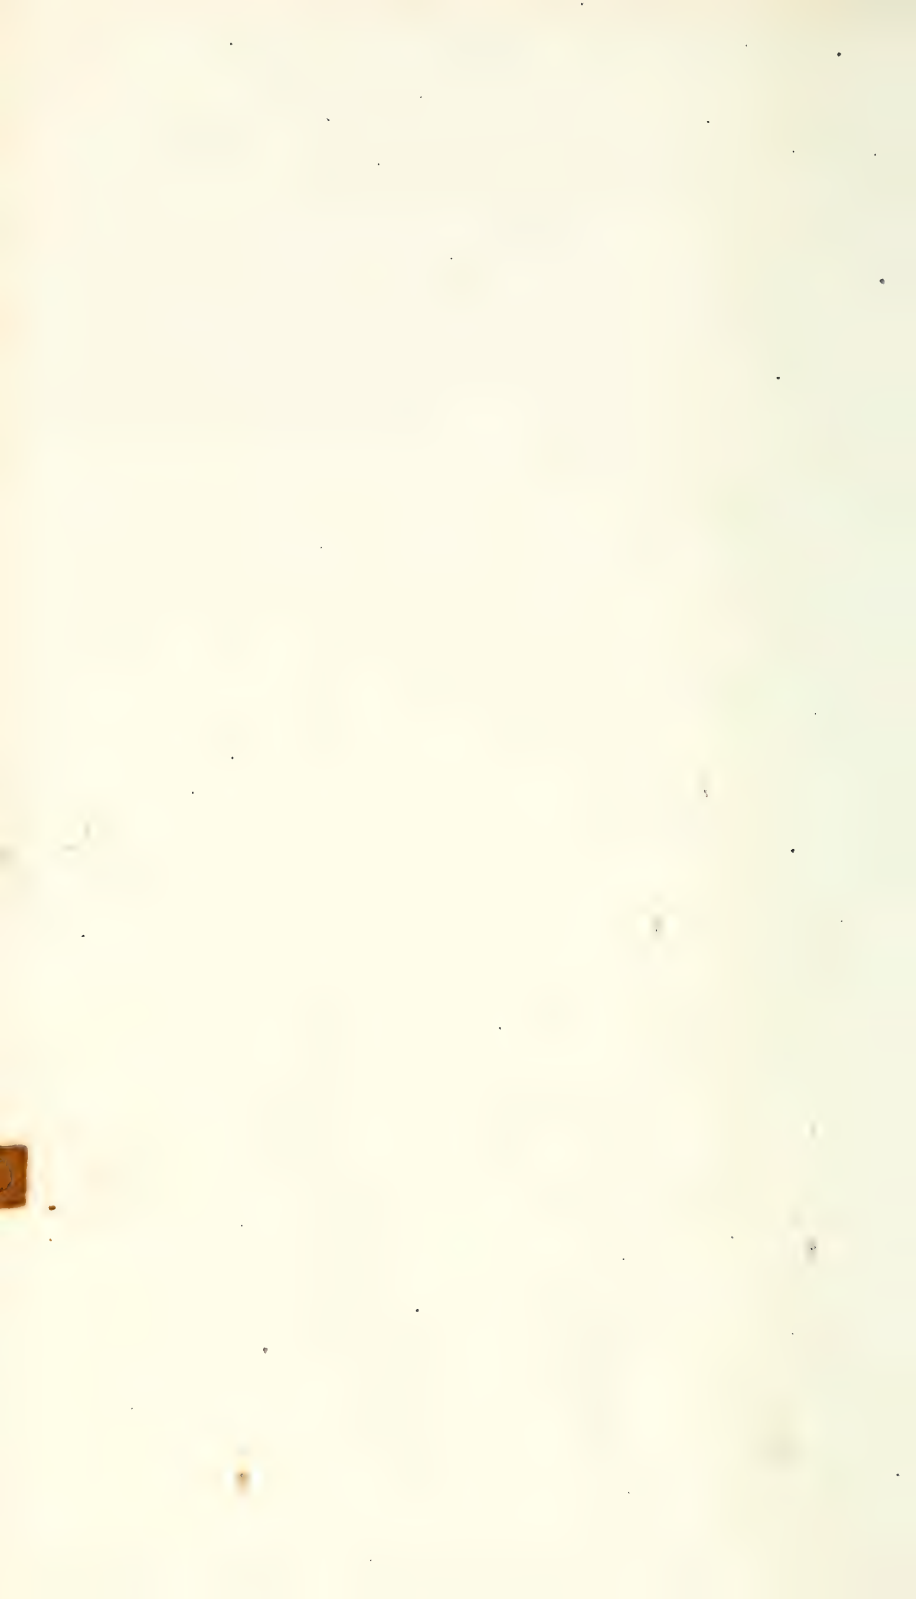

O. P. MORTON.

EXECUTIVE DEPARTMENT,
Indianapolis, Indiana, Jan. 6, 1865.

1 D. J. 1865—59

EIGHTEENTH ANNUAL REPORT

OF THE

OFFICERS

OF THE

Southern Indiana State Prison,

INCLUDING THE REPORTS OF THE

BOARD OF DIRECTORS, WARDEN, PHYSICIAN,
AND MORAL INSTRUCTOR,

FOR THE YEAR 1864.

TO THE LEGISLATURE.

INDIANAPOLIS:
JOSEPH J. BINGHAM, STATE PRINTER.

1865.

DIRECTOR'S REPORT.

INDIANA STATE PRISON SOUTH, }
Jeffersonville, Dec. 20, 1864. }

To His Excellency, O. P. MORTON,
Governor of the State of Indiana.

In accordance with law, we, the Directors of the Indiana State Prison South, herewith submit our annual report of the management and condition of the Prison, for the year ending December 15th, 1864.

At the time of our last annual report, there was in this Prison two hundred and forty-seven convicts. Since then there has been received ninety-five, and discharged during the year ninety-six, leaving one less than at last report.

The receipts and earnings of the Institution, during the year, have been as follows:

From Contractors, for convict labor.....	\$21,894 20
From Visitors.....	170 15
From United States, for United States convicts.....	353 62
From Sales.....	1,315 13
Total	\$23,733 10

The expenses during the same time, as follows:

Discharged Convicts.....	\$1,140 00
Expense Account.....	1,147 15
Hospital	906 05
Provision.....	11,517 59
Clothing.....	6,073 86
Salaries.....	12,795 56
Fuel.....	2,578 48
Tobacco.....	44 83
Gass.....	937 90
Stationery.....	105 95
Escaped Convicts.....	237 90
Bedding Account.....	612 70
Engine.....	27 84
Team.....	610 24
Total	\$38,953 05

The excess of expenses over the earnings of the Prison, for the year, is fifteen thousand two hundred and nineteen dollars and ninety-five cents. This sum is greatly to be regretted, especially after so many and oft repeated assertions, in former reports, that the Prison was soon to become self-sustaining. But when we consider that the receipts and earnings are no larger than they were before the war, and the greatly increased price of living since, the present condition of the financial affairs of the Institution could not reasonably be expected to be in any better situation.

If your Excellency will examine the expenses as set forth in last year's report, you will see that in two items alone, the expenses of this, over the former year, amount to about six thousand dollars. In the year ending 15th of December, 1863, the provision and clothing account of the Prison was eleven thousand six hundred and seventeen dollars and four cents; the cost of the same articles this year is seventeen thousand five hundred and ninety-one dollars and forty-five cents.

At the beginning of the present year, the small-pox broke out in the Prison to such an extent, that for some weeks business was almost suspended. Sixty-three convicts were attacked with the disease. The clothing and bedding used by them had necessarily to be destroyed, and additional medical attendance employed. The expenses incurred during and on account of the epidemic, increased the expenses of the Prison at least four thousand dollars, besides the loss of time of the hands.

The trial and conviction of Henry Hardin, a convict for the murder of Peter Yesley, an Assistant Keeper in the Prison, on account of change of venue, continuances, &c., added some six or seven hundred dollars to the expenses of the present year.

The foregoing will give your Excellency an idea of the additional and increased expense attending the management of the Prison for the last year; and upon examination of the tables prepared by the Clerk, you will see that the increase in all the other items of expense have been in the same proportion as those herein mentioned.

It is proper, whilst making the estimate of the receipts and expenses, to take into account the work and labor performed by the convicts for the State, in the capacity of cooks, tailors, engineers, &c., amounting, as shown by the Clerk's report, to three thousand three hundred and sixty-nine dollars and sixty cents. Deducting this sum from the current expense, would leave the actual defi-

ciency of the present year, eleven thousand eight hundred and fifty dollars and thirty-five cents.

We see no prospects of the expenses being less for the ensuing year, but on the other hand, if prices of all articles used and consumed in the Prison advance as they have during the last twelve months, the expenses will necessarily be much greater, with no prospects of larger receipts.

When we first entered upon the duties of our office, we found the following contracts existing for convict labor:

Long & Bro., for twenty hands, at forty cents per day, expiring June 1st, 1864.

Smyth & Smyser, for thirty hands, at forty cents per day, expiring November 30th, 1865.

Hall, Luckhaupt & Co., for one hundred hands, at forty cents per day, expiring August 15th, 1867.

Nock, Hall & Co., for one hundred hands, at forty cents per day, expiring November 13th, 1867.

The Board believing that on account of the then increased and still increasing prices of all articles of living, the prison would fall greatly behind in her finances, and feeling that on account of the advanced prices of articles manufactured in the prison by the contractors, they could well afford to pay a larger amount for convict labor, determined to test the validity of the existing contracts; but upon a full investigation of all the facts relating to the same, a majority of the Board were of the opinion that the contracts were legal and valid. There can be no doubt that, under a letting at this time, the labor of the convicts could be hired at such prices as would not only pay all the expenses of the prison, but yield a revenue besides of ten or fifteen thousand dollars annually to the State. As there may be some question as to the validity of these contracts, we would respectfully refer the matter to your Excellency, calling your attention to the statement on that subject in our last annual report.

The contract with Long & Brother, for the hire of twenty men, expired on the 1st of last June. After advertising, according to law, the men employed by him were hired to John S. Hall & Co. for two years, at the rate of forty cents per day for each hand; the said Hall & Co. binding themselves, in consideration of said hiring, to run the State engine at their own expense, supplying all fuel and labor therefor, to furnish steam power for the prison, and to keep up all repairs on the engine, boiler, &c., thereby saving the

State at least three thousand dollars per annum, making the actual price per day for the convicts so hired to them, at over one dollar and ten cents for each man.

The contractors have, in every instance, promptly complied with all the requirements and conditions of their contracts, and have always shown themselves to be honest, energetic and faithful business men. It is due to them to say that the correct discipline of the prison is due, in part, to the order and judgment exhibited by them in the management and control of the men in their respective departments.

In our last report we suggested the propriety of your Excellency advancing to the Institution the sum of four thousand dollars, for the purpose of purchasing provisions for the use of the prison, which, we are happy to say, was promptly complied with, the money furnished, and the provisions purchased at such rates as to save the State at least one thousand dollars. For your prompt response to our suggestion, we return you our thanks.

For several years past we have used a tract of land containing about six acres, across the street from, and immediately in front of, the prison, belonging to Mr. Smith, for garden purposes for the use of the prison. This ground is becoming more valuable every year for building sites, and will likely, in the coming Spring, be cut up into lots by the proprietor, and sold off for that purpose. On account of its nearness to this Institution, and its great value to it for garden purposes, we would recommend that the State purchase the same for the use of the prison.

We would further respectfully recommend and urge that the Legislature appropriate the sum of fifteen thousand six hundred and seventy-five dollars and fourteen cents to pay off the present indebtedness of prison, as follows :

Merrit Alloway, for corn.....e.....	\$1,994 22
Thomas Krementz, for beef.....	438 48
James G. Caldwell, for medicines.....	519 55
John Matlock, for stripes and blankets.....	4,296 90
Wm. A. Steele, for groceries.....	324 17
Holmes & Thias, for hospital stores.....	122 55
J. R. Monroe, clerk.....	1,208 33
D. W. Miller, advanced.....	2,770 94
Governor O. P. Morton, advanced.....	4,000 00
Total	<u>\$15,675 14</u>

And that for the purpose of defraying the expenses of the Institution and making repairs, for the ensuing two years, the sum of twenty-five thousand dollars be appropriated.

For a more particular and minute statement of the affairs and management of the prison, and the different departments thereof, we would respectfully refer you to the tables furnished by the Clerk, the reports of the Warden, Moral Instructor, Physician, and Matron. We would close this report by stating that to each of these officers we are mainly indebted for the good order and discipline maintained in the prison during the year.

Respectfully submitted, &c.

JNO. F. READ,	}	<i>Directors.</i>
SAMUEL DONELSON,		
GEO. E. GREENE,		

WARDEN'S REPORT.

WARDEN'S OFFICE,
INDIANA STATE PRISON SOUTH,
December 15, 1864.

The Honorable Directors of the Indiana State Prison:

GENTLEMEN:—The time has again arrived when it becomes my duty to submit for your consideration, my annual report as Warden of this Institution.

The statistics herewith submitted, will exhibit the financial affairs of the Prison. It will be seen that the disbursements for the current expenses of the Prison for the past fiscal year, together with the outstanding debts paid during this year, amount to thirty-three thousand nine hundred and fifty-five dollars and fifty-nine cents. During the same time the cash receipts from all resources were thirty-one thousand one hundred and eighty-four dollars and sixty-five cents, leaving a balance due the undersigned for moneys advanced, of twenty-seven hundred and seventy dollars and ninety-four cents.

There are outstanding debts against the Prison as follows:

Due Merrit Alloway, for corn.....	\$1,994 22
Due Thomas Krementz, for beef.....	438 48
Due James G. Caldwell, for medicine.....	519 55
Due John Matlock, for stripes and blankets.....	4,296 90
Due Wm. A. Steele, groceries.....	324 17
Due Holmes & Thias, hospital stores.....	122 55
Due J. R. Monroe, clerk.....	1,208 33
Advanced by the Warden.....	2,770 94
Total.....	\$11,675 14

Making, as above, the indebtedness of the Prison eleven thousand six hundred and seventy-five dollars and fourteen cents, which will have to be provided for by an appropriation of the Legislature of the State.

This deficiency may appear large, in view of the fact that we have upon former occasions, expressed the hope that the Institution would very soon become self-sustaining; but the extraordi-

nary high price of provisions and clothing, with an increase in the salaries of the guards, while the proceeds of convict labor remain the same, will account for the greater portion of this deficiency, and the necessary expenses attending the prevalence of the small pox in the Prison, for a great portion of last winter, will account for the rest. If we consider the loss of time of the prisoners—seventy or eighty of whom were detained from the work-shops, either sick themselves, or detailed as nurses for others—the additional expense for medical attendance, and the large amount of bedding and clothing that had to be destroyed and replaced, with other necessary incidental expenses, we may safely put down the whole expense of this terrible disease in our midst, at not less than five thousand dollars.

For a particular exhibit of the above disbursements and receipts, I refer you to the monthly reports of moneys received and paid out, herewith annexed.

The Prison buildings have been kept in the usual repair. It will be necessary during the ensuing year, to have a new metal roof upon the main building or guard house. This extra expense (about five hundred dollars) should be borne in mind in asking an appropriation from the Legislature.

The number of prisoners at present confined in the Prison, is two hundred and forty-seven. This number only differs by a fraction, from the average during the year. The same number are under contract as indicated in my last report. While it must be regretted that the price of labor, according to the existing contracts, is very low, yet it gives me pleasure to state that the contractors are every way prompt in meeting their engagements, and readily acquiesce in all the rules and regulations that have for their end either the good discipline of the Prison, or the comfort and well being of the prisoners.

The police regulations of the Institution have proved very efficient during the past year. No serious insubordination has occurred, and there has been no resort to unusual punishments, to reduce to submission the cases that have required active discipline. This favorable condition of things is in a great measure due to the active co-operation of my associates, and the subordinate officers of the Prison, in carrying out faithfully the police regulations adopted. It is gratifying to state that in regard to all matters of discipline, the utmost harmony has existed between myself and them, and I cheerfully bear witness of their faithfulness to the

trust reposed in them. The report of the Moral Instructor will exhibit the efforts that have been made in that department for the religious instruction and moral elevation of the inmates of the Prison.

For the sanitary condition of the Institution, I refer you to the report of the Physician. His attendance daily at the hospital has been faithful, with the exception that he makes in his report, when prostrated by unusual labor and family affliction. I would here state also, that during the prevalence of the loathsome and infectious disease in our midst, none of the officers deserted their post but faithfully performed their duties in alleviating the wants of the sick and dying.

The usual statistical reports are appended, from which many interesting facts may be derived. They are commended to your attention. The report of the Matron will give you all information of special interest concerning the Female Department.

Having submitted, gentlemen, for your consideration, all that is deemed of special importance, it only remains for me to express my thanks for the readiness with which you have always responded to those recommendations which I have thought it proper to make, and for the personal courtesy extended in all our intercourse.

Very respectfully,

Your obedient servant,

D. W. MILLER, *Warden.*

MORAL INSTRUCTOR'S REPORT.

MORAL INSTRUCTOR'S OFFICE, }
December 15, 1864. }

To the Board of Directors of the Prison at Jeffersonville,

The Hon. Messrs. READ, DONELSON and GREENE:

GENTLEMEN:—I herewith submit my annual report of the condition and management of the Department of Moral Instruction in this Prison.

The title of the office which I hold by your kindness, is, under the laws of the State, that of Moral Instructor; our Legislators choosing this title in order to avoid the sanction of any particular form of religion. But as the morals of men are seldom ever improved except by the sanctions of pure religion, the labors in this department have been directed more particularly through the religious element of men's natures, and hence this report embraces the efforts that have been made to impress upon the mind the principles of that Gospel which has power to change men's hearts as well as to induce outward conformity to those rules of life that are sanctioned by pure morality.

While all the correct motives that usually incite men to maintain an unblemished reputation in the world, are held up, and the policy of obedience to law is exhibited, yet it is not believed that ever these motives alone will produce a reformation of character. It is only a correct apprehension of right and wrong that will enable any one to form the basis of a righteous character, and this apprehension can only be secured as an abiding principle, by a familiarity with the revealed will of God. In pursuance of this theory, each convict is furnished with a copy of the Bible, at the expense of the State. This beneficent provision is a great assistant to the preaching of the Word, as the profit of preaching is in a great measure proportionate to the Bible knowledge of the hearer.

It gives me pleasure to state that there are many faithful Bible readers in the Prison, and there is no doubt that many hours of loneliness and gloom are dissipated by the light of this precious Word.

A portion of each Sabbath morning is devoted to the explanation of interesting portions of the Scriptures, in the way of familiar lectures. At this service one-half of the convicts are permitted to attend on alternate Sabbaths, and as the attendance is optional, the number that are present from Sabbath to Sabbath, gives evidence that the exercises are pleasant and profitable.

The regular chapel service of preaching is attended at one o'clock in the afternoon. At this service all the inmates of the Prison are required to be present. The good attention here given, and interest manifested, gives me grounds of hope that great profit results to the hearers in this service. The statistics of churches in the outside world show that almost all those who regularly attend church upon the Sabbath day, become Christians. We have here no organized church, and can not cite you to particular cases of profession, but we may still hope that the great day of accounts will show that line upon line, and precept upon precept here, have not returned void, but in many instances have wrought that change in heart and life which translates the poor criminal from the power of satan unto God. Religious services have also been held each Sabbath in the Female Department.

The library of the Prison is under the care of the Moral Instructor. The number of volumes taken from the library during the year, is about 3,500. The prisoners have the privilege of selecting books for themselves, and that they may be aided in this respect, the books have been properly classified, and a catalogue provided, showing where any particular book is, if in the library.

I would respectfully call your attention to the matter of replenishing the Library. Many of the most popular of the books and best adapted to the class of persons found here, are entirely worn out and thrown aside.

Thousands of dollars are yearly expended here in ministering to the physical comfort of the prisoners. May I not confidentially hope that you may interest yourselves in securing an appropriation for their moral and spiritual well-being. Since this department, in point of privilege, bears a small proportion to the penal, we ought to have every facility that will give assistance to our labors.

It gives me pleasure to acknowledge a donation of 85 volumes

of suitable reading matter from the Presbyterian Board of Publication. These have been added to the Library. The American Tract Society also responded liberally to an application for tracts, and the American Sunday School Union secured for the use of the chapel 100 Hymn Books, and other appliances for the proper conduct of the Sabbath School.

In conclusion, gentlemen, I would return my thanks for your uniform kindness, and, I trust, should the relations we now occupy be continued, that all our future intercourse shall be as pleasant as that of the past.

Very respectfully,

R. J. L. MATTHEWS,

Moral Instructor.

MATRON'S REPORT.

FEMALE DEPARTMENT,
INDIANA STATE PRISON SOUTH,
December 15, 1864.

Messrs. READ, DONALDSON, and GREENE, Directors of Prison:

GENTLEMEN:—It again becomes my duty to report to your Honorable Board the affairs of the Female Department of this Prison. The number of inmates is at present seventeen. Of these, six have been received during the past year. An equal number have been discharged by expiration of sentence, or otherwise. The women have been principally engaged in the manufacture of tobacco, box making, and in doing the sewing of their own department, and in part for other prisoners.

The discipline has been, during the past year, as good as usual, though the incentives attending idleness—not being provided with work all the time—have provoked some to insubordination. It is hoped that henceforth they may have steady work in the manufacture of paper boxes, which has just been commenced in the Prison. The health of the prisoners has been uniformly good, no serious sickness having occurred since the prevalence of the small pox.

The usual religious services have been held upon the Sabbath day by the Moral Instructor, and with such interest on the part of the inmates as lead to the hope that good is accomplished.

The statistics of the clerk will also embrace the inmates of this Department, to which you are respectfully referred.

With grateful acknowledgments for the assistance rendered me by the executive officers, in my duties, and to yourselves for your uniform kindness,

I am, very respectfully,

JOSEPHINE A. HUFF, *Matron.*

PHYSICIAN'S REPORT.

HOSPITAL DEPARTMENT, {
Indiana State Prison, South. }

To Messrs. READ, DONALDSON and GREENE, Directors :

GENTLEMEN:—In submitting my first annual report of this Department, one year ago, I stated to you the condition of the Department for the year then closing, and I stated to you that the small-pox had appeared in the prison on the 6th of December of that year, and that I had taken the precaution to vaccinate all those of the inmates of the prison who were unprotected by vaccination, that they might, as far as possible, escape the ravages of a small-pox epidemic. But, notwithstanding all the precautions taken, owing, as is supposed, to the intensely cold weather and the inertness of vaccine virus obtained, the epidemic spread with almost unparalleled virulence until almost the whole number of inmates, and many connected with the prison, were infected with the contagion. About the middle of January we had fifty cases of well defined small-pox in the prison. Being wholly unprepared for such an amount of sickness in the hospital, we were compelled to make arrangements for the rapidly increasing patients, which was done as economically as could be, but at considerable expense to the Institution, at a time when the business of the prison was nearly suspended. In the middle of the epidemic, when my energies were well worn with the duties of my position as Physician to the Institution, my family became afflicted with disease of a formidable character, which added largely to my cares; and finally my energies became prostrate, and I was compelled, in the last extremity, to call for assistance. The assistance was rendered by two worthy brothers of my profession, in an efficient manner, and to them I am under lasting obligations for their kind attentions to the sick of the prison during my temporary affliction. And to you,

gentlemen, let me acknowledge my indebtedness for the kind manner in which you furnished all the means in your power necessary to render the ravages of the dreadful disease as harmless as possible.

To the Warden, Mr. Miller, whose humane and kind disposition is well and favorably known, I am under many obligations for the promptness with which he responded to every requisition made upon him from this Department during the year past. And of the officers generally, connected with the prison, let me say, that they were ready and anxious, at all times, to contribute to the well being of the Institution. The number of deaths that have occurred during the last year are nine—six from small-pox, one from phthisis, one from peritonitis, and one from debility (or old age).

Submitted below please find a synopsis of cases treated during the year now closing, both in and out of the hospital, the different diseases treated, the number now in the hospital, the number of deaths, and the number discharged from the hospital. The number of cases treated outside of the hospital is one hundred and thirteen; the number treated in the hospital is one hundred and seventy-two, none of whom were confined to their beds any considerable length of time, but four or five. There have been performed twenty-three operations in minor surgery, in the year past, all of which resulted well.

DISEASES TREATED IN THE HOSPITAL.

Cases of small-pox	63
Cases of diarrhoea	15
Cases of remittent fever	12
Cases of intermittent fever	12
Cases of tonsillitis	10
Cases of catarrh	10
Cases of typhoid fever	7
Cases of erysipelas	7
Cases of gonorrhoea	7
Cases of syphilis	5
Cases of abscess	4
Cases of scrofula	4
Cases of pneumonia	3
Cases of asthma	2
Cases of epilepsy	2
Cases of hemoptics	2
Cases of ascites abdominis	2
Cases of paralysis agitans	1
Cases of phthisis pulmonalis	1
Cases of necrosed libia	1
Cases of general debility	1
Total	172

Number of deaths from small-pox	6
Number of deaths from phthisis	1
Number of deaths from peritonetas	1
Number of deaths from debility	1
Total	9
Number discharged from hospital	158

The number now remaining in the hospital is five, all of whom are doing well, except the patient with paralysis agitans (or shaking palsy), whose case is beyond the reach of medical art, and who is growing worse daily. I would respectfully call your attention to this case, and ask your several and joint influence in obtaining for him Executive clemency through a pardon.

It is highly gratifying to me, gentlemen, at this time, to be able to report to you that the sanitary and hygienic condition of the prison is very good, being entirely free from disease, except of a chronic character, which, in a majority of instances, is the result of previous bad habits.

The healthful condition of the prison at this time is such as is not only gratifying to the medical attendant, but also gratifying to all the officers and well wishers of the Institution.

I have no suggestions to make in reference to this Department at this time.

Respectfully submitted.

C. R. McBRIDE, *Physician*.
